

STRENGTH WITH RESILIENCE

Adani Electricity Mumbai Limited
Integrated Annual Report 2024-25

Strength

is what we strive for

With a deep sense of responsibility and a commitment to sustained development, we have built a core infrastructure platform – one that grows alongside India and contributes meaningfully to its progress. Our approach sets new industry benchmarks through scale, strategic capital deployment, innovative project development, and rapid execution. All of this while ensuring that our expansion remains responsible, sustainable, and inclusive, benefiting not just our stakeholders but the nation as a whole.

Resilience

defines us

Our '*Hum Karke Dikhate Hain*' spirit gives us the strength to navigate challenges with determination and adaptability. It allows us to learn, grow, and turn obstacles into opportunities, always striving to do better. With each challenge, we emerge stronger and more committed to serving our stakeholders and contributing to a brighter future.

Approach to integrated reporting

About the report

The Integrated Annual Report of Adani Electricity Mumbai Limited (AEML/the Company) has been prepared in alignment with the <IR> Framework of the IFRS Foundation. It presents a holistic view of AEML's financial and non-financial performance, with a clear focus on sustainable value creation for stakeholders over the medium to long term. The Report goes beyond statutory compliance, offering detailed insights into the Company's business model, strategy, risks and opportunities, and governance. A dedicated ESG section highlights AEML's commitment to environmental stewardship, social impact, stakeholder engagement, and responsible governance.

Reporting scope and boundary

The Report covers relevant information about Adani Electricity Mumbai Limited (AEML), providing comprehensive insights into AEML's distribution activities, operations and related information.

Reporting Framework, Guidelines and Standards

Narrative section of the report that provides comprehensive overview of the Company, its performance and allied activities. This is prepared in accordance with the IIRC's <IR> Framework while the ESG section of the report is prepared with reference to the requirement of the Global Reporting Initiative (GRI) Standards 2021.

The statutory section i.e., Directors' Report, Management Discussion and Analysis (MDA) and Corporate Governance Report as well as the Financial Statements of the report on references to the following:

- Companies Act of 2013 and its associated rules
- Indian Accounting Standards
- United Nations Sustainable Development Goals (UN SDGs)

Approach to materiality

Our ability to generate value across the near, medium, and long term is shaped by external factors, our proactive management of risks and opportunities, and strategic decisions. This Report offers insight into the material issues we consider significant, providing essential context to enhance transparency and deepen understanding of our business and its role in value creation.

Value creation through six capitals

As an integrated electric utility, we play a vital role in national development, societal well-being, and economic growth. Our commitment to responsible and sustainable business practices is guided by the efficient use and continuous enhancement of six key capitals. We regularly assess the outcomes and interdependencies of these capitals through active stakeholder dialogue and risk evaluation. This integrated approach strengthens our ability to generate long-term value and deliver a positive impact on society.

- Financial Capital: Ensuring prudent financial management and value creation for shareholders
- Manufactured Capital: Maintaining and upgrading reliable infrastructure to deliver uninterrupted power

- Intellectual Capital: Leveraging technology, innovation, and systems to drive operational excellence
- Human Capital: Investing in employee capabilities, safety, and well-being to build a resilient workforce
- Social and Relationship Capital: Fostering trust through transparent stakeholder engagement and community partnerships
- Natural Capital: Managing environmental resources responsibly to minimise our ecological footprint

Board assurance

We have adopted a comprehensive, risk-based assurance approach to ensure the accuracy and reliability of our operations. This includes internal controls, management assurance, compliance reviews, internal audits, and engagement of external service providers – all supporting the integrity of our disclosed information.

Various Board Committees – including Audit, Stakeholder Relationship, Risk, CSR & Sustainability, Remuneration & Nomination, and Securities Transfer – review specific reports and recommend them for Board approval.

For FY 2024-25, TUV India Private Limited assured environmental, social, and governance (ESG) indicators to validate their accuracy.

The Board and management assume full responsibility for the credibility of this Report. The Board has actively reviewed its contents, ensuring it presents a balanced and comprehensive view of the Company's performance and impact. They collectively affirm the Report reflects AEML's integrated performance.

We welcome stakeholder feedback as part of our commitment to transparency and continuous improvement. Feedback can be shared at jaladhi.shukla@adani.com.

Forward-looking statement

This Report contains forward-looking statements that reflect Adani Electricity Mumbai Limited's (AEML) expectations regarding future events, strategies, and performance. These statements, which are not limited to historical facts, include projections, objectives, approaches, and mitigation plans, and are based on reasonable assumptions and past trends. However, they involve inherent risks, uncertainties, and other factors – including changes in industry structure, regulatory and legal developments, economic conditions in India and globally, tax laws, import duties, litigation, and labour relations – that may cause actual results to differ materially from those expressed or implied. Adani Electricity Mumbai Limited will not be in any way responsible for any action taken based on such statements and undertakes no obligation to publicly update these forward-looking statements to reflect subsequent events or circumstances.

PORTFOLIO OVERVIEW

4 The Adani portfolio of
companies

The Adani portfolio of companies

A legacy of vision, a catalyst for progress

The Adani Portfolio of Companies embodies a bold vision and enduring impact. With strength as our foundation and resilience as a force, we build businesses that sustain the nation's growth and drive sustainable progress. We scale with purpose, navigate challenges with conviction, and lead with responsibility. We are catalysts shaping a future-ready India for generations to come.

Profile

Headquartered in Ahmedabad, India, the Adani portfolio of companies was founded and promoted in 1988 by visionary industrialist Mr Gautam Adani. Starting with the commodity trading business under the flagship Adani Enterprises Limited (formerly Adani Exports Limited), the Adani portfolio of companies today ranks among India's largest and most dynamic business conglomerates.

What Makes the Adani Portfolio of Companies Unique?

- Market-leading position and bold investments in sectors critical to the Indian economy including four key areas – transport and logistics, energy and utility, materials and metals, and various B2C sectors
- Global credibility with four of the eleven publicly-traded companies being investment grade (IG)-rated and having a reputation as India's only Infrastructure Investment Grade bond issuer

Vision

To be a world-class leader in businesses that enrich lives and contribute to nations in building infrastructure through sustainable value creation.

Values

- Courage:** We shall embrace new ideas and businesses
- Trust:** We shall believe in our employees and other stakeholders
- Commitment:** We shall stand by our promises and adhere to high standards of business

Culture

- Passion:** Performing with enthusiasm and energy
- Results:** Consistently achieving goals
- Integration:** Working across functions and businesses to create synergies
- Dedication:** Working with commitment in the pursuit of our aims
- Entrepreneurship:** Seizing new opportunities with initiatives and ownership

A portfolio
rooted in
purpose

Delivering
impact at scale

- ESG commitments in line with industry best practices and credible global and national ESG frameworks; overseen by a 100% independent Board-level ESG committee - Corporate Responsibility Committee (CRC)
 - The Adani Foundation has empowered over 9.1 million lives with impactful health, nutrition, education, basic sanitation, women's livelihood and skills development efforts aligned with the aspirations of new India.
 - The Adani Portfolio plays a pivotal role in advancing India's decarbonisation goals. The Group has pledged to invest USD 100 billion over the next decade to support the green transition. Significant strides have been made by the companies within the portfolio to accelerate their decarbonisation efforts, with the aim of achieving Net Zero emissions by 2070 or earlier, in alignment with India's Net Zero ambitions.
 - To reduce Scope 1 emissions, the Adani Portfolio is enhancing operational efficiency, electrifying operations wherever possible, adopting biofuels, and piloting hydrogen fuel cells where other options are not feasible
 - The Portfolio's significant renewable capacity, currently at 14.2 GW and projected to reach 50 GW by 2030, helps reduce Scope 2 emissions by sourcing green electricity
 - The Portfolio of Companies are also exploring waste heat recovery and energy storage solutions, including utility-scale batteries and green hydrogen for continuous green electricity
 - To abate Scope 3 emissions, Adani Portfolio businesses are adopting circular economy measures and exploring options to incentivise upstream and downstream stakeholders to reduce their emissions by offering price premiums for low-carbon products and services
 - The pathway for decarbonising the last mile focusses on the creation of an integrated green hydrogen ecosystem, the adoption of sustainable energy storage solutions, the exploration of carbon capture and utilisation (CCU) opportunities, the establishment of a carbon pricing mechanism, and the implementation of pilot projects aimed at reducing hard-to-abate greenhouse gas emissions

Designed for Growth, Nation-Building and Value Creation

The Adani portfolio of companies is a world-class infrastructure and utility portfolio with a presence spanning India's critical sectors. With a market leadership position across the businesses and through bold investments, innovation and sustainability efforts, the portfolio of companies is positioned for growth and shaping the nation's progress.

✓2070	✓	✓	✓

Commitment to the Nation's Progress

USD 375 million

Secured for network development:

- PNG pipelines for homes, industries and commerce
- CNG and LNG stations for transport consumers

Why it matters?

To lead India's energy transition (of decarbonisation and net zero) by delivering affordable, reliable low-carbon energy solutions across sectors.

* Including JV, IOAGPL

AMBUJA CEMENTS LIMITED*

India's second-largest cement manufacturer

Iconic and Most Trusted

cement brands

ACC

Ambuja Cement

100+ MTPA*

cement manufacturing capacity

Commitment to Sustainable Progress

SBTi/Net zero commitment	Tax transparency audit	UNGC participant	IBBI
✓2050	✓	✓	✓

Commitment to the Nation's Progress

40 MTPA

Cement projects underway, aiming for 140 MTPA capacity by 2028

Why it matters?
To address India's rising cement demand, driven by infrastructure projects and rising housing and commercial needs.

**The Company had a cement capacity of 88.9 MTPA during the reporting period. The successful completion of acquisition of Orient Cement during April 2025 has subsequently added 8.5 MTPA cement capacity. This along with the operationalisation of 2.4 MTPA capacity expansion at Farakka as well as 0.5 MTPA capacity addition through de-bottlenecking at various plants has taken the Company's total capacity to 100.3 MTPA.*

ADANI POWER LIMITED

India's largest private-sector thermal power producer

India's largest

single-location private thermal IPP (Mundra)

17,550 MW

operational capacity

Commitment to Sustainable Progress

SBTi/Net zero commitment	Tax transparency audit	UNGC participant	IBBI
✓	✓	✓	✓

Commitment to the Nation's Progress

12,520 MW

Additional capacity creation by 2030

Why it matters?
Ensuring reliable energy for India's dynamic economy with peak power demand estimated to grow from 250 GW in May 2024 to nearly 400 GW by 2031-32, which will necessitate more than 80 GW of additional thermal power capacity.

AWL AGRI BUSINESS LIMITED

India's largest edible oil brand and a leading packaged foods player

Amongst India's largest

port-based edible oil refinery

5,000 MTPD

edible oil refinery capacity

2.1/121 million

Strength with Resilience

Continuity is progress – quiet, measured, and foundational.

It's something the power sector has prioritised ever since – ensuring reliable supply across the country. This stability formed the bedrock of national growth through powering everyday life. This commitment to reliability has long defined value. Today, as demand becomes more dynamic and expectations more complex, the definition of progress for the sector seems to be evolved. It's the one that values systems capable of adapting with precision and delivering with consistency.

Performance now hinges on precision and adaptability – capabilities that must be embedded.

Resilience, in this new context is design in action: Deliberate, Continuous, and Structural.

Systems that deliver

We are advancing the utility experience by integrating digital intelligence across the distribution network. Smart meters, automated control systems, and upgraded infrastructure have made the grid more agile, responsive, and transparent. The progress is equally evident in the customer interface – where intuitive, digital-first touchpoints now define convenience, accessibility, and trust.

Scaling with Intent

Strategic growth is visible in the steady increase in residential and commercial users, along with deeper engagement with C&I clients. Our journey epitomised the essence of the spirit that has always defined us and has allowed us to consistently turn challenges into success. Backend and transmission infrastructure is being ramped up in parallel – designed to support this growth while ensuring continuity. Every expansion is calibrated, backed by internal cash flows and executed without adding debt. This reflects a self-sustaining model that protects balance sheet strength while enabling long-term value creation.

This is “Strength with Resilience”

An approach defined by performance, demonstrated through delivery, and scaled with purpose. It anchors a future-ready utility – built to power not just a city, but a more confident tomorrow.

MESSAGE FROM
THE CHAIRMAN

We have become –
more formidable,
more unbreakable,
more stronger and
more resilient!

- GAUTAM ADANI

Our objectives are aligned with India's ambitions.
And our strength comes from the belief that you –
our shareholders – place in us.

Dear Stakeholders,

Let me begin with a salute and a bow of gratitude as a fellow citizen who deeply acknowledges the courage of our brothers and sisters that guard our peace.

During Operation Sindoor, our brave men and women in uniform stood tall, not for recognition, but for duty. Times like these make us realise that peace cannot be taken for granted. It is earned through decades of silent sacrifice, unwavering resolve and strength built far from the spotlight, in the deserts, on the borders and deep at sea.

Our achievements as a nation do not just lie in balance sheets or boardrooms but also belong to the soldiers who stand watch while we build, and to the uniform that chooses service while we chase ambition.

It is with this humbling sense of purpose that I write to you today. In FY 2024-25, the Adani Group delivered yet another year of significant growth. Growth built on the bedrock of your unwavering trust, and a belief in the long arc of transformation. And we have not grown in calm seas. We have grown in the middle of global turbulence.

Over 60 nations have gone to the polls, redrawing maps, rewriting alliances. Conflicts in the Middle East have disrupted energy flows and logistics corridors. Europe, once an economic stronghold, now grapples with stagnation and a search for identity in a fractured world.

In the midst of all this, our country stood apart.

While prudence elsewhere buckled under pressure, India surged forward as a beacon of stability, of growth amidst uncertainty and of confidence amidst confusion.

Yes, we have the wind at our back, a demographic dividend, a booming digital economy and infrastructure built at record pace. But make no mistake, this momentum did not happen by chance.

It is the result of vision. Of intent. Of policy with purpose. I say this with full conviction that the Indian Government, both at the Centre and across the states, has laid down the foundation for a truly historic

transformation. A transformation not of a few, but for an entire nation rising with ambition that declares - India's best chapters are just beginning. And together, we are not just witnessing history. We are helping shape it.

As a youngster, I saw my mother as my guiding star. I recall her often saying:

"ભારતીય સામ્રાજ્યોનું ભાગ્ય તેઓએ રચ્યું ન હતું જેઓ ક્યારેય પતન પામ્યા નહીં, પણ તેઓએ રચ્યું હતું જેઓ દરેક પતન પછી વધુ શક્તિશાળી અને અખંડ સંકલ્પ સાથે ફરી ઊભા રહ્યાં."

Translated, it meant, "The future of India's empires was not written by those who never accepted defeat, but by those brave hearts who turned every fall into a stepping stone - and each time rose again with stronger resolve to change history."

She would often tell me:

"Gautam, history does not remember sailors who sailed in calm waters; it remembers those who braved the wildest storms and still returned home."

And my dear shareholders, that is exactly what we have done.

Even in the face of fierce headwinds and relentless scrutiny – we have never retreated. Instead – we have recalibrated. We have reimagined. And we have become – more formidable, more unbreakable, more stronger and more resilient!

People often ask me: "How does the Adani Group keep doing it? How do we rise, time and again?"

My answer remains the same: Our conviction is anchored in clarity. Our objectives are aligned with India's ambitions. And our strength comes from the belief that you – our shareholders – place in us.

And all of this was tested last year, when we faced allegations from the US Department of Justice and the SEC relating to Adani Green Energy.

Let me be clear: this was not the first time we have been tested. Nor will it be the last. Every challenge sharpens our resolve. Every setback becomes a stepping stone.

Despite all the noise, the facts are that – no one from the Adani Group has been charged with violating the FCPA or conspiring to obstruct justice. We live in a

world where negativity often echoes louder than truth. But as we cooperate with legal processes, let me also restate - emphatically - our governance is of global standards, and our compliance frameworks are robust and non-negotiable.

And while the numbers tell their own compelling story – in a year of record-breaking revenue, unprecedented growth and historic profitability – the deeper truth is that these milestones are reflections of our relentless strength and tenacity. They are proof of a Group that dares to dream beyond constraints, powered by a nation that breathes possibility into every tomorrow ahead of us.

Let me now talk about a few of the highlights of FY 2024-25. Across all our sectors, we did more than just scale – we created impact, inspired change, and most importantly, deepened our national commitment.

Adani Power crossed 100 billion units of power generation, added 2.3 GW of conventional capacity, funded ₹ 12,000+ crore in capex mainly through internal accruals, and secured a 1,500 MW PPA in Maharashtra. It is now well on track to reach 31 GW capacity by 2030.

Adani Green reached an operational renewable energy capacity of over 14 GW and is on target to build the world's largest renewable energy plant of 30 GW at Khavda and a total of 50 GW of renewables capacity by 2030. Also, with over 5,000 MW of pumped hydro storage targeted to be installed by 2030 and a 40-year 1,250 MW energy storage PPA with UPPCL, we are setting global benchmarks in the space of energy transition.

Adani Energy Solutions had a huge year. It secured ₹ 43,990 crore in transmission orders and executing ₹ 13,600 crore worth of smart metering projects. It retained its no. 1 DISCOM rank in India and became the only private player with three national HVDC grid links in its portfolio.

Adani New Industries is aligned with the nation's sustainability goals and has an order book for construction of a 300 MW electrolyser plant. It also launched an electrolyser testing lab at Mundra. It is on track to expand its solar module manufacturing lines and will have a 10 GW integrated solar module manufacturing facility in place by the next financial year.

Adani Ports continued to strengthen its value proposition as an Integrated Transport Utility with unparalleled waterfront to customer gate capabilities. Adani Ports handled an all-time high cargo volume of

450 MMT and achieved a 27% market share in India. Adani Ports also continued to strengthen its logistics network within the Indian hinterland across its diverse range of assets including rakes, multi-modal logistics parks, warehouses, agri silos and trucks, in addition to starting freight forwarding services and a trucking management platform. Adani Ports' marine division also completed the successful acquisition of Astro Offshore during the year and is set to deliver 3x growth by FY 2026-27.

Adani Natural Resources too had a very strong year contributing to India's energy independence. It produced a record 47 million tonnes of coal and iron ore and is on track to achieve over 30% growth by FY 2025-26. We also pioneered India's first hydrogen-powered mining truck as well as launched an e-commerce platform that will soon enable online trading of LPG, rock phosphate, copper and precious metals.

Also, in line with the Atmanirbhar Bharat vision, Kutch Copper has successfully produced its first copper anode at Mundra thereby marking a strategic move in India's capability to meet the surging demand for energy transition materials.

Two and a half years ago, when we acquired Holcim's India cement business, we had made a bold commitment: to double our capacity to 140 MTPA by FY 2027-28. Today, I am proud to share that we have already achieved 72% of that target and crossed the 100 MTPA milestone, becoming the ninth-largest cement company globally.

Adani Airports also had a record year of growth. It launched Aviio – India's first unified airport operations app as well as reinforced its position as the country's fastest-growing airport operator. We handled a record 94 million passengers in FY 2024-25, registering a 7% growth. We also completed the first test flight at the greenfield Navi Mumbai Airport, which will open later this year with an initial passenger capacity of 20 million of what will eventually become a 90 million passenger airport.

When it comes to Adani Defence, we now stand at the dawn of a new era. Our world-class ammunition and missile capabilities in Kanpur is a vision to forge one of South Asia's most formidable complexes. When Operation Sindoor called, we delivered. Our surveillance drones became the eyes in the skies, our kamikaze drones became the swift swords of attack, and our anti-drone systems became the shield to help protect our forces and citizens. Every innovation we make and every system we build is a salute to

the courage of our Armed Forces. This is the spirit of Atmanirbharta. This is the future we are grateful to have an opportunity to help build.

And the same applies to building Data Centers that India needs to stay competitive in the technology space. With the surge in AI, AdaniConneX is scaling fast. We have projects exceeding 210 MW in various stages of construction in partnership with the global hyperscalers and have launched a giga-scale renewable-powered data center campus in Navi Mumbai.

Continuing the path of sustainability, Adani Total Gas is playing a defining role in India's clean energy transition. As of this year, we serve close to 1 million PNG customers and operate 647 CNG stations. Our roadmap is to double both by 2030. Our e-mobility footprint now spans 22 states and 4 union territories, with over 3,400 EV charging points installed, thereby positioning us at the forefront of India's evolving sustainable energy ecosystem.

But perhaps our most transformative project is unfolding in Dharavi - Asia's largest slum, now being reimaged as India's most ambitious urban rehabilitation project. Over 1 million people will move from narrow lanes to sunlit, modern homes. Inspired by Singapore's housing model and co-designed with global experts, the township will feature spacious layouts, dual toilets, open spaces, schools, hospitals, transit hubs and parks.

Our Dharavi Social Mission is uplifting youth through skilling, healthcare and employment programmes. A new multi-modal mobility hub, amphitheatre, cloud kitchens and riverfront are being planned to serve all of Mumbai.

In terms of consolidated numbers, at the Group level, revenues grew by 7%, EBITDA by 8.2%, and our Net Debt-to-EBITDA ratio remained healthy at 2.6x.

But, as I have stated in the past, our objective is not to just build businesses – it is to create new possibilities. Not just to serve markets – but to serve our nation's destiny. And in this context, our capital investment across businesses is set to break all records. We anticipate an annual CAPEX spend of USD 15-20 billion for the next 5 years. These are not just investments in our Group, but investments in the possibilities for doing our part to build India's infrastructure.

Before I start wrapping up, let me outline some of the programmes that have me the most excited about.

Exactly three years ago, on my 60th birthday, my family pledged ₹ 60,000 crore to redefine healthcare, education, and skill development in India.

The Adani Healthcare Temples are our first major step – world-class, affordable 1,000-bed campuses in Ahmedabad and Mumbai with medical colleges, research centres and wellness spaces all integrated together. Mayo Clinic is our partner in guiding us to create a future-ready, AI-powered, patient-first healthcare ecosystem.

In parallel, we have committed ₹ 2,000 crore to build a world-class skill university and finishing school in Mundra, designed to empower youth from across India. Through Schools of Excellence, global certifications and partnerships with leaders like ITEES Singapore and IGCC, we aim to create an industry-ready workforce. This is more than philanthropy – it is our promise to India because we believe that we are building not just institutions, but legacies of transformation.

And finally, let me end by talking about our participation at the Maha Kumbh Mela. Over 650 million people came together, not as strangers, but as one soul. One purpose. One heartbeat. Along with ISKCON, the Adani Group initiated the Mahaprasad Seva, offering free meals to lakhs of devotees. More than 5,000 of our employees volunteered wholeheartedly, reflecting the values we cherish.

With my family, I had the honour of performing the sacred Ganga Aarti at the Triveni Sangam – and for the Adani Group to be part of this was one of the most moving days of my life. For me, the Maha Kumbh is not just a festival. It is India's soul on display – a living testimony to our resilience, our unity and our unwavering faith. And we were grateful to have had the opportunity to perform seva at this year's Maha Kumbh.

Let me conclude by saying that history should remember us not for the size of our balance sheet, but for the strength of our backbone. Not just for the markets we entered, but for the storms we handled and emerged stronger. For it is easy to lead in sunshine, but true leadership is forged in the face of crisis.

Strength is not just power – it is purpose, clarity and the will to rise. And resilience is not endurance alone – it is reinvention in the face of adversity. When combined, it helps us do our part for building an India that refuses to bend, refuses to break and never stops believing in its own future.

That is our truth. That is our legacy. That is our promise.

The greatest chapters of our story are still ahead. Thank you for being on this journey with us.

Jai Hind.

MESSAGE FROM
THE MD

At Adani Electricity
Mumbai Limited,
our vision is to set
new benchmarks
in the power
distribution sector.

- KANDARP PATEL
Managing Director, AEML

Dear Stakeholders,

It is with immense pride that I present our FY 2024-25, Integrated Annual Report. This year has been defined by exceptional progress and resilient performance across all fronts, marking a pivotal chapter in our transformation into a future-ready energy provider. Amidst evolving industry dynamics, we have demonstrated the strength to adapt and the resilience to lead – emerging not just stronger, but more agile and determined than ever.

As we look ahead, our aspirations are anchored in innovation, operational excellence, and a deep commitment to sustainability – enabling us to meet the diverse and growing energy needs of our customers with confidence and purpose.

A Changing Industry Landscape

Globally, strategic shifts are reshaping the energy sector, with renewable energy taking centre stage. In India, this transformation is particularly pronounced, driven by a sharp surge in energy demand aligned with robust economic growth. These developments are redefining industry paradigms and accelerating the emergence of alternative energy sources such as green hydrogen, geothermal energy, ocean energy, and smart grids. As the sector evolves, the need for high reliability becomes increasingly critical – amplifying both the complexity and competitive intensity of the energy ecosystem.

Within this context, one of the most compelling symbols of India's energy transition is its power distribution network. In Mumbai – the financial capital of India – energy consumption grew by 8% year-on-year, with peak demand for AEML surpassing 2,300 MW multiple times during the year. AEML stands as a dynamic utility, not only committed to meeting rising demand but also to modernising through digitalisation and customer-centric innovation. As a frontrunner in the nation's transition to renewable energy, AEML is setting new benchmarks for what the future of power distribution can and should be.

The mantra “Question everything” became the catalyst for deep transformation. This cultural shift enabled us to reimagine operations and embrace innovation. This shift has earned us the Top Utility Award from the Government of India.

A Culture of Transformation

We have instilled a mindset of excellence in our workforce, igniting aspiration and purposeful change. Conventional thinking has been replaced by a progressive, action-driven approach: ‘status quo’ gave way to ‘speed’; ‘experience’ blended seamlessly with ‘youth and agility’; ‘control’ evolved into ‘empowerment’; and traditional ‘hierarchies’ transitioned into collaborative teams.

The mantra “Question everything” became the catalyst for deep transformation. This cultural shift enabled us to reimagine operations and embrace innovation. This shift has earned us the Top Utility Award from the Government of India for three consecutive years and has also placed the consumer at the heart of our strategy – laying the groundwork for true customer centricity.

Enhancing Reliability

At Adani Electricity Mumbai Limited, our vision is to set new benchmarks in the power distribution sector. We are advancing this ambition through the adoption of cutting-edge technologies, cost optimisation, integration of clean energy, a long-term capital expenditure plan, and an unwavering focus on customer experience.

Consequently, our annual energy sales reached 10,554 MU, reflecting a 6% increase over

FY 2023-24, driven by disciplined execution and strong operational control. During the year, we achieved our highest reliability metrics to date. Capital investments strengthened network resilience, reduced faults, and improved structural integrity. The Average System Availability Index remained above target, while SAIDI and SAIFI were recorded at 21.27 minutes and 0.67 interruptions per consumer respectively.

Our process improvements – graduation from preventive to predictive maintenance, optimised maintenance frequency, risk mitigation through technology, and clarity-driven outsourcing via K-factor PLPBC – have elevated us among the country's top utilities. We underlined our progress in focussed planning, operational rigour, and responsible innovation, thereby contributing meaningfully to the sector and supporting national priorities through ethical, long-term action

Digital-First Operations

Our focus on reliability is matched by a deep emphasis on digital enablement. A major milestone was achieved with the launch of India's first Advanced Distribution Management System (ADMS), designed to reduce power disruptions and minimise restoration time. This system strengthens our digital operating model and enables proactive response in a dynamic environment.

Further, we introduced an intelligent chatbot and India's first virtual customer care centre, providing seamless interaction via calls and SMS. We expanded service access through mobile vans and self-service kiosks, resulting in improved collection efficiency and around 84% adoption of digital transactions.

Elevating Customer Experience

AEML's advanced CRM platform offers a unified interface for all customer interactions. It enables a 360-degree view of customer history, preferences, and service needs – ensuring faster and more personalised support. Integrated in real-time

with SAP, Chatbot, GIS, Power BI, and social media platforms, the CRM facilitates quicker query resolution, customised notifications, and region-specific communication, including festive offers. Features such as appointment scheduling and lead tracking enhance proactive service delivery, while dynamic dashboards support intelligent decision-making.

We further strengthened this ecosystem using data lake and AI-driven analytical tools. Our predictive models identify potential high-consumption bills and electricity theft in advance, while our demand forecasting model delivers day-ahead predictions with 97.5% accuracy – contributing to optimised power procurement and improved tariffs for consumers.

Combined with our green power offerings and ongoing rollout of smart meters, consumers are now empowered to manage their electricity usage more effectively, improving demand-side efficiency. These advancements reflect the consistent, cross-functional efforts of our teams, who were honoured with Gold Awards at both the NCQC and CCQC forums for quality and excellence. Our commitment to consumers was honoured by the Consumer Service Rating of DISCOMs (CSRD) an A+ Grade.

Strategic Planning & Governance

Power distribution is a capital-intensive, regulated business. AEML is committed to enhancing profitability while maintaining a lean balance sheet. The Company has achieved financial closure for all capital investments planned through 2030 – ensuring long-term visibility essential for a large public utility. AEML remains the only Indian DISCOM consistently rated Investment Grade by global credit rating agencies. Our sustainable growth is embedded in sound capital management, with a ₹ 1,753 crore capex fully funded through internal accruals.

Sustainability remains central to our strategy and operations, reflecting our commitment to Environmental, Social, and Governance (ESG) priorities. In FY 2024-25, we maintained a zero-fatality safety record and grew our renewable energy share to 35.2%, accompanied by a 69.7% reduction in emissions compared to baseline of FY 2018-19.

We expanded operations without increasing our working capital loan but continued to repay loans. Collection efficiency stood strong at 101%, including prompt payment incentives. The Regulatory Asset Base (RAB) increased by 12.5% to ₹ 9,549 crore, fully funded by internal cash flows – underscoring our capital efficiency and disciplined financial stewardship. Our self-sustaining model, underpinned by a forward-looking capital strategy, continues to create long-term value for stakeholders.

Advancing Sustainability

Sustainability remains central to our strategy and operations, reflecting our commitment to Environmental, Social, and Governance (ESG) priorities. In FY 2024-25, we maintained a zero-fatality safety record and grew our renewable energy share to 35.2%, accompanied by a 69.7% reduction in emissions compared to baseline of FY 2018-19.

This shift has been supported by the adoption of cleaner technologies and responsible practices. We achieved certifications across 10 management systems and aligned our operations with global benchmarks, including targets for eliminating single-use plastics and achieving zero waste to landfill. Digital tools have further strengthened our sustainability goals. We applied AI and machine learning to issue customised bills printed on recycled paper. Additionally, we launched an in-house innovation platform to nurture employee-led ideas and unlock internal value.

Outlook: Clarity, Consistency & Courage

AEML is evolving into a benchmark utility in India, with a clear aspiration to extend its footprint globally. Our future priorities include providing tailored customer solutions, accelerating digital adoption, and reinforcing network reliability. These efforts prepare us to navigate sectoral challenges while driving inclusive, sustainable growth. We remain confident in our ability to adapt and lead with strength and resilience. Our unwavering commitment is to act with integrity, build robustness across our value chain, and create a lasting, sustainable impact.

Warm regards,

Kandarp Patel
Managing Director, AEML

LETTER FROM THE
HEAD OF BUSINESS

Our robust infrastructure continues to be trusted by consumers and other operators, reinforcing our pivotal role in Mumbai's power ecosystem.

- RAMESH SHARMA
Head of Business, AEML

Dear Stakeholders,

We continued our journey to become a global benchmark utility. This progress is anchored in digital transformation, operational excellence, customer centricity, and sustainability. Our efforts were recognised with an A+ Grade for outstanding customer service by the Consumer Service Rating of DISCOMs (CSRD) conducted by Rural Electrification Corporation. In addition, the Ministry of Power once again ranked Adani Electricity Mumbai Limited (AEML) as the number one utility in India – affirming our delivery standards and stakeholder commitment.

We are integrating digital intelligence across all facets of our operations to provide smarter, faster, and more dependable energy solutions. Our digital-first strategy is reshaping utility efficiency and elevating customer experience through automation, advanced analytics, and AI-driven innovation. In a city as demanding as Mumbai, we upheld exceptional performance standards. We achieved 99.996% grid uptime and maintained one of the lowest distribution losses in the country at 4.83%. Our robust infrastructure continues to be trusted by consumers and other operators, reinforcing our pivotal role in Mumbai's power ecosystem. Operational momentum was supported by a 9% increase in total energy sales, which contributed to revenues of ₹ 12,010 crore and EBITDA of ₹ 2,567 crore in FY 2024-25. Our strong fundamentals were further validated through a CRISIL AA+/Stable credit rating reaffirmation.

Building on this strong foundation, we advanced our digital-first strategy to improve customer access and operational intelligence. Key interventions included the launch of the world's first Virtual Contact Centre that enabled seamless customer interaction, supported by the expansion of self-service kiosks (Genius Pay) and increased usage of our AI-powered chatbot, Elektra. Our digital payment ecosystem matured significantly, with around 84% of payments processed online during the year. Simultaneously, the rollout of Smart Meters provided real-time visibility, and facilitated remote service access – giving consumers greater control over their energy usage. This digital layer, powered by the Advanced Distribution Management System (ADMS) has brought agility, reliability, and intelligence to Mumbai's power grid.

In parallel, we strengthened our commercial backbone to support these digital experiences and enhance service delivery end-to-end. We are digitising every stage of the customer journey – from onboarding to billing, payments, and service support – to deliver faster, more reliable outcomes. Internally, we implemented the KRONOS platform, integrated with our Work Management System, to improve

workforce productivity. We also launched a Business Process Re-engineering (BPR) programme aimed at eliminating non-value-adding tasks, with a clear target of 35% process optimisation through automation. These advancements are building a leaner, more responsive organisation capable of meeting the evolving expectations of our customers.

Our social responsibility is matched by our investment in people – the foundation of our performance and culture. We welcomed 19 Young Professionals into the organisation, reflecting our investment in future talent. Additionally, we scaled up digital HR systems to create a more agile, data-driven workforce. These initiatives received global and national recognition. AEML won the Gold Award at the Brandon Hall HR Excellence Awards 2024 in Florida, USA, and was also recognised with the Gold for Best Learning Culture by ET HRWorld (The Economic Times) under the Large-Scale Enterprises category. Our safety-first culture was recognised at the OSH India Awards, where we were honoured for "Excellence in Occupational Health & Safety Management System".

Beyond operations, we extended our impact into the communities we serve. With the Adani Foundation, we scaled up initiatives in healthcare, education, and skill development – from organising health camps and supporting schools to enabling vocational training. Our aim is to drive long-term social development and enable sustainable livelihoods.

Our internal controls, risk frameworks, and Board oversight systems support accountability, transparency, and ethical conduct across the business. These foundations are reinforced through regular employee training and integrated policies that help build lasting stakeholder trust.

Our focus remains on consolidating our leadership as India's best utility and setting new benchmarks globally. Looking ahead, we will continue to scale automation, apply smart AI use cases, and deepen our commitment to a green, digitally empowered future – delivering sustained value to all stakeholders.

I would like to acknowledge the trust and continued support of our stakeholders, and the dedication of our people who drive this journey every day. Together, we are well-positioned to achieve our goals and contribute meaningfully to the future of energy delivery.

Warm regards,

Ramesh Sharma
Head of Business, AEML

LETTER FROM THE
CHIEF FINANCIAL
OFFICER

Our financial performance in FY 2024-25 reflects the depth and resilience of our business model. Revenue grew 18% y-o-y to ₹ 12,010 crore, driven by strong energy demand and the reliability of our supply network.

- KUNJAL MEHTA
Chief Financial Officer

Dear Stakeholders,

The strength of our business model reflected strongly during FY 2024-25, anchored in discipline and foresight. It demonstrated our operational excellence, digital leadership, and financial prudence converge to drive long-term value. Our efficiency was reflected in enhanced reliability, improvement in distribution loss, higher collection efficiency supported by rising digital penetration. Capital investments during the year were fully supported by internal cash flows – underscoring the strength of a self-sustaining model built on financial prudence and operating rigour. In recognition of this all-round performance, Adani Electricity Mumbai Limited was once again ranked India's No. 1 utility by the Ministry of Power in the 13th Integrated Rating of DISCOMs.

Our financial performance in FY 2024-25 reflects the depth and resilience of our business model. Revenue grew 18% y-o-y to ₹ 12,010 crore, driven by strong energy demand and the reliability of our supply network. This topline growth translated into an EBITDA of ₹ 2,567 crore, with operating EBITDA rising 7% to ₹ 2,353 crore – demonstrating disciplined cost control alongside high service quality. Net profit increased to ₹ 953 crore, excluding the one-time accounting impact of the Dahanu divestment. The resulting liquidity has further strengthened our ability to reinvest into growth without increasing the leverage levels.

Our disciplined operations accentuate these results. We reduced distribution loss to 4.83% – our lowest ever after 5.29% in FY 2023-24 – and sustained 101.03% collection efficiency, reinforcing the effectiveness of our on-ground execution. At the same time, digital payments rose to 83.3% of total collections, reflecting the success of our digital-first service strategy. Our robust 99.99% supply reliability, coupled with a steadily rising share of renewables in our energy mix, positions us as a consistent performer and a future-ready utility aligned with evolving consumer and climate priorities.

The year also marked a step-up in capital deployment, with ₹ 1,753 crore invested across our asset base – up 32% from last year. This round of capex was entirely funded through internal accruals – demonstrating a self-sustaining growth model that strengthens the balance sheet while expanding the regulated asset base (RAB). As we continue to scale, this organic approach reinforces our commitment to capital efficiency and long-term value creation.

Our disciplined operations accentuate these results. We reduced distribution loss to 4.83% – our lowest ever after 5.29% in FY 2023-24 – and sustained 101.03% collection efficiency, reinforcing the effectiveness of our on-ground execution.

We remain focussed on preserving our investment-grade rating profile through proactive balance sheet management. We continued to generate healthy free cash flows and follow a disciplined deleveraging path. Our gross debt stood at ₹ 12,486 crore at the end of FY 2024-25, reflecting a reduction over the previous year. In November 2024, all three international credit rating agencies – Fitch, Moody's, and S&P – affirmed the ratings on our US dollar senior secured notes, though the outlook was revised to negative considering external developments. In March 2025, Fitch reaffirmed our 'BBB-' rating and removed Adani Electricity Mumbai Limited from Rating Watch Negative – recognising the resilience of our business fundamentals and financial structure.

The strong financial performance delivered during the year have further reinforced our balance sheet and ensured adequate liquidity for future investments. In FY 2025-26, we will continue to meet our capital expenditure commitments through internal accruals and utilise this momentum to further deleverage. Our self-sustaining model, supported by a forward-looking capital management approach, continues to enable long-term value creation for all stakeholders.

Warm regards,

Kunjal Mehta
Chief Financial Officer

About Adani Electricity Mumbai

Redefining power distribution with customer-centricity

Adani Electricity Mumbai Limited (AEML), a part of the diversified Adani Group and a subsidiary of Adani Energy Solutions Limited, is one of India's leading integrated power utilities.

The Company operates across transmission, and distribution in Mumbai and its suburbs. With a highly efficient network and 99.996% reliability – among the highest in the country – AEML meets the city's power demand while offering competitive tariffs and customer-centric services enabled by advanced technologies.

AEML is committed to building a cleaner and greener environment through initiatives such as Green Tariffs and a targeted 60% renewable energy share by FY 2026-27. It also aims to reduce GHG emissions intensity by 60% by FY 2028-29 (baseline FY 2018-19). Supporting sustainable lifestyles, the Company is expanding public EV charging infrastructure across Mumbai. Its customer-centric approach is enabled through smart technologies like Smart Meters and the Adani Electricity Mobile App, which empower users to monitor and manage their energy consumption digitally and efficiently.

Vision

To be a world-class leader in businesses that enrich lives and contribute to the nation in building infrastructure through sustainable value creation.

Our mission

Adani Electricity has a long-term vision and strategy to provide Mumbai's consumers with electricity tariff stability and visibility by scaling renewable energy supply.

Our ethos

The power of service. It is born of the will to make a difference and change things for the better so that everyone can power their dreams and live a stress-free life.

Our values

Courage
We shall embrace new ideas and businesses

Trust
We shall believe in our employees and other stakeholders

Commitment
We shall stand by our promises and standards of business

Our culture

Passion
Performing with enthusiasm and energy

Results
Achieving goals consistently

Integration
Working across functions and businesses to create synergy

Dedication
Working with commitment in the pursuit of our aim

Geographic footprint

Powering India's financial capital

What differentiates us

A future-ready utility with scalability and long-term potential

As Mumbai's primary and most preferred electricity supplier, we are building a platform with the scale, reliability and agility to meet rising energy demand, drive sustainable value, and deliver customer-centric innovation. Our investments in infrastructure, people, and technology have established us as a future-ready utility with strong long-term potential.

Well-positioned to tap rising power demand

We serve a vast majority of Mumbai's geography and population, making us the city's leading power distributor. With the city witnessing an 8% rise in power demand in FY 2024-25, we are scaling our capacity and infrastructure to meet future growth. We are ranked India's No. 1 power utility for the third consecutive year by the Ministry of Power, reflecting our commitment to operational excellence and customer satisfaction.

We are investing in a state-of-the-art distribution network and accelerating the rollout of smart meters. As Mumbai's demand grows, our strategy includes expanding our reach beyond 4 million customers, supported by a strong customer acquisition campaign. We operate in a dynamic regulatory and technological landscape and remain fully compliant with MERC norms to ensure service quality and operational efficiency.

85%

Mumbai's geography served, covering 67% of its population

Proven track record of operational and maintenance excellence

Our performance in FY 2024-25 demonstrates a continued focus on reliability and system integrity. We enhanced supply consistency and reduced distribution losses, with key reliability indicators showing marked improvement and fewer service interruptions.

We continue to adopt advanced technologies such as our ADMS platform, RPA tools, and AI-powered systems to optimise workflows and enhance service delivery. Our GPS-enabled digitisation, automated outage management, and Work and Transport Management Systems have transformed operational efficiency. With robust N-1 redundancy, a modernised high-tension network, and remote-control capabilities via SCADA, we ensure high availability and quick fault resolution.

99.996%

Supply reliability delivered with reduced distribution losses to 4.83%

Customer-centric by design

Our customer-first philosophy underpins every aspect of our service. Through initiatives like the Sampark Programme, we foster meaningful engagement with both B2B and B2C customers. Senior leaders meet with key customers quarterly, while managers conduct direct interactions and listen to customer service calls to identify and resolve recurring issues.

We have deployed digital tools including our AI chatbot 'Elektra', self-help kiosks, and a virtual customer care centre to enhance accessibility and responsiveness. Feedback is continuously analysed and incorporated into UI/UX upgrades and service enhancements.

20%

Year on year revenue growth registered in FY 2024-25, driven by higher energy consumption

Financially stable with long-term revenue visibility

We continue to deliver a resilient financial performance, supported by a regulatory asset base of ₹ 9,549 crore. Our improved cash and cash equivalents to ₹ 1,323 crore, underscoring disciplined cost management and operational efficiency. Collection efficiency remained robust at over 101%. This contributed to our strong revenue of ₹ 12,010 crore in FY 2024-25, marking a 20% increase over in FY 2023-24.

Our power procurement strategy is designed for cost-effectiveness and reliability through a mix of long- and short-term contracts. Investments in analytics, automation, and smart systems will further drive operational gains and long-term revenue generation.

35.20%

Energy mix sourced from renewables

Excellence in sustainable practices

During FY 2024-25, we have reduced 69.71% GHG emission intensity compared to our base line FY 2018-19. Our goal is to achieve a 60% renewable mix by FY 2028-29.

We are embedding circular economy principles by improving resource efficiency and repurposing waste. Initiatives like smart meter deployment and the ADMS platform support decarbonisation and align with national sustainability goals. From using recycled paper for personalised bills to minimising air pollutants through cleaner energy, we are committed to shaping a greener, more resilient future for Mumbai.

Digital excellence

Technology that transforms distribution and elevates experiences

We are embedding digital intelligence across our operations to deliver smarter, faster, and more reliable energy solutions. Our digital-first approach is transforming operational performance and customer experience through automation, advanced analytics, and AI-led innovations. These tools enable real-time insights, improve operational agility, and support seamless, technology-enabled interactions that align with the expectations of a modern, connected Mumbai.

Network Operations Centre (NOC) with ADMS and SCADA

We have transformed our distribution network management by deploying the ADMS integrated with SCADA. This empowers our NOC with real-time monitoring, predictive analytics, and rapid outage response, significantly enhancing reliability and system resilience across Mumbai.

Key highlights

- Comprehensive network visibility across the city via a centralised NOC
- N-1 redundancy built into 11 kV, 22 kV, and 33 kV high-tension networks
- Dual transformers at substations to ensure alternate supply routes
- Remote-operable systems for swift supply restoration and high availability

Work Management System (WMS)

Our WMS drives operational efficiency by digitising workflows, optimising resource utilisation, and improving time management. Integrated with KRONOS, the system strengthens workforce planning and enables data-driven decision-making across field operations. This effort has maximised process automation and increased governance effectiveness across our field operations.

35%

Elimination of non-value-added activities has been achieved through Business Process Re-engineering

Transportation Management System (TMS)

We have strengthened our logistics through a smart TMS. This system streamlines vehicle operations for strategic raids and efficient meter transport by analysing requirements, optimising routes, scheduling vehicles, and tracking the fleet. TMS also incorporates mobility solutions, geotagging, and geo-fencing capabilities to monitor field performance in real time, enabling end-to-end integration and seamless routing.

Smart Metering Ecosystem

We have rolled out a smart metering ecosystem that empowers consumers to manage their energy use with greater transparency. Features such as real-time meter readings, prepaid functionality, and remote connection/disconnection allow for greater convenience and responsiveness. These smart meters improve customer interactions and help in reducing turnaround times and operational inefficiencies.

SAP Ariba and Master Data Governance (MDG)

We have implemented SAP Ariba and MDG to streamline procurement and enhance supply chain efficiency. SAP Ariba enables centralised procurement and improved supplier relationship management with greater transparency and process control. MDG ensures data consistency and accuracy across systems, mitigating risks and enabling spend visibility. Together, these tools support robust procurement planning, supplier performance tracking, and informed decision-making.

Automation and intelligent operations

Our continued effort to drive automation across business resulted in improved accuracy, reduced manual intervention, and faster decision-making. We focus on building intelligent systems that leverage data and technology to optimise operations and deliver measurable outcomes across functions.

Robotic process automation (RPA)

We have implemented RPA across key back-office functions to streamline repetitive, rule-based processes. RPA enhances speed, reduces errors, and improves turnaround times. It is currently deployed across billing, reconciliation, customer communications, vendor payments, and compliance reporting. These bots operate 24/7, ensuring consistent execution while freeing up employees to focus on more value-added tasks.

61

Process automated till now (41 in FY 2024-25)

Visualisation tools – Power BI and SAP Business Objects (BO)

To strengthen data-driven decision-making, we use Microsoft Power BI and SAP BO for real-time visualisation and reporting. These tools enable users to create custom dashboards, track KPIs, and generate actionable insights across functions. Self-service analytics and dynamic reporting allow teams to identify trends, improve performance, and support strategic planning and risk management.

Our continued effort to drive automation across business resulted in improved accuracy, reduced manual intervention, and faster decision-making.

Data Lake

Our Data Lake integrates structured and unstructured data from smart meters, ADMS, customer service platforms, and supply chain systems. It acts as a centralised data repository, enabling predictive analytics, automated reporting, and intelligent decision-making. This unified data foundation enhances governance, supports compliance, and improves responsiveness across the organisation.

Technology that delights consumers

Customer satisfaction drives our digitalisation strategy. We continue to enhance service quality, accessibility, and convenience through tech-enabled, consumer-facing platforms. From self-care tools on our website and app to the well-received Video Contact Centre, we are making service experiences more seamless, reliable, and engaging for every customer interaction.

Virtual contact centre

We launched Mumbai's first Virtual Contact Centre to transform customer service delivery. It enables customers to connect with representatives from their homes while preserving the efficiency of face-to-face interactions. The platform supports tele-calling, SMS broadcasts, and regional outreach for more personalised support.

Key features:

Our Virtual Contact Centre enhances customer experience through face-to-face video interactions, enabling clear communication via facial expressions and gestures. Features like screen sharing, whiteboard tools, and sign language or remote translators ensure real-time, inclusive support. With analytics-driven insights and a first-time resolution rate of 92%, the platform enables personalised, accessible service –

eliminating the need to visit physical offices. Over 1.3 lakh calls are handled annually, with customers able to schedule calls at their convenience.

Elektra – AI-powered chatbot

Elektra, our 24/7 AI chatbot, offers users a conversational interface to raise service requests, access account details, and make payments. Integrated with our CRM, it ensures quick, consistent resolutions.

Genius Pay – self-service payment kiosk

Genius Pay, our self-service kiosk, simplifies digital payments. Deployed across the city and supported by mobile vans, it helped drive 83.34% digital adoption.

Customer Relationship Management

We implemented SAP Sales Cloud CRM to achieve a 360-degree customer view by integrating data from MS Dynamics CRM and platforms like SAP, AVAYA, Outlook, social media, GIS, Chatbot, OMS, and Power BI. This enhances personalised communication, service responsiveness, and cross-functional collaboration through intelligent scheduling, marketing automation, and a unified customer interface.

Key capabilities

- Case and interaction management
- Lead and opportunity management
- GIS-based mobility solutions for the sales team
- Appointment scheduling and campaign management
- Location-based and festive-based targeting
- Robust reporting dashboards and advanced analytics
- 360-degree customer view with access to complete service history and past interactions
- Analytics and reporting tools for faster execution and better lead conversion
- Personalised campaigns based on customer preferences and behavioural insights
- Location- and festive-based targeting for more relevant communication
- Cross-department collaboration enabling better outage updates, payment reminders, and service coordination
- Advanced network planning for high-demand areas, ensuring regulatory alignment and future readiness

Operational excellence

Smart, secure and seamless power distribution

Our approach to operational excellence is anchored in system reliability, process discipline, and technology integration. Our focus remains on strengthening core distribution infrastructure, enhancing service responsiveness, and ensuring the security and efficiency of power delivery. Through structured interventions across the distribution value chain, we are building a resilient, data-driven, and service-oriented utility framework. The objective is to ensure uninterrupted, high-quality electricity supply while optimising operational costs and improving consumer outcomes.

Commercial management

We continue to strengthen our commercial operations through technology integration, digital-first processes, and a sharp focus on customer-centricity. Our approach ensures faster, more reliable, and seamless service delivery across the customer lifecycle.

Digitised customer lifecycle management

We have built an end-to-end, technology-enabled service model – from onboarding to billing, payments, and customer service.

Performance highlights

Rating in Consumer Service
Rating of DISCOMs

Score

99.8/100

Top Rank among DISCOMs in the
Ministry of Power's Integrated Ratings

Onboarding

The new connection process was redesigned for speed and ease, enhancing the customer experience.

Billing

Smart meters and Advanced Metering Infrastructure (AMI) now support accurate, real-time billing. This has eliminated estimation errors and improved transparency. AMI also enables remote monitoring, cost reduction, and better load management.

Customer service

We offer a robust, multi-channel service suite – including a mobile app, website, chatbot, WhatsApp, IVR (19122), missed call service, social media, and India's first video contact centre – to ensure 24x7 customer access and personalised support. Being enabled by advanced CRM, the ecosystem delivers faster resolutions to customer complaints. This translated into 17% y-o-y drop in commercial complaints.

Payments

Over 83.34% of customers paid digitally during the year. Self-help kiosks at key locations enhance convenience, and we are driving 100% digital payments and paperless billing. AEML introduced self-help and mobile kiosks to offer customers a quick, convenient way to pay bills without human intervention. Strategically placed across locations, these kiosks reduce wait times and empower users to manage payments on their terms – enhancing overall service experience.

Sales and Consumer Distribution Analysis

The attached chart provides a detailed breakdown of our sales and consumer distribution, highlighting the significant contribution of the Commercial & Industrial category. Approximately 50% of total sales are driven by this category, which constitutes 18% of our total consumer base. The consumer composition is segmented as follows: 17% Residential, 52% Commercial, and 31% Industrial. In contrast, the sales composition (measured in MUs) is distributed with 33% Residential, 52% Commercial, and 15% Industrial. This analysis underscores the pivotal role of the Commercial sector in our revenue generation, despite its relatively smaller share of the consumer base.

~50% of the sales

Contributed by Commercial & Industrial category that is 18% of our total consumer's base

CASE STUDY

Enhancing Customer Engagement with (C4C) Implementation

Context

Before implementing SAP Cloud for Customer (C4C) Advanced CRM, our agents faced significant challenges navigating between multiple disparate systems during live calls. This fragmented workflow not only increased call handling times but also hindered First Call Resolution (FCR). Agents lacked a comprehensive, 360-degree view of the customer journey, often resulting in a disjointed service experience where customers were forced to repeat information multiple times. The key driver for change was the urgent need to equip our agents with a single, unified platform that would enable seamless, fully informed, and efficient interactions – all from one consolidated screen.

Action

We successfully transitioned from our legacy systems to SAP Cloud for Customer (C4C), an integrated CRM solution that centralises sales, service, and communication functions. The migration involved meticulous data transfer and full integration of core workflows, including sales processes, service

management, and email correspondence. Notably, we integrated Avaya telephony directly into the platform for our call centre agents, enabling streamlined call handling and automated order creation workflows triggered via email and other channels.

Impact

The adoption of SAP C4C has transformed our operational capabilities and strategic decision-making. Agents now benefit from a unified, 360-degree customer view that significantly reduces average handling times and improves service effectiveness. The single-screen interface, coupled with embedded telephony integration, empowers agents to deliver fast, accurate responses during consumer interactions. Furthermore, this platform has enhanced cross-departmental collaboration, ensuring a consistent and well-informed customer experience at every touchpoint. By leveraging advanced analytics within C4C, we are now driving smarter, data-driven decisions that continuously boost customer satisfaction and operational excellence.

Efficiency and cost management

We have embedded analytics-led oversight to improve system efficiency and resource optimisation. Strong governance in working capital and financial management has helped us moderate cost escalations despite external pricing pressures. Our strategy ensures affordability for customers while preserving financial sustainability.

Outage Management System (OMS)

A transformative step towards operational excellence and customer-first response time. By leveraging asset mapping, heuristic algorithms, and real-time system integration, OMS not only accelerates fault resolution but also ensures transparent and proactive customer communication resulted in improved reliability,

optimised resource utilisation, and enhanced customer trust.

Key Benefits:

- **Smarter Complaint Handling:** Auto-groups complaints by asset, enabling quicker bulk resolution.
- **Customer Transparency:** Real-time SMS and online updates reduce inbound calls and boost satisfaction.
- **Integrated Ecosystem:** Seamless linkage with SAP, WMS, and C4C ensures end-to-end outage visibility.
- **Faster Fault Detection:** Heuristic engine pinpoints probable fault location, cutting tracing time.
- **Crew Efficiency:** Auto-allocates nearest crew, reducing response time during multiple outages.
- **Future-Ready:** Smart meter and LT SCADA integration will automate alerts and outage detection.

CASE STUDY

Watts of Warmth

Inspiring a culture where empathy and exceptional service for customers come first.

We celebrate employees who go the extra mile for customers. It's more than recognition; it's strengthening company culture rooted in compassion and exceeding customer expectations.

So far, 11 impactful stories have been acknowledged.

Network management

We prioritise excellence in managing the infrastructure and systems that ensure reliable power distribution across our EHV, HT, and LT networks. Our approach blends advanced automation, predictive operations, and strong field execution to sustain an uninterrupted power supply – consistently maintaining a distribution reliability rate of over 99.99%.

Scope of Network Management Operations

Our Network Management function covers the end-to-end lifecycle of grid operations, including planning, monitoring, maintenance, budgeting, and coordination with vendors and civic bodies. Real-time control and monitoring are enabled through advanced SCADA integrated with Advanced Distribution Management System (ADMS) and Distribution Management System (DMS), which support **automated switching, fault isolation, and service restoration. Preventive and predictive maintenance**, coupled with integrated opex and capex planning, ensures network performance remains high and cost-efficient.

Safety and Maintenance Practices

Safety and quality remain foundational to our network operations. We continue to **apply Six Sigma, predictive maintenance tools, and**

structured quality assurance systems to enhance grid performance. Our operations are governed by stringent safety protocols and standard operating procedures, with continuous training provided to field teams. This ensures not only technical readiness but also adherence to world-class safety standards.

Customer Service Impact

Improvements in network management have translated into enhanced service delivery for customers. Faster complaint resolution, real-time outage updates, and improved voltage stability have strengthened customer trust and satisfaction. Digital service portals and proactive communication during network events have also supported a more responsive consumer interface.

Operational Improvements During the Year

Several key initiatives undertaken in FY 2024-25 contributed to strengthening network reliability. Maintenance schedules were reviewed and optimised across the LT and HT networks, reducing planned downtime and improving asset performance. Liaisoning processes were streamlined to secure faster Right-of-Way (ROW) permissions from civic authorities, enabling timely execution of network upgrade and expansion projects.

Enhancing efficiency through technical upgradation

- Piloted SF6-free switchgear using dry air/AirPlus, eliminating 45 kg of SF6 – equivalent to 1,057.5 metric tonnes of CO₂e over 100 years
- Developed ultra-compact tower-type substations, reducing footprint by 95% – from 40 sq mt to 2 sq mt
- Introduced 9m pole with cross-arm brackets to replace high mast lights, enhancing space efficiency at congested junctions
- Installed 35 thermography windows on dry-type transformers, reducing downtime by 25% and costs by 30%
- Deployed outage detection system with auto-SMS alerts for improved consumer communication during unplanned outages

Operational Hurdles and Strategic Responses in FY 2024-25

During the year, our network operations faced multiple external and internal challenges. These ranged from disruptions due to civic infrastructure works to legacy system constraints and execution hurdles. Despite these, we acted swiftly and decisively to safeguard network reliability and project timelines.

Challenge	Mitigation Measure
Frequent cable faults due to CC road works	Aligned cable upgrades with civic schedules; reinforced protection during reinstatement
Ageing infrastructure leading to breakdowns	Accelerated asset replacement in high-risk zones Prioritised capex investment in Network rejuvenation
High reinstatement costs	Phased excavation and optimised coordination with BMC to reduce repeat work
Requirement of skilled vendors	Expanded vendor base and initiated quality-focussed capacity building

Outlook FY 2025-26

Looking ahead, we aim to further enhance our network's intelligence, resilience, and scalability. AI and ML will be integrated into predictive analytics to improve asset health monitoring and fault forecasting. IoT-based sensors will enable real-time tracking of consumer interruptions, particularly in the LT network, supporting faster and more targeted interventions. Expansion of smart metering infrastructure will support better load management, data accuracy, and remote diagnostics. With our core capabilities in place, we are also exploring opportunities to expand our network into new service geographies.

Enhancing Grid Resilience through ADMS Integration and Network Automation

Context

As Mumbai's power demand grows in complexity and volume, managing the grid with precision and speed has become imperative. Manual intervention during fault events, coupled with urban infrastructure constraints, posed challenges in minimising downtime and ensuring uninterrupted service delivery.

Action

In FY 2024-25, we achieved full-scale implementation of the Advanced Distribution Management System (ADMS), significantly enhancing our ability to monitor, detect, and respond to network conditions in real time. The HT network was progressively automated,

enabling faster fault isolation and remote switching. Simultaneously, we continued with strategic cable upgrades and replacements, synchronising them with civic infrastructure works to reduce surface disruption and optimise resource deployment.

Impact

The automation and integration efforts yielded measurable improvements. During high-voltage fault events, the control system enabled restoration of power to customers within minutes – a clear demonstration of operational readiness. The reduction in manual processes improved response time and reinforced grid stability across our service area.

Centralised vigilance model

AEML has adopted a Centralised Vigilance Team (CVT) model to systematically reduce non-technical losses. By consolidating vigilance operations under a single unit, we ensure focussed interventions, efficient resource allocation, and targeted mitigation in high-loss areas. This shift also reduced reliance on third-party vendors, enabling direct control and sustainable theft prevention.

Theft-proof infrastructure and analytics

We continue to invest in theft-proof infrastructure, including over 140 Theft Prevention Pillars (TPPs), upgraded smart meters, and enhanced transformer capacities. Data analytics and real-time monitoring tools

are used to detect anomalies and prevent unauthorised connections. We are also developing AI-ML tools for faster theft detection, minimising the need for mass raids.

Cluster-based last-mile management

A cluster-based loss management strategy allows us to prioritise and act on high-loss pockets. Accurate last-mile tagging and network mapping help improve loss calculation and drive precise, area-specific interventions.

Impact

AEML achieved one of the lowest distribution losses 4.83% in the country, significantly below the national average and better than what had been targeted.

Rewards and recognition

Recognition endorsing our impact

Ranked as India’s No. 1 Utility for the third consecutive year in the Annual Integrated Rating & Ranking of Power Distribution Utilities for FY 2024-25, conducted under the Ministry of Power with PFC India as the nodal agency (Deloitte as the appointed evaluator)

Recognised with multiple accolades at the Chapter Convention on Quality Concept (CCQC) 2024:

- All 21 participating teams received "Gold" awards
- Secured 6 Gold awards under the "5S @ Home" category
- Honoured with the "Corporate Patronage Excellence Award" for commitment to quality and business excellence through quality initiatives and QC methodology

Awarded the Gold for Best Learning Culture in an organisation under the Large-Scale Enterprises category by ET HRWorld from The Economic Times awards

Celebrated for excellence at the 10th National Conclave on 5S conducted by QCFI in June 2024, with 6 teams winning "Par Excellence" awards and 2 teams receiving "Excellent" awards

Achieved high honours at the National Convention on Quality Concept (NCQC) 2024, receiving 3 "Par Excellence" and 5 "Excellent" awards

Recognised with the Silver-level Certification at Arogya World's Healthy Workplace Awards 2024 for AEML-T&D

Honoured with the Gold Award at the prestigious Brandon Hall HR Excellence Awards 2024 in Florida, USA, marking global recognition for Adani Electricity

STRATEGIC REVIEW

- 60** Business Model
- 62** Stakeholder Engagement
- 66** Enterprise Risk Management
- 68** Strategy
- 72** Key Performance Indicators

Stakeholder engagement

Engaging for shared prosperity

Partners and suppliers

Importance

- Services provided by the business partners and suppliers have a direct and material impact on the efficiency and reliability of our service delivery

Expectations

- Open, transparent and consistent processes
- Willingness to adopt supplier-driven innovation

Type of Engagement

- Vendor Engagement forums
- Specific category and service partner meet
- Supplier Satisfaction Survey
- New supplier portal

Engagement Frequency

- Annually
- Bi-annually
- Quarterly

Approach to Value Creation

- Supplier engagement and development
- Compliance with regulatory/statutory requirements

Value Created for Stakeholders

- To ensure quality and compliance with applicable environmental, social and governance standards
- We engage closely with our suppliers for audits, training and knowledge exchange

Investors and shareholders

Importance

- Shareholders as providers of capital, they are key to our growth and expansion plans

Expectations

- Safe, strong and sustainable financial performance
- Progress on environment, social and governance matters

Type of Engagement

- Quarterly investor discussions
- Annual General Meeting
- Integrated Annual Report
- Annual Sustainability Report

Engagement Frequency

- Annually
- Quarterly

Approach to Value Creation

- Credit rating
- Sustainable business model
- Corporate Governance
- Return on net worth/Earnings per share
- Communication with investors

Value Created for Stakeholders

- We strive to maintain profitability with cost management efforts for better efficiency and sustainable growth

Regulators and policymakers

Importance

- Key for ensuring compliance, interpretation of regulations and uninterrupted operations

Expectations

- Strong capital base and liquidity position
- Robust standard of conduct
- Positive sustainable development, both environmental and social

Type of Engagement

- Continued engagement and representation
- Quarterly and Annual Compliance Reports
- Performance reports shared with the Securities and Exchange
- Workshops
- Panel discussions with nodal industry bodies and industry associations
- Steering Committees

Engagement Frequency

- Annually
- Quarterly

Approach to Value Creation

- Credit rating
- Governance
- Transparency and disclosures
- Investor security
- Representation with regulators
- ESG aspects

Value Created for Stakeholders

- We focus on creating a business-friendly environment that supports overall industry growth

Customers

Importance

- Customer feedback, or as we call it, the Voice of Customer, is key to process improvements, quality enhancement, service performance and cost optimisation

Expectations

- Differentiated service offering
- Digitally-enabled and positive experience

Type of Engagement

- Project feedback through surveys – Operational and mid-level contacts
- Customer experience survey – CXO and senior level contacts
- Customer visits
- Steering Committee meetings for big customers

Engagement Frequency

- Annually
- Quarterly

Approach to Value Creation

- Digital disruption
- Customer need identification and satisfaction
- Brand presence
- Customer privacy Product portfolio

Value Created for Stakeholders

- Our endeavour is to provide our customers value-added and competitive solutions tailored to the present and future needs of their end users

Communities and NGOs

Importance

- A harmonious relationship with the communities where we operate is key to our social licence to operate; they are our partners in progress

Expectations

- Positive, social and economic contribution
- Long-term impact activities
- Climate change and environmental issues

Type of Engagement

- Various CSR initiatives
- Volunteering activities
- Community need identification – ongoing as per CSR project requirements
- Community engagement initiatives
- Impact assessment studies

Engagement Frequency

- Annually
- Quarterly

Approach to Value Creation

- Local employment generation
- Gender equality
- GHG emissions
- Waste management

Value Created for Stakeholders

- We believe in developing and steering long-term relationships with our local stakeholders across the globe. The company spearheads all activities related to its contribution to society

Enterprise risk management

Resilience by design

Enterprise risk management is a strategic pillar of long-term value creation. We operate in a dynamic sector where evolving regulations, technological shifts, stakeholder expectations, and environmental factors continually impact our operating landscape. We have institutionalised a comprehensive risk management framework that is both agile and forward-looking. It enables us to anticipate potential disruptions, effective resource allocation, and build resilience across the organisation.

Enterprise risk culture

Our risk culture is rooted in the principles of accountability, transparency, and continuous improvement. Risk awareness is embedded across all levels of the organisation – from strategic leadership to operational execution. We view risk management as an integral part of our decision-making and performance management systems. This culture empowers us to respond to emerging risks such as cybersecurity threats and customer data privacy, while strengthening our operational continuity and reputation management.

In FY 2024-25, key focus areas included managing operational and reputational risks, improving service reliability, safeguarding digital infrastructure, and enhancing customer trust. These efforts were reinforced through structured risk assessments, periodic reviews, and executive oversight.

Risk management framework

Our enterprise risk framework ensures that risk intelligence is continuously fed into strategic planning, capital allocation, and operational execution.

System integration

Our risk management processes are seamlessly integrated with internationally recognised management systems. These include:

- QMS (Quality Management System)
- EMS (Environmental Management System)
- OHSMS (Occupational Health and Safety Management System)
- AMS (Asset Management System)
- EnMS (Energy Management System)
- BCMS (Business Continuity Management System)
- ITSM (IT Service Management)

Linking risk and opportunity

We recognise that risks are often compared with opportunities. Our integrated approach ensures that material issues – whether related to market volatility, regulatory change, digital transformation, or climate resilience – are evaluated for mitigation and for potential value creation. Risks and opportunities are routinely reviewed at the process and organisational level, forming a critical input into strategy execution and stakeholder engagement.

Strategy

Energised to deliver long-term value

We pursue a multi-pronged strategy to deliver reliable, efficient, and customer-centric power distribution. Our focus remains on anticipating future demand, strengthening infrastructure, and elevating service quality across our network. Through sustained investment, stakeholder alignment, and data-driven decision-making, we are well positioned to address the evolving needs of a growing metropolis while advancing long-term energy security and sustainability.

S

#1

Technological Enhancements

We are embedding advanced technologies across our distribution network to drive reliability, safety, and efficiency. Our focus on innovation-led upgrades is enabling smarter operations and measurable energy savings.

Actions Taken in FY 2024-25

- Invested in SCADA with ADMS, smart meters, and developed end-to-end integration of WMS, TMS, streetlight & asset care apps
- Introduced Theft Prevention Pillar Design to curb non-technical losses
- Developed specialised MCB and meter connectors to reduce hotspots; two designs are patent pending

S

#2

Regulatory Compliance

Our approach to regulatory compliance is rooted in agility and strategic foresight. We aim to stay ahead of evolving norms while leveraging regulatory frameworks to support infrastructure growth.

Actions Taken in FY 2024-25

- Navigated complex regulatory challenges with timely interventions
- Staying updated with industry standards, and actively participation in regulatory proceedings

S

#3

Customer Engagement and Education

We are deepening customer engagement through targeted education, empowering users to make informed choices and reduce unauthorised consumption. These efforts support both demand-side efficiency and customer satisfaction.

Actions Taken in FY 2024-25

- Launched education initiatives to reduce unauthorised connections and promote conservation
- Enhanced service reliability to build trust
- Rolled out the Cloud for customer system to streamline customer interaction tracking and project oversight

S

#4

Modernising the Distribution Network

We are modernising our grid to reduce losses, improve voltage profiles, and enable uninterrupted power supply. Our upgrades are tailored to improve efficiency, fault tolerance, and long-term asset health.

Actions Taken in FY 2024-25

- Improved HT to LT ratio through High Voltage Distribution System provisioning
- Adopted advanced technologies to boost network efficiency
- Carried out rigorous asset care to reduce faults and ensure reliability

S

#5

Strengthening Financial Performance

We are strengthening our financial position by enhancing operational efficiency and ensuring robust revenue assurance. This enables us to develop a resilient and sustainable business model.

Actions Taken in FY 2024-25

- Capex was entirely funded through internal accruals. Self-sustaining financial model, underpinned by a forward-looking capital strategy. Strong financials have further reinforced our balance sheet and ensured adequate liquidity for future investment

S

#6

Strengthening Network Resilience

Our thoughtful operational spend reflects a deliberate strategy to strengthen infrastructure resilience and ensure high availability. We are prioritising asset reliability to meet peak demand and urban growth.

Actions Taken in FY 2024-25

- Replaced shortlength cables and lay new cables in coordination with road infrastructure work planned by MCGM/ MBMC to optimise the excavation cost
- Improving HT to LT network ratio
- Lowering manpower dependence and operational costs

S

#7

Digitisation & Automation

We are accelerating digital transformation to improve customer experience and internal efficiency. Automation, analytics, and AI are enabling faster service delivery and smarter decision-making.

Actions Taken in FY 2024-25

- Introduced Gen AI-based Customer Care Centre for omnichannel service
- Deployed Robotic Process Automation for meter reading, billing, and outage management
- Leveraged Data Lake, Power BI, and SAP BO for theft detection and process optimisation
- Rolled out C4C CRM, automated BOTs, HT Safety Compliance System, and Smart Pillars

ESG Approach

Powered by purpose
and responsible actions

We strive to integrate sustainability principles and ESG considerations into every aspect of our decision-making and business practices. We have set aspirational ESG targets and continuously track and monitor our progress to ensure tangible positive outcomes.

ESG approach and framework

The company's ESG framework is guided by the policies aligned to the principles of the National Guidelines for Responsible Business Conduct (NGRBC's) and internationally recognised standards, such as UNGC principles, ILO principles and United Nations Sustainable Development Goals (SDGs).

Key focus areas

Reduce GHG emissions by 60% by FY 2028-29
Increase the renewable energy mix by 60% by FY 2026-27

AEML's ESG framework

Guiding Principles and Disclosure Standards

Key performance highlights in FY 2024-25

2,049
Consumer opting for green power

452
Consumers instal rooftop solar with around 12.41 MU capacity

1,44,317
Units' savings by encouraging consumers adopting 5-star rated products

Certifications held

- Environment Management System (ISO 14001)
- Energy Management System (ISO 50001)
- Management of Single Use Plastic (SUP)
- Zero Waste to Landfill compliance with 99.53% diversion rate
- ISO 50001:2018 certification for ADTPS – world's first power plant to receive this for energy management

Energy and emissions management

Strategic approach to climate action

- Increase Renewable Energy proportion in overall energy mix
- Focus on Energy Conservation (EC) and Energy Efficiency (EE)
- Reduce GHG Emissions and overall carbon footprint

1. Renewable energy adoption

Auxiliary Consumption

AEML has adopted green power tariff for auxiliary consumption through Renewable Energy Sources for our stations and offices. This effectively reduces our carbon footprint and supports renewable electricity generation.

73%

of auxiliary power consumption from Renewable energy by FY 2024-25

Power Purchase Agreement (PPA)

AEML has entered into a 25-year Power Purchase Agreement (PPA) for 700 MW of hybrid power (solar + wind), guaranteeing a minimum 50% capacity utilisation factor from FY 2021-22 onwards.

Green energy tariff

AEML launched Green Energy Tariff to support consumers in achieving their carbon neutrality goals. Our 5,832 consumers have now voluntarily opted for Green Power (renewable power) and availed green energy certificates cumulatively.

Rooftop solar

Under PM Surya Ghar Muft Bijli Yojana

Aligning with PM Surya Ghar Muft Bijli Yojana, a Government of India initiative, we installed 92 rooftop solar systems within AEML's licensed area, with an installed capacity of 1,605 kWp, in FY 2024-25. This cumulatively generated ~ 0.13 MUs of clean energy. We also conducted focussed awareness campaigns, offered customer support, and coordinated with relevant stakeholders to stimulate residential customers' participation in sustainable energy initiative.

PV solar plant in Aarey, Versova and Ghodbunder

The grid connected 245 kWp Rooftop PV Solar Plant installed at Aarey, Versova and Ghodbunder EHV substations to reduce the consumption of conventional energy in offices and substations. In FY 2024-25, the rooftop solar generated 26 MUs.

Support for consumers

AEML empowers its consumers to instal rooftop solar plants by offering installation support through technical assistance and empanelled vendors.

Rooftop solar plant (BESS) at AEML's Borivali office

Significance

Adani Electricity's pilot 100 kW rooftop solar plant with battery storage system (BESS) at the Borivali office, significantly cuts grid reliance. It generates solar power during the day and utilises stored energy in the evening or peak demand hours, conserving energy and reducing office electricity costs by 60%.

Key outcomes and impact in FY 2024-25

100,000 Units

were generated through rooftop solar

Way forward

Within the next two years, we aim to expand this technology across our offices and substations, replacing fossil-fuel based diesel generators with cleaner and more economical BESS solutions.

As of March 2025, 2,229 AEML consumers had installed rooftop Solar PV plant with cumulative installed capacity of 49.19 MW, generating 36.88 MU renewable energy.

2. Energy conservation and energy efficiency

Advancing energy efficiency is our strategic approach towards addressing critical challenges such as affordability, enhancing supply security, and mitigating the impacts of climate change, while also enhancing the economic efficiency of our consumers

Energy audits services for consumers

As a power distribution utility, we believe that the customers, especially from the industrial sector, can contribute to and benefit immensely from enhanced energy efficiency by adopting best practices, reducing GHG emissions. Therefore, we provided complimentary walkthrough energy audit services to consumers to identify energy-saving opportunities and raise awareness about energy efficiency.

~1.2 million units

potential energy savings were identified for 27 consumers in FY 2024-25

Large-scale Demand Side Management (DSM) programmes

- **Replacing inefficient ceiling fans for consumers:** Advancing our commitment to providing super-efficient 5-star certified BLDC (Brush Less Direct Current) ceiling fans, we distributed 150+ ceiling fans from reputed brands to residential consumers / schools / colleges / hospital / trusts, saving 0.32 million units (MUs) of electricity annually. Cumulatively, over 2,220 fans have been replaced till date, resulting in 1.22 million units (MUs) savings.

■ Replacing inefficient refrigerators for consumers:

Adhering to B.E.E's revised star rating norms and in line with our aim to replace inefficient refrigerators, we replaced 260+ old ones with 5-star-rated models, saving of 1.1 million Units (MUs) in FY 2024-25 for our residential consumers. To date, 3,175+ refrigerators have been replaced, leading to cumulative savings of 5.2 MUs.

BEAT THE HEAT

The energy efficiency and conservation efforts under DSM programmes are actively promoted through digital platforms and print media under the banner of 'BEAT THE HEAT' for maximum outreach.

Urja Samvardhan Upakaram Programme

Workshops are conducted across various academic institutions, commercial offices, banks, hospitals, industrial estates, housing societies, and slum areas educating them on energy conservation. 500+ individuals were reached out through on-site, online, digital, and telephonic platforms.

Technology for empowering EV charging operations

As part of our commitment to advancing India's sustainable mobility agenda, we have embedded technology across our electric vehicle (EV) charging operations to deliver seamless services, optimise backend processes, and enhance customer engagement.

653

EV charging points installed till FY 2024-25

Elocity CPMS

We implemented and tailored the Elocity Charge Point Management System (CPMS), a SaaS-based platform, to strengthen EV charger operations. The upgraded system delivers an improved user experience, standardised data management, and enhanced reporting capabilities. It supports efficient charger monitoring, user management, and transaction tracking – enabling us to build a robust, scalable EV infrastructure.

Web portal and customer web page

We launched a dedicated EV web portal to simplify and encourage user participation in EV services. The portal enables consumers to register leads, submit service requests, track application status, and access relevant information through an intuitive interface. A supporting web page further educates users on EV charging options and associated benefits.

Awareness and outreach initiatives

To drive adoption in residential spaces, we conducted targeted SMS campaigns highlighting our free charger installation offer. These were supplemented by print ads and grassroots awareness sessions across zones and divisions, engaging employees to champion the message.

3. EV charging infrastructure under DSM scheme

Reducing pollution and carbon emissions

In FY 2024-25, we significantly expanded our Electric Vehicle (EV) charging infrastructure by installing 417 EV chargers and 577 DSM chargers across our network area, catering to both 2-wheeler and 4-wheeler electric vehicles. These chargers were deployed in common areas of residential societies, facilitating easy access to charging points, thereby encouraging broader EV adoption.

Outcomes and benefits

- Our installed EV charging infrastructure collectively consumed ~0.33 MUs this year, aiding the transition to electric mobility, optimising peak load and enhancing energy efficiency within the distribution system
- An additional 754 customers opted for LTEV connections with a load of 8.9 MW, taking our total LTEV connections to 2,244, with an approximate load of 30 MW till FY 2024-25

Performance in FY 2024-25

Exceeded

Standalone RPO target of 29.91% (MERC RPO Target) for FY 2024-25

Procured

4,001.78 MUs of renewable energy in FY 2024-25, accounting for ~ 35.20% of our total energy mix

46 bps

T&D losses reduced during FY 2024-25; improved from 5.29% to 4.83%

Realised

a 69.71% reduction in GHG emissions intensity, from 2,254 (FY 2018-19 baseline) to 683 in FY 2024-25

Renewable power mix purchased electricity

Description	Unit	FY 2018-19 (Baseline)	FY 2024-25
Renewable energy procured from eligible renewable sources	Million Units	280.73	4,001.78
Energy procured from sources "Other than Renewable"		9,032.91	7,365.44
Total Energy Procured		9,313.64	11,367.22
% of electricity procured from renewable sources	Percentage	3.01%	35.20%

GHG emissions (Scope 1 and Scope 2) summary

Scope	Emission source	Total GHG emissions (tCO ₂ e) in FY 2024-25
Scope 1	Fossil fuels (Coal, diesel, petrol, LDO, LPG) used in stationery and mobile equipment, coal used in electricity generation process, SF6 & refrigerants used in operations & maintenance activities and CO ₂ emissions from fire extinguishers	13,39,208.26
Scope 2	Emissions arising from consumption of purchased electricity towards auxiliary power consumed in generations, transmission & distribution assets owned by AEML and Transmission & Distribution losses incurred	4,07,565.25

GHG emissions intensity

Parameter	Boundary of emission within the company	FY 2018-19 (Baseline)	FY 2024-25
GHG tCO ₂ e	AEML-Scope 1 and Scope 2 emissions	37,50,069	17,46,773.51
EBITDA in ₹ in crore	AEML	1,663.67	2,567
Emissions Intensity (tCO ₂ e/EBITDA in ₹ in crore)		2,254	682.87
Reduction (%)			69.71%

Waste Management

Approach to waste management

Our waste management processes across all our operational sites aligns with UN SDG 12 (Responsible Consumption and Production). We handle, segregate, store and transport all hazardous waste generated from our premises, in compliance with applicable regulations and industry best industry practices. We consistently strive to reduce the waste generated from our operations.

All hazardous waste is disposed through an authorised agency in an environmentally sound manner

All non-hazardous waste, including scrap metal, wood, glass, tyres, e-waste, cardboard, and paper, etc. is sold via auction

Certified by M/s Bureau Veritas India Pvt. Ltd for

Zero

Waste to Landfill sites since 2022

Single

Use Plastic (SUP) free company

Waste management measures in FY 2024-25, AEML:

- Tracked SuP usage for each location and developed a time-bound elimination plan
- Formalised processes for waste segregation, storage, tracking monitoring, controls and disposal
- Continuous awareness and information dissemination among employees through desktop wallpapers, standees and zonal safety meetings, with 1,986 employees pledging for SuP through ESS
- Zero Waste to Landfill and SuP policy is communicated to suppliers / vendors providing services operating AEML's licensed areas across all locations

- Automated several processes to reduce the use of paper and actively encourages all consumers to opt for paperless bills, reducing environmental impact. Continuous promotions were carried out for this eco-friendly initiative covering 7,21,023 consumers
- Replaced oil-type switch gears with dry-type, maintenance free switchgears using environmentally friendly, bio-degradable Ester-oil filled transformers
- Replaced hazardous resin cast joints with cold shrink joints in LT application, reducing hazardous waste and thereby the carbon footprint
- Opted to use non-carcinogenic biodegradable silica gel in transformers across AEML distribution area
- Eliminated SuP items from our premises, such as packaging material of pillars, panels, RMU replaced with multiple-use plastic; receipt of lugs, ferrules, wires in gunny bags; jointing kit in cardboard boxes; cello tapes replaced with cotton tapes; and brown tapes, plastic on FE card, canteen gloves, plastic folders are completely phased out

Transitioning to eco-friendly technologies and materials

Eco-friendly cable covers

AEML, in partnership with FeelGood EcoNurture LLP has developed a new plastic cable covering made from 100% post-consumer multi-layered plastics (MLP) packaging waste, offering the following benefits:

- Are lighter, eco-friendly and significantly reduces carbon footprint
- Are fully recyclable and support circular economy and environmental sustainability
- Provide efficient coverage, logistics optimisation and cost effectiveness

Smart transformer testing for more safety and lesser waste

Our multi-function transformer test system with auto-sequence testing and single lead connection reduces testing time by 1/3rd, ensuring safety and reliability. This system features auto-report generation, eliminating the need to fill physical forms and saving printed stationery.

Innovative self-dehydrating breathers for power transformers

We have introduced self-dehydrating breathers without Air Cell and with IoT-based automatic silica gel re-activation for our power transformers. This obviates the need to change the silica gel manually every six months.

Key benefits

- Reduced silica gel waste by 15 Kg per transformer annually
- Enhanced transformer life and reduction in frequency of inspections and associated R&M

Performance in FY 2024-25

Social – Employees

Empowering people, enabling impact

Our employees are the key stakeholders in our growth and success. We deeply value their commitment and unique skills, which fuel our organisations's growth trajectory. We are committed to offering them comprehensive learning and development opportunities and cultivate an inclusive workplace where everyone can thrive.

Certifications held

- Occupational Health & Safety Management System (ISO 45001)
- Guidelines for Information and Communication Technology Readiness for Business Continuity (ISO 27031)

Approach to people centricity

Key drivers for employee-centric culture

- Making our employees future-ready
- Digital and technical capability building
- Meritocracy-based career progression
- Agility and role-based organisational practices
- Driving employee engagement
- Treating employees as brand ambassadors
- Strengthening the talent pipeline

Talent acquisition

We follow a merit-based recruitment strategy with structured processes to assess and evaluate the skills and qualifications of the candidates, in

alignment with the job requirements. We source fresh talent from academic institutions as well as external sources, while also filling the open positions through lateral entry from within the organisation. We ensure the growth and development of our talent through comprehensive induction and training sessions as well as meaningful engagement initiatives.

Learning and Development

Talent development and succession planning

Our comprehensive talent development roadmap is designed to develop and leverage employee capabilities to achieve organisation's goals. Our talent development strategy involves tailored interventions for different talent groups, including successors, top talent, high-performing talent, and solid citizens.

Training platforms

We utilise a blend of platforms to ensure comprehensive learning for our employees:

eVidyalaya – Percipio Learning Experience Platform: This digital platform provides access to all Adani Group employees into 11 Digital Dexterity Programmes and gamification modules for interactive learning.

AE Varsity : We have AE-varsity, a self inhouse developed knowledge repository that houses all the essential sessions related to utility industry. We're empowering our team with skills & foundational designs required in Energy sector.

In-Person Sessions: This included on-site hands-on engagement programmes such as a 2-day Job Evaluation Certification programme in April 2024, Train the Trainer sessions, and initiatives like Manan (Yoga & Meditation)

Learning and development programmes in FY 2024-25

Core training areas

- Leadership development
- Digital transformation
- Technical and practical competencies
- Employee wellbeing and safety
- Project-based learning

Our comprehensive talent development roadmap is designed to develop and leverage employee capabilities to achieve organisation's goals.

1. Leadership development

We nurture emerging leaders through a suite of programmes focussing on personal leadership skills, digital transformation, and functional managerial competence.

Adani Marvels Leadership Development Programme

Designed with IIT Bombay, this programme builds leadership by instilling expertise, knowledge, and mindset needed for navigating complexities of the evolving power and utility sector. The programme builds a robust leadership pipeline, drives growth through practical application, develops competence and improves organisation's impact and future sustainability.

Mode of learning

The programme amalgamates personal discovery workshops, connect sessions with coaches, digital transformation, job shadowing, and multi-rater feedback. It features:

- Blended learning approach
- Understanding of self
- Strategic orientation and entrepreneurial mindset
- Outcome orientation and transformational mindset

Participants work on the business projects, address critical needs and challenges, with regular reviews by senior leaders.

Impact

The projects executed by the Adani Marvels participants has led to the following significant benefits during the year:

- Savings in power purchase costs
- Automation of ARR
- Increasing and protecting market share, leading to annual savings
- Optimisation of Opex and employee costs
- Early detection of theft
- Significant reduction in no supply complaints

The programme builds a robust leadership pipeline, drives growth through practical application, enhances competency development, and improves organisational impact

NorthStar programme: This 11-month multi-modular programme with Emeritus Institute of Management, Singapore, focusses on building leadership skills through industry insights and effective leadership strategies, preparing participants to handle advanced roles, lead teams, businesses, and organisations.

Takshashila programme: The experiential modules, designed in collaboration with ISB Hyderabad, enhance executive presence, personal leadership, and functional competences. The participants benefit through action-based projects with opportunities to apply their learnings into the Adani business ecosystem.

Fulcrum: The programme develops an owner-manager mindset, emotional resilience and strengthen leadership capabilities through interactions with industry experts.

2. Technical upskilling

Simulation Lab at AEMI: The lab offers real-time scenario training to internal and external participants, covering various aspects of power distribution. It features working models such as smart meter functioning, protection relays, industrial controls, fault passage indicators, and Gas Insulated Substations.

Kindle-Learning for GETs: This project-based learning initiative enables Graduate Engineer Trainees (GETs) to create e-learning content (videos/podcasts) for technical knowledge retention.

Train the Trainer sessions: Sessions were conducted to develop in-house trainers, focussing on safety standards, covering topics like working at heights, hazardous energy control, personal protective equipment usage, contractor safety management.

Data analytics for senior leaders: This programme was launched to equip senior leaders with data analytics skills, empowering them to make data-driven operational decisions.

Other programmes: Workshops were conducted for senior leaders focussing on leadership self-discovery, commercial contract drafting, and financial aspects of the utility sector to address diverse learning needs.

3. Behavioural training

Gamification module on eVidyalaya: A new gamification module was launched on the eVidyalaya platform, aligned with the Adani Behavioural Competency Framework (ABCF). This is accessible to all Adani Group employees to enhance their behavioural competencies.

Manan – Yoga & Meditation: The programme ensures emotional well-being of non-executives and contract labour through yoga, diet/meditation/awareness, and one-on-one consultation, promoting mindfulness and stress management.

Employee safety: Basic Electrical Safety and Fire Safety training was conducted for non-executives and contract workers

Mindfulness and ergonomics sessions: These sessions were held to nurture a healthy workplace by understanding employees' psychology, behaviour, and habits. The objective of these sessions is to boost the physical well-being and productivity of employees by raising awareness about their interaction with the work environment.

4. Digital transformation

Our Digital Dexterity Programme and gamification modules on eVidyalaya platform, aligned with the Adani Behavioural Competency Framework, focus on instilling a digital mindset in the workforce. This tailor-made digital learning curriculum is curated by our eVidyalaya Team leveraging the insights from our Digital Leaders to accelerate employees' digital skills and adaptability.

Prioritising 'Digital First'

Advancing our 'Digital First' mindset and preparing the organisation for future, we are digitalising all HR processes and systems end-to-end. This will amplify the adoption of digital skill sets and tools, improving our speed, accuracy, efficiency, and productivity.

5. Cadre development programme

AEML's induction programme for Graduate Engineer Trainees (GETs), Management Trainees (MTs), and Adani Accelerated Leadership Programme (AALP) participants creates a robust pipeline of young professionals. The programme encompasses mentorship and interactions with senior professionals integrating them effectively into the organisation and grooming them to assume future leadership roles. Structured orientations outline aspirational growth paths for these cadre hires.

6. Future-ready distribution talent strategy

AEML has established a distribution business talent strategy aligned with Exit 2030 to enhance our future-readiness. We have identified critical roles, developed robust succession plans and addressed competency gaps to capitalise on anticipated growth opportunities.

Career progression

We implement initiatives powering long-term career trajectories for our employees through a structured career mapping process. We offer internal job postings, job rotations, and clear career paths for every role. Our job rotation policy enables our people to rotate their roles after completing a fixed tenure in a particular position, geography, or assignment. We offer them multiple opportunities to grow vertically and laterally within the organisation.

Diversity Equity and Inclusion (DEI)

At AEML, we strongly prohibit any bias and discrimination based on age, gender, race, nationality, physical attributes, etc. We are dedicated to promoting a diverse and inclusive workplace, offering equal opportunities to all.

DEI initiatives

Higher female representation in POSH committee

AEML maintains an in-house mechanism to address complaints related to sexual harassment, with 78% female representation on the POSH Committee. This ensures a safe and secure environment for the employees.

Women in Electricity

We empower the women of our organisation through recognising their expertise, achievements, and contributions to the energy sector. It aims to raise awareness about the vital roles women play in the industry, promote diversity and inclusion, and inspire the next generation of women to pursue careers in electricity and power.

Our female

hiring percentage has increased to 32% in FY 2024-25 from 25% in the previous year.

Electrifying Performers – Annual Recognition & Rewards Ceremony

As part of our ongoing commitment to fostering a culture of excellence and performance, we organised the Electrifying Performers recognition and rewards event on October 24, 2024. This annual initiative celebrates the exceptional contributions of our employees across both executive and non-executive categories. High-performing individuals and teams who demonstrated outstanding achievements during the financial year were felicitated under various award categories including the Paradigm Shift Award, Platinum Star Achievement, Shining Star, Young Shining Star, Operational Awards, and Front Runners Felicitation. A total of 89 employees were recognised for their impactful performance, reinforcing our belief in celebrating success and motivating continuous improvement across the organisation.

Employee Engagement and Well-being

- During the year, we implemented several employee engagement initiatives to enhance communication, increase participation, and cultivate a sense of belonging.
- **Celebrations of festivals and achievements** of our employees
 - **Thank You Card** and **AE Laureates** to create a culture of appreciation and recognition
 - **Adani Accelerated Leadership Programme (AALP)** for our summer interns from premium institutes like IIMs, IITs, and FMS
 - **Platform Mantra** to facilitate AALPs share their knowledge and experience regarding various topics relevant in the industry
 - **Let's Discuss** initiative for planned interaction with the MTs and AALPs of batch 2024-25
 - **WINspiration**, our Adani Electricity Mentorship Programme seamlessly integrates GETs and MTs into the Company, grooming future leaders through interactions with senior colleagues

- **Connect to Customer** initiative to help our employees better understand consumers' needs and support services
- **UNNATI Career Guidance & Counselling Programme** to offer career guidance to AEML employees' children in grade 7th to 12th
- **Open door policy** enabling all employees to have direct access to senior management for open communication, feedback and sharing of ideas and concerns.
- **Quarterly townhall** chaired by senior leadership for transparent communication with all employees
- **Monthly Safe Connect**, virtual safety meeting chaired by senior leadership and addressing all employees
- **Induction programme** held each quarter and led by senior leadership
- **Cadre participant interaction with management**, comprising representatives from different employee groups to hold regular engagement with the management

InstruConnect 2024

The InstruConnect exhibition at AEMI, conducted in coordination with the Diagnostic cell, featured around 25 leading global brands from 10 partners. 400 visitors participated, including the GETs, ATL Engineers, and premium consumers showcasing instruments such as cables identification sets, diagnostic kits, Smart Testing kits for transformers, circuit breakers, etc.

Saksham Programme

Saksham programme equips the non-employees and contract labour with essential safety training, involving topics such as Basic Electrical Safety, Fire Safety, General Safety Rules, and Life-Saving Safety Rules

Social – Health and safety

Safety as a core value

We recognise health and safety as a strategic priority, integral to AEML's business operations. We have established structured processes and controls, underlining safety not just as a compliance obligation but as a core value championed by our highest level of governance. We are continuously striving to create safer operations prioritising the safety and wellbeing of our employees and contractors.

HSE Framework at AEML

HSE policy

AEML's Health, Safety, and Environment (HSE) policy prioritises the well-being of all employees, contractors, customers, and the wider community. We review the policy annually and communicate it to all employees, contractors, and stakeholders to ensure its continued relevance and commitment.

HSE policy focus areas

- Zero harm to people, assets, and the environment
- Compliance with applicable statutory and regulatory requirements
- Promotion of a strong safety culture across all levels of the organisation
- Integration of HSE considerations into all business decisions and operational planning

HSE Management System

Our HSE management system is certified for ISO 45001:2018 and covers all employees, contractors, and visitors. To strengthen our HSE practices, we have established robust operational control procedures for site operations. Our HSE management system is designed to integrate HSE policy across our entire operations and enhance our compliance with applicatory regulations. The ISO 45001:2018 certification is maintained through annual surveillance audits and periodic recertification by accredited third-party agencies.

HSE Compliance

- Our structured framework ensures robust HSE compliance through:
- Regular internal audits and reviews to verify legal compliance
 - Stringent monitoring and implementation of updates to comply with applicable HSE regulations
 - Employee training programmes to ensure awareness and adherence to legal standards
 - Active engagement with government bodies and regulatory agencies
 - Periodic third-party audits and certifications for external validation

Any incident of non-compliance is thoroughly investigated, with prompt implementation of appropriate corrective and preventive actions, tracked through the internal HSE management system.

Board oversight on safety

At AEML, we have established a formal HSE governance structure with clearly defined roles and responsibilities.

Oversight from the Apex Safety Council (ASC)

The Apex Safety Council (ASC), headed by our CEO, sets the tone at the top and provides oversight to the overall HSE implementation, ensuring the integration of health and safety policies, systems and accountabilities across the organisation.

Key responsibilities of Apex Safety Council

Sets strategic direction

Approves the overarching Safety policy and ensures alignment with the organisation's broader ESG and risk management strategies

Review of safety metrics

Regularly reviews company-wide safety performance, including leading and lagging indicators such as Lost Time Injury Severity Rate (LTISR), Lost Time Injury Frequency Rate (LTIFR), near-miss reports, and significant incident investigations

Manages Risk

Safety risks, which are integrated into the enterprise risk management framework, are periodically reviewed at the Board level. Emerging risks, such as those related to contractor safety, electrical hazards, or climate-related safety impacts, are actively monitored

Establishes accountability and culture

Ensures the safety responsibilities are clearly defined and cascaded across all levels of the organisation, emphasising leadership commitment to a safety-first culture through visible participation in safety campaigns and audits

Review strategic initiatives

- Reviews strategic initiatives such as:
- Implementation of behaviour-based safety (BBS) programmes
 - Rollout of digital safety tools and incident management systems
 - Investment in safety-related infrastructure and personal protective equipment (PPE)
 - Emergency preparedness and response planning

Vigilance Mechanism for Apex Safety Council (ASC)

ASC maintains comprehensive visibility into safety matters through a well-structured mechanism:

- **Quarterly reporting by Head-Safety:** The ASC receives a comprehensive Safety performance report each quarter from the Head - Safety, which includes performance dashboards, incident trends, compliance status, audit findings, and ongoing safety improvement programmes

- **Board-level Sub-Committee oversight:** Safety governance is reinforced by various Board-level sub-committees, such as the BSSC (Business Steering Safety Council), Joint Safety Committees (JSC), Operation Steering Safety Council (OSSC) & Project Safety Steering Council (PSSC), depending on the organisational structure. The BSSC committee is responsible for:
 - Reviewing safety strategy and KPIs
 - Evaluating significant incidents and tracking follow-up actions
 - Overseeing safety audits and management review outcomes
 - Monitoring regulatory compliance and stakeholder concerns

- **Special reviews:** In the event of a major incident or safety breach, the ASC may convene special meetings or request ad-hoc updates to assess root causes and approve corrective actions.
- **Engagement with senior leadership:** Periodic interactions with functional heads and operational leaders provide ASC with deeper insights into safety challenges and frontline realities.

HSE function and Safety Task Forces

Our HSE function is led by the dedicated heads who report directly to senior leadership. The HSE team under this HSE function are assigned relevant safety tasks aligned with our organisation goals and STRAP.

We have formed six Safety Task Forces, with cross-functional teams from Operations, Engineering, HR, and Safety. Each Task Force has its own dedicated safety charters and deliverables. They meet on a monthly basis and report to the Business Safety Steering Committee (BSSC) for governance oversight.

Six Safety Task Forces

- TF1: Safety standards rules and procedures
- TF2: Contractor safety management
- TF3: Training and capability building
- TF4: Logistics safety
- TF5: Safety interaction and incident investigation
- TF6: Technology intervention

- ▶
- Key responsibilities
- Identifying and assessing emerging safety risks
 - Recommending mitigation strategies and controls
 - Coordinating company-wide safety campaigns and initiatives
 - Reviewing incident reports and recommending systemic improvements
 - Promoting interdepartmental collaboration on safety issues

Ground safety teams

For maximum safety coverage, we engage our ground staff to form the safety teams. Each team comprises representatives from workers, support functions, line functions, and management, ensuring everyone's involvement in enhancing AEML's safety posture.

Employee health management

Due to the inherent nature of our business, our employees are not exposed to long-term occupational illnesses such as hearing loss, respiratory issues, or cancers or any physical, chemical, biological hazards. Our safety team, along with the Group Safety team, implements stringent measures to minimise the frequency and severity of any occupational injuries, in case they occur.

Health initiatives for employees

Divisional medical centres

These centres offer routine health consultations and primary care for on-duty medical emergencies or work-related injuries.

Partnership with local hospitals

Local hospitals facilitate specialist consultations, investigations, and hospital admissions

Group Mediclaim Policy

Our Group Mediclaim policy offers cashless hospitalisation for on-roll employees, their spouse, and children up to 25 years of age. A top-up cover is available, and parents or in-laws can be enrolled under a separate policy at a

nominal premium. Retired employees and spouses of deceased employees can continue coverage on a self-pay basis. The policy covers all illnesses, accidents, pre/post-hospitalisation expenses, and pre-existing conditions. It is administered through Medi Assist in coordination with HR and the Medical Department. A Corporate Floater Fund supports critical illness cases exceeding eligible limits, subject to approval.

Medical fitness evaluations

Medical fitness assessments are conducted for blue-collar employees for pre-employment, post-sick leave, and service extension evaluations.

Health promotional activities

These activities include health talks, onsite camps, and mailers on health days, awareness sessions on non-communicable diseases, kidney health, tech advances for vision, women's health, healthy heart living, self-motivation, diabetes reversal, lung cancer, smoking cessation, and mindful nutrition for weight management.

First aid training

Medical team trained the designated first aid providers from various divisions on regular first aid, including general and workplace injuries, emergency medical situations, hands-on CPR training.

Health index

Health risk stratification and data management on the basis of annual health check-ups:

1. The outcomes of the Annual Health Checkup stratify employees into Green, Yellow, Orange, and Red risk categories
2. High risk employees (orange and red categories): Receive regular follow-ups to manage normal health parameters and are encouraged to consult their treating physicians

18,567

people were covered under this training in FY 2024-25 (includes contract labour and vendors)

Annual health check-ups

On-roll employees

3,390

on-roll employees opt the annual health check-up service

Contract employees

3,516

Contract employees opt the annual health check-up service

Individual health counselling

Upon receiving the annual health checkup report, the employees can avail health counselling to understand their health conditions in detail and receive guidance on its optimal management.

Safety violation management

Employees can report safety violations through our digital platform, the Adani Safex Portal. Additionally, they can also report the violations anonymously to the Supervisor or Safety Officer, or through the various safety committee forums. AEML has a well-defined Consequence Management Policy that includes:

Immediate response

- Any safety violation triggers prompt action to address it and mitigate further risks
- This may involve stopping work, correcting the violation, and ensuring the safety of all employees and others nearby

Investigation and Documentation

- Underlying root causes are assessed through thorough investigation
- Details of violation is comprehensively documented, such as nature of violation, date, time, persons involved, etc

Communication

- Relevant stakeholders, including employees, supervisors, and management are made aware of the incident

Corrective actions

- Appropriate corrective actions are implemented to address the root cause and prevent the recurrence

Enforcement of consequence

- Necessary consequences under the established disciplinary procedures and company policies are enforced which may involve verbal warnings, written reprimands, suspension or termination, depending on the severity of the violation and the employee's disciplinary history

Training and education

- Required training is imparted to employees detailing the safety protocols, procedures, and expectations to reinforce compliance obligations and explain potential consequences of violations

Monitoring and follow-up

- Continuous monitoring for potential non-compliances through frequent inspections, audits, and reviews, proactively mitigating their recurrence

Infrastructure upgrades

- Installed safety equipment such as fire hydrant and fire alarm system for compliance with updated Safety standards
- Upgraded lighting and ventilation in work areas to reduce risks of accidents and occupational illnesses
- Specialised structures such as the Height Pass Test structure and safety parks have been constructed

Equipment modernisation

- Latest technology switchgears and relays were installed
- Tailored personal protective equipment and safety gear are provided to employees
- Safety sensors, alarms, and monitoring systems are installed for real-time risk detection and mitigation

Dedicated HSE personnel

- Dedicated HSE professionals and departments are established to implement and oversee safety initiatives
- These professionals actively identify hazards, develop safety protocols, conducts safety inspections and enhance safety culture

Safety training and awareness programmes

- 'SAKSHAM' safety training was conducted for 8,400+ AEML workforce, including digital assessment
- Safety induction training was provided all new joiners

Employee engagement in safety

- Employee participation and consultation in various safety forums, such as zonal level safety committee meet, joint safety committee meet, safety interaction by senior leadership, hazard spotting, safety risk field audits, etc.

Leadership commitment

- Top-down safety approach, influencing decision-making processes and resource allocation for HSE initiatives

Implementation and enhancement of safety systems

- Comprehensive upgrades on the safety management system including hazard identification, risk assessment, control measures, training etc.
- Implemented digital platforms for real-time reporting of near misses, incidents, and hazards
- Reduction in lagging indicators, such as injury rates and lost-time incidents

Digitisation of safety

- Implemented Adani Safex digital platforms with 20+ modules on safety
- Remote operation of switchgear through SCADA
- Mobile thermal imaging system

Community engagement

- Involving stakeholders through community outreach programmes, environmental stewardship projects, and transparent communication about the company's HSE performance

Health and safety system and initiatives in FY 2024-25

AEML significantly invests in upgrading its safety systems, infrastructure, equipment and awareness of its personnel to enhance its safety performance and compliance with regulatory requirements.

Safety Systems to prevent occupational injuries

Engineering controls	▶	Implementing advanced engineering solutions to minimise or eliminate risks
SOP compliance	▶	Adhering strictly to Standard Operating Procedures (SOPs)
LOTO PTW compliance	▶	Following Lockout/Tagout (LOTO) and Permit to Work (PTW) protocols diligently
PPE compliance	▶	Ensuring proper use of Personal Protective Equipment (PPE).
Leading safety indicators	▶	Proactive safety metrics - Safety Interaction (SI), Safety Risk Field Audit (SRFA) and concern reporting
Horizontal deployment of learning	▶	Applying insights from past incidents across the organisation
Mandatory safety induction	▶	Conducting compulsory safety inductions for all employees

Safety awareness programmes

- Safety interaction
- Town hall meetings
- Safety training programmes
- Employee engagement and involvement
- Celebration of safety milestones and achievements
- Train the trainer programme
- Specialised safety campaigns – URJA, UNCHAI, UPKARAN and UDGAM
- Rewards and recognition for safety behaviour
- Safety meetings
- Mock drills and tabletop exercises

Social – Customers

At the core of every connection

At AEML, we strive to build strong relationships with our B2C and B2B customers by actively listening to them, providing exceptional service and garnering their trust and loyalty. Effective communication and timely responsiveness are key to customer delight. We consistently benchmark our customer services against the industry best practices, to excellence.

Customer relationship management

In pursuit to deliver unparalleled customer service, we strive for continuous improvement setting leadership standards of customer service. We are investing in digitalisation, automation, and personalisation to align ourselves with evolving customer demands and deliver efficient and personalised experiences. We not only implement industry best practices but also look at consumer experiences across various sectors to deliver nothing lesser than the best for our customers.

For the third consecutive year, AEML has been recognised as India's number one power utility by the Ministry of Power, endorsed by McKinsey and Co. The accolade speaks volumes about our strong customer relationship management.

Industry leading initiatives

Customer newsletter

- Our customer newsletter is intended to keep our customers abreast of new developments and innovations at AEML

Key Account Managers (KAMs)

- Key premium customer accounts were mapped to the Key Account Managers to handle their needs and concerns on high priority
- KAMs serve as a one point contact for all queries to deliver customers a hassle-free experience

24/7 availability

- Round the clock availability through multiple digital points, including Elektra Chatbot, WhatsApp, missed call service, and call centre

Digital platforms

- Self-care options on AEML's website and app for interaction with agents delivering in-person experience from homes
- Customer communication module, dynamic website with self-logins, video contact centre smart meters, self-help kiosk, social media engagement, personalised emails and messages

Personalised experience

- Personalised treatment through Gold accounts has been proposed, aiming to further enhance the turnaround times related and job execution pace

Customer Outreach Programme

- A platform to listen to our customers' needs, experiences, and expectations

Empowering customer with digital touchpoints

We provide our customer with multiple touchpoints to voice their pain points to us. All complaints raised can be tracked website, mobile app or other touchpoints.

Customer safety and awareness

We educate customers on monsoon safety and run energy efficiency campaigns via emails, SMS, roadshows, and kiosks for energy-efficient products and appliances. The enunciated policy is displayed across all AEML locations and is communicated to all stakeholders. Additionally, we also foster regular safety awareness and communication for internal and external stakeholders through webinars, radio safety messages, school safety programmes and slum awareness initiatives.

Customer grievance redressal

We undertake routine surveys and feedback to gauge our customer sentiments. There are multiple formal channels for customers to raise their concerns. All concerns are resolved promptly within the established timelines, with transparency and accountability. Consumer feedback is sought after each interaction to drive continuous improvement.

Grievance Redressal Forum and Ombudsman

Customer can escalate their concerns to higher authorities by logging their grievances into the government's web-enabled grievance redressal

mechanism (ICRS), receiving a unique tracking number to monitor the status. If dissatisfied with CGFR decision, consumers can further appeal to the Electricity Ombudsman within a specified timeframe. If the Ombudsperson favours the consumer, the distribution company is directed to resolve the complaint accordingly.

Celebrating Our Power Warriors

Aamche Power Warriors highlights the heroes behind our seamless service – our frontline team members who ensure every customer interaction reflects care, reliability, and commitment.

We recognise their invaluable contributions, boosts morale, and fosters pride in serving our customers. By sharing their stories, we celebrate not only their dedication but also the vital role customers play in driving our purpose and success.

Customer data protection

Our Information Security Policy guides our actions towards ensuring cyber security and customer data protection. Data privacy is integrated in our enterprise risk management. To enforce this, we have instituted robust access controls, encryption protocols and regular security audits to prevent unauthorised access or data breaches. Customers reinforced the choices about their private data, including data collection, deletion, correction, access to data held by the Company and request for data transfer to other service providers.

Zero

instances of breach of customer data privacy

Raising customer awareness on cybersecurity

We educated customer on cybersecurity threats through various channels:

- Flyers were sent via emails regarding cyber threats through Phishing, Vishing and SMSing
- SMS and WhatsApp messages raised cybersecurity awareness
- Educational videos demonstrated cybersecurity measures against cyber threats

Customer-Centricity Initiatives 2024-2025

Our flagship initiatives, Sampark and Samvaad, have been pivotal in demonstrating commitment to transparency, customer satisfaction, and inclusive employee engagement. These initiatives have not only deepened our culture of empathy, trust, and continuous improvement but have also catalysed organisational responsiveness, efficiency, and future-readiness.

Sampark: Customer Outreach Programme

Sampark, our enterprise-wide initiative, is conceived to nurture profound customer relationships and optimise service delivery through proactive and direct engagement. The programme serves as a key tenet in instilling a customer-first ethos throughout all tiers of the organisation by developing empathy for customer awareness.

Sampark Objectives

- Establish meaningful, trust-based interactions with customers
- Drive customer-centric thinking through employee engagement
- Strengthen operational efficiency by capturing real-time feedback

Scope & Participation

Sampark engages employees across all levels of the organisational hierarchy:

- **Senior Management:** Leads strategic Business-to-Business (B2B) engagements, aligning organisational goals with customer needs.
- **Middle Management:** Facilitates Business-to-Customer (B2C) interactions, translating operational efforts into customer satisfaction.
- **Junior Management:** Participates in call listening sessions to gain insights into customer sentiments and service experiences to incubate customer first mindset.

Service Enhancements through Sampark

- Energy audits and customer safety training sessions
- Introduction of EV charging solutions
- Enhanced bill format enabling greater transparency for both residential and commercial customers
- Kiosk enhancement to streamline customer service delivery
- Cross-functional collaboration with other Adani Group companies to develop integrated solutions for the benefit of the customer.

Key Outcomes

Over 800

employees acitvely engaged in direct customer interactions

658

High Tension (HT)/Private Vendor (PV) customers connected through meetings

500+

kiosk interactions enabled to enhance service experience

5,000+

customers engaged directly through the programme

Samvaad: Listening to our Frontline Staff

We believe our frontline staff are also the touchpoint for the customers and provide senior management direct insight into customers’ sentiments. Samvaad serves as a platform to engage and empower our frontline team, allowing them to voice insights, share challenges, and connect with top leadership directly. This directly boosts our customer service capabilities.

Samvaad Objectives

- Facilitate direct unfiltered communication between the leadership and the frontline staff
- Capture ground-level feedback to inform operational improvements.
- Enhance the culture of inclusion, trust, and shared ownership

Programme Structure

- Monthly Engagement Sessions** chaired by the Top management, CXOs and CEO with participation from diverse frontline teams
- Cross-Functional Working Group** comprising CXO-nominated SPOCs to evaluate inputs and drive implementation

Implementation Framework

- Root Cause Analysis (RCA)** to ensure effective issue resolution
- Feedback Mechanism** with periodic status reviews and follow-ups
- Employee Recognition** through internal storytelling about impactful cases
- Continuous Improvement** through an ongoing, dynamic feedback loop

Provision of Waterproof Tool Bags to Fusemen

CASE STUDY

Context:

During Samvaad session with CXOs, Fusemen shared practical challenges with the cotton tool bags used for daily fieldwork. These bags often failed during the monsoon, leading to damaged or misplaced tools and causing delays in restoring power supply. The lack of durability and weather resistance impacted both efficiency and safety in operations.

Action:

To resolve this, waterproof tool bags were introduced for all 241 Fusemen. These bags offer better protection against rain, improved durability, and a compact design that fits easily in bike dickeys –

making transportation more convenient. The rollout required no additional training and was coordinated at the divisional level to ensure smooth and timely distribution.

Impact:

The new tool bags have significantly reduced tool damage and improved field readiness, especially in adverse weather conditions. Fusemen can now carry and access their tools more efficiently, resulting in quicker response times and fewer disruptions. This change has also boosted morale by showing that field feedback is heard and acted upon, reinforcing a culture of safety and responsiveness.

Customer satisfaction index

During the reporting year, we conducted Net Promoter Score (NPS) survey yielding a score of 19. We will consider it as baseline for improving our scores in future.

Social – Responsible supply chain

Transparent, resilient supply networks

At AEML, we are promoting responsive supply chain, built on ethical practices and mutual growth. Together, with our partners, we cultivate a transparent ecosystem that drives shared success and sustainable value.

UN SDGs linked

Key performance highlights

1,441+
Vendor base

100%
Vendors screened for ESG compliance

Capitals linked

96%
Vendor satisfaction rating for likelihood of doing business

91%
rated the ease of communication with AEML's senior leadership positively

Supplier Code of Conduct

The Supplier Code of Conduct has been established to cultivate responsible supply chain practices. It outlines the minimum expectations from our suppliers regarding compliance with ethical standards, fair labour practices, and environment regulations. Suppliers' conformance with the Supplier Code of Conduct is ensured by our Master Data Management (MDM) team .

Vendor risk screening and ESG compliance

We conduct regular screen and assess our suppliers against the ESG criteria, monitor their performance and implement strategies to minimise supply chain disruptions. During the vendor onboarding, our Master Data Management (MDM) team assessed all vendors for compliance with ESG standards, including the elimination of single-use plastic, proper e-waste management, and safe disposal of hazardous waste. Biannual vendor evaluations via SAP reports (Forms G and H) also assess adherence to Environmental Management System (EMS) practices.

Vendor Feedback and Relationship Management

We conducted a vendor satisfaction survey in FY 2024-25 that yielded positive supplier feedback.

Strengthening vendor relationship

To elevate our relationship with the vendors, we hold regular interactions and performance reviews, establish feedback loops and undertake collaborative initiatives to improve service offerings and capabilities. This structured approach paves way for a sustainable supply chain, in sync with our organisational goals.

Vendor training and capacity building

In FY 2024-25, we educated over 50 vendors on Adani Group safety standards through training and capacity building sessions, focussed on performance and compliance with safety protocols and best practices.

Vendor safety training, monitoring and feedback led to superlative safety performance in FY 2024-25, exemplified through Zero Fatalities and Zero Lost Time Incidents (LTI)

Digital transformation

Since 2023, ARIBA has been fully operational, achieving 100% compliance for all vendor transactions, including document sharing, communication, and invoicing.

Improvement and efficiencies through MDG and ARIBA platforms

- **Centralised Platform:** MDG provides a unified, cloud-based platform for vendor management, standardising and streamlining processes.
- **Enhanced Visibility and Control:** Provides real-time data into vendor performance, inventory, and spending trends, for informed decision-making.
- **Improved Risk Management:** Identifies and mitigates vendor risks, such as financial instability or supply chain disruptions.
- **Compliance Management:** Ensures adherence to company policies and regulatory requirements.
- **Vendor Communication:** ARIBA enhances communication channels, strengthening collaboration and transparency.

Regular interactions

- Central points of contact are assigned to dedicated buyers/ lead buyer categories
- Regular in-person/virtual meetings are conducted with key buyers for progress sharing and problem-solving

Feedback loops

- Constructive feedback loop with robust action plans is triggered based on the outcome of the performance reviews and vendor satisfaction surveys

Collaborative initiatives

- Joint product development (e.g., MCB Connector, Feeder Pillar, Shear Bolt, HT Transition Joints)
- Technology and data sharing via integrated IT systems like ARIBA for transparency

Social – Communities

Shared value, shared prosperity

At AEML, driven by the ethos of social stewardship, we cultivate strong ties with the communities in which we operate. Our multi-faceted CSR initiatives are designed to induce a tangible and lasting positive impact. As a responsible corporate, we are committed to channelising a part of our resources and endeavours for societal value creation across the social, ethical and environmental dimensions.

UN SDGs linked

CSR vision

Improve quality of life for all our communities through integrated and sustainable development.

Result: Consistently achieve goals, resourcefulness which brings desired results

Integration: Working across functions and businesses to create synergy with integrity

Dedication: Working with commitment in the pursuit of our aim

Entrepreneurship: Seizing opportunity with initiative and ownership

Focus Area – Education

Project Utthan Mumbai

- Objective**
- To enhance foundational literacy & numeracy programme to bridge the learning gap
 - To increase attendance and retain enrolment in school
 - To ensure joyful education through engaging teaching-learning methodology for children

The Utthan initiative, launched in September 2021, aligns with the National Education Policy (NEP) 2020. The objective of this project is to address the foundational literacy and numeracy (FLN) challenges among students in BMC schools. The project supports holistic child development through interactive and joyful learning experiences. The students are imparted foundational literacy and numeracy sessions in language and mathematics, through curricular and extracurricular activities to improve the learning outcomes.

BaLA (Building as Learning Aid)

AEML is implementing Project BaLA in 10 BMC schools across Mumbai and Dahanu regions. A total of 56 schools so far have been benefited by transforming their walls and classrooms into tools for conducive, joyful and engaging educational environment.

Other activities under Project Utthan

Distributed **19,000+ scholarship books** to support learning in close to **450 BMC schools**.

Organised **vision check-up programmes**, including eye screenings for **15,145 students**, with **1,000+ spectacles** distributed.

Distributed libraries along with the books in **76 BMC schools**.

Utthan highlights

25,000
students benefited

82
BMC schools covered

- Key outcomes in Utthan student intervention groups**
- Reading proficiency rose from 24.5% to 94.5%
 - Writing proficiency rose from 15.8% to 89.6%
 - Numerical proficiency rose from 25.3% to 97.92%
 - Engagement demonstrated by 99% students
 - Significant holistic development through classroom activities and acquisition of life skills under Utthan Sahayaks

Focus Area – Sustainable livelihoods and women empowerment

Project Swabhimaan

- Objectives**
- Project Swabhimaan is a flagship initiative launched in 2022, with an aim to empower underprivileged women, particularly in Malad-Malwani and Mira Road. The key objectives are to:
- Support the SHG women by promoting entrepreneurship and capacity building on desired skills
 - Help participants build a sustainable business model through mentoring, coaching, and networking opportunities
 - Unite women with an APEX body with a formal registered forum

Financial inclusion of women

The project engaged several women through Entrepreneurship Development Programmes (EDP), Entrepreneur Self-Help Groups (ESHGs) and programmes for financial literacy, resource mapping, business planning, and upskilling. The women are empowered through skill training in various areas such as masala making, jewelry crafting, and handicrafts, to start small businesses.

- Key achievements**
- 4,500+**
women engaged

₹ 3.99 crore
in loans facilitated for 149 SHGs with more than 1,000 ESHG members
- ~1,000**
ESHG members were trained under EDP initiative

Over 340
women launched their own businesses
- 29%**
average income growth, with household earnings rising to approx. ₹ 27,000/month

Health support for Swabhimaan members

Regular health camps were conducted benefited over 3,000 women members, with 2,000 receiving spectacles post-screening.

Swateja Mart

The Swabhimaan initiative supported the business aspirations of its members by establishing Swateja Mart in Goregaon. The mart featured 20 stalls and a cloud kitchen offering a platform for women to sell the food products and handicrafts.

₹ 20 lakhs
earned by ESHG members due to outreach model of Swateja Mart

- Key outcomes for Swabhimaan**
- 29%**
average income increase for participants, with household earnings reaching ₹ 27,119 in Malad-Malwani and ₹ 26,650 in Mira Road

318 SHG
members launched their ventures post skill training
- 96%**
of participants gained financial literacy encompassing financial management, budgeting, and savings

Samajik Suraksha Labh Abhiyan

This project is aimed at integrated tribal development in Wadi, Dahanu. As part of the project, we improved the infrastructure of the gram panchayat, raised community awareness about government schemes, and helped XX individuals avail Ayushman Bharat – a national public health insurance scheme.

Additionally, we also supported XX members of women self-help group (SHGs) by providing skill training and supply high-speed advanced industrial machines to establish stitching studio.

Focus Area – Community Health

Enabling a healthier community

Eye checkup camps

A month-long eye check-up camp was organised in Mumbai, benefiting around 20,000 people, which also included the children under Utthan initiative, underprivileged women from Swabhimaan initiative and taxi drivers under the Vision Care initiative. Post screening, the individuals diagnosed with vision problems received free spectacles.

15,145
Students were screened out of which 1,000+ received free spectacles

2,474
Underprivileged women were screened out of which 2,013 received free spectacles

General health camps

General Health Camps were organised in Bhayandar and Malad regions of Mumbai, offering general health check-ups, blood pressure and sugar testing, vision screening and free medicines and doctor referrals. These initiatives promoted preventive healthcare, especially for senior citizens and underserved groups.

618
Taxi drivers were screened to enhance income growth under vision care initiative

500
community members were benefited through general health camps

Focus Area – Community Development

CSR impact stories

Omkar's transformation through Project Utthan

During the baseline analysis, Omkar Haresh Kanagane, a Grade 5 student at Marathi School No. 2 in Kurargaon, exhibited significant academic and behavioural challenges. He showed little interest in reading and writing and rarely participated in classroom activities, often struggling to stay seated and focussed.

Project Utthan Sahayak Mrs Jayshree Kamble, assigned to Omkar's school, closely observed him, understood his struggles and worked with him patiently and compassionately through personalised counselling and interactive learning activities. Gradually, Omkar started responding positively, attending school regularly and showing interest in reading and writing.

Project Utthan successfully transformed Omkar and several such other students using effective methodologies, focussed on enhancing foundational literacy and numeracy skills.

Gauri's Journey: From the Heart of Dharavi to Entrepreneurial Triumph

Gauri Suresh, a resident of Dharavi, Mumbai – one of Asia's largest informal settlements, harboured a quiet ambition of becoming a successful entrepreneur and elevating her family from poverty. Gauri toiled hard crafting eco-friendly products from discarded materials – transforming waste into wonders, such as hand-stitched jute bags to beautifully-bound diaries. Each piece she created was a testament to sustainability and creativity.

Her dedication garnered attention of Swateja Mart's outreach model, a part of the Swabhimaan initiative by Adani Electricity Mumbai Limited and the Adani Foundation. Recognising her visionary potential, they offered her a major order worth nearly ₹ 10 lakhs for a series of events, including the vibrant Utthan Utsav.

The opportunity became a transformational milestone for her. With the support of the initiative and her growing network, Gauri scaled her operations, employing other women from

her community and creating a local powerhouse of sustainable products.

Gauri's journey from the narrow alleys of Dharavi to boardrooms and business fairs exemplifies empowerment – a dazzling example of talent, opportunity and perseverance.

Governance

Responsible leadership for sustainable growth

Our governance practices shape responsible decision-making and long-term value creation. This ensures our alignment with evolving stakeholder expectations, regulatory developments, and sustainability imperatives. Further, robust board oversight, well-defined policies, and ethical conduct has strengthened our organisational resilience while advancing the UN Sustainable Development Goals. Our responsible leadership is pivotal to building a future-ready utility that delivers inclusive, sustainable growth.

UN SDGs linked

Key performance highlights

100%

Compliance with all applicable environmental and statutory requirements

Zero

Non-compliances and human rights violations

Capitals linked

Governance framework

We have a robust corporate governance structure headed by the Board, fostering transparency and open communication. We follow a one-tier Board that implement business strategies effectively. This drives holistic growth and development, thereby making us stronger than ever. Our Board of Directors brings a balanced and objective perspective, crucial for informed decision-making and solid governance. Further, we have established strong internal controls and audit mechanisms to monitor compliance and address any issues promptly.

Business Ethics and Code of Conduct

Our Employee Code of Conduct, Code for Board of Directors and Senior Management and Supplier Code of Conduct sets forth the required human rights and labour standards for our key stakeholders. We maintain a firm Zero Tolerance approach to any violations of our policies and ethical standards,

reflecting our firm stance against misconduct and reinforcing our commitment to accountability and compliance. Adani Energy Solutions' Board of Directors, as the highest governance body, is responsible for reviewing and approving these policies. Code Conduct Policy is uploaded on website.

We have also adopted a whistle blower policy and established the necessary vigil mechanism for Directors and employees in confirmation with Section 177 of the Act to facilitate reporting of the genuine concerns about unethical or improper activity. The vigil mechanism provides for adequate safeguards against victimisation of whistle blowers and also provides for direct access to the Chairman of the Audit Committee in exceptional cases. No person has been denied access to the Chairman of the Audit Committee. The said policy is uploaded on the website of your Company.

(C) Chairman

(M) Member

Mr Anil Sardana
Chairman and Non-Executive Director

Mr Anil Sardana brings over three decades of experience in the power and infrastructure sectors. He began his career with NTPC before taking on leadership roles across BSES and the Tata Group, where he worked in power generation, systems design, distribution, telecom, and project management. Prior to joining the Adani Group, he served as Managing Director and CEO of Tata Power Group in Mumbai.

Mr Kandarp Patel
Managing Director and CEO

Mr Kandarp Patel holds a Bachelor's degree in Electrical Engineering from Birla Vishwakarma Mahavidyalaya and an MBA in Finance from G.H. Patel PG Institute of Business Management. He has over 20 years of experience spanning power trading, fuel management, regulatory affairs, and commercial operations in the power sector.

Mr Sagar Adani
Non-Executive Director

Mr Sagar Adani joined the Adani Group in 2015 after graduating in Economics from Brown University, USA. He began his career in project execution and is credited with developing Adani Green Energy's solar and wind portfolio.

Mr K. Jairaj
Independent Director

Mr Kalaikuruchi Jairaj is a former member of the Indian Administrative Service with over three decades of experience in public governance, energy, urban development, and infrastructure. He played a key role in establishing the Bangalore International Airport as its Founder Managing Director. His international experience includes working at the World Bank in Washington D.C., focussing on governance in several African nations. He currently serves on the boards of companies in energy, logistics, retail, and more, and actively advises public policy and mentors start-ups.

Mrs Chandra Iyengar
Independent Director

Mrs Chandra Iyengar is a former Indian Administrative Services officer with a distinguished career across departments such as Women & Child Development, Higher Education, and Health, in both the Maharashtra and Central governments. She was instrumental in drafting India's first state policy for women's empowerment. She has served as Additional Chief Secretary for the Home Ministry in Maharashtra and has held Board positions with BHEL and MERC.

Mr Quinton Choi
Non-Executive Director

Mr Quinton Choi is a Director at Qatar Investment Authority, with years of experience in principal investing and investment banking in the power, utilities, and infrastructure sectors. He previously held roles at Barclays and Dresdner Kleinwort and holds a BSc in Economics from the London School of Economics and Political Science.

Mr Kenneth McLaren
Non-Executive Director

Mr Kenneth McLaren is Chief of Investment Execution and a member of the Executive Committee at Qatar Investment Authority. With over two decades of experience in principal investing and investment banking, he joined QIA in 2018 following his tenure at Merrill Lynch, where he led infrastructure M&A for EMEA. He holds a Bachelor of Commerce (Hons.) from Queen's University in Canada and is a CFA charter holder.

Directors' Report

Dear Shareholders,
Your Directors present the 17th Annual Report together with audited financial statement of the Adani Electricity Mumbai Limited (hereinafter "Company" or "AEML") for the year ended 31st March 2025.

Financial Performance

Summary of the financial results is as under:

Particulars	₹ in crore)	
	2024-25	2023-24
Total Income	11,915.92	10,104.77
Total Expenditure	9,872.37	9,221.44
Profit/(Loss) Before Rate Regulated Activities, Exceptional Items and Tax	2,043.55	883.33
Add/(Less): Regulatory Income/(Expenses) (Net)	(1,300.78)	(404.00)
Exceptional items	(1,506.02)	
Profit/(Loss) Before Tax	(763.25)	479.33
Tax Expenses	(207.87)	249.47
Net Profit/(Loss)	(555.38)	229.86
Other Comprehensive Income / (Expenses)		
- Items that will not be reclassified to profit or loss	-	-
- Tax related to items that will not be reclassified to profit or loss	-	-
Effective portion of gains and losses on designated portion of hedging instruments in a cash flow hedge	133.81	(218.59)
Tax related to items that will be reclassified to profit or loss	(46.76)	76.38
Other Comprehensive Income / (Expense)	87.05	(142.21)
Total other Comprehensive Income / (Loss)	(468.33)	87.65

During the year under review, the Company's operating EBIDTA registered at ₹ 2135 crores

The audited financial statements of your Company as on 31st March 2025, prepared in accordance with the relevant applicable IND AS and provisions of the Companies Act, 2013, forms part of this Annual Report.

There are no material changes and commitments affecting the financial position of the Company between the end of the financial year and date of this report.

Performance of the Company

Business Operations

Adani Electricity Mumbai Limited (AEML) is a subsidiary of Adani Energy Solutions Limited, (AESL) which is one of the largest private sector power transmission companies in India with a presence across the western and northern regions of India. AESL is the country's largest private transmission company, with a presence across 16 states of India and a cumulative transmission network of 26,696 ckm and 90,236 MVA transformation capacity.

The Company is a licensee for an integrated power distribution, transmission and generation business that currently serves more than 3 million consumers across a license area of approximately 400 square kilometers in and around city of Mumbai, the world's seventh largest city by size of population.

The Company's market share of Mumbai is approximately 87% by license area, 67% by consumers served and 55% by electricity supplied.

As an organization, AEML believes in the motto – The Power of Service. It is born of the will to make a difference and change things for the better. AEML continues the quest of providing the best quality service to the customers entrusted with the brand motto of the Power of Service.

Distribution Business

AEML’s licensed area in Mumbai spans 400 square kilometers and encompasses the suburban areas of Mumbai (approximately 75 percent of Greater Mumbai) and the Mira-Bhayander Municipal Corporation area in Thane District. The entire licensed area is urban, featuring a mix of residential, commercial, and industrial uses.

1. Consumers:

The number of Consumers using the Company’s network as of 31st March 2025 was 31.84 Lakhs.

2. Network Augmentation:

AEML holds a distribution license granted under Section 14 of the Electricity Act and in force for a period of 25 years starting from August 16, 2011. AEML distributes power primarily through an underground cable network. As of March 2025, the distribution network comprised 5,198 circuit kilometers of high-tension cables and 21,139 circuit kilometers of low-tension cables (including service cables and St. light cables). The power transformer installed capacity increased to 4,577 MVA and distribution transformer installed capacity increased to 5,627 MVA with a total number of Distribution Substations (DSS) of 104. The Company added new Consumer Substations (CSS) totaling 7,207 CSS in its supply area as of 31st March 2025.

3. System Demand:

The coincided peak demand of distribution system was 2,300 MW (June 24) in FY 2024-25 as against 2,163 MW (Jun’23) and 2,058 MW (Apr’22).

4. Operating Performance

AEML measures its operating performance in terms of system distribution losses and reliability indices. AEML system distribution losses were brought down from 5.29% in FY 23-24 to 4.83% in FY 24-25. This is a majorly technical and commercial loss in the distribution system because of heat losses in the various components, meter defects, errors in metering and theft of energy. The superior reliability of AEML network can be gauged from the fact that the SAIDI (System Average Interruption Duration Index) for the whole year is 21.27 minutes. SAIDI is average duration in minutes of sustained interruptions

per consumer. Due to this, the Average System Availability Index (ASAI) remains at 99.9960%.

To optimize the effective utilization of our network and manpower, AEML has installed the Supervisory Control and Data Acquisition System (“SCADA System”). The SCADA System covers all 33-22/11 kV distribution substations and strategic 11/0.4 kV consumer substations for data acquisition and control. AEML has laid optical fiber cable in the licensed area in Mumbai connecting the distribution substations. This optical fiber cable is used as a communications medium for the SCADA System. In addition to ensuring improved reliability and reduced interruption in supply, the SCADA System is used for energy management and for improvement in overall system performance.

5. Distribution Loss and Collection Efficiency:

**The company achieved 101.03% collection efficiency for FY 24-25 as against 101.01% during FY 23-24. **Distribution loss of the Company for FY 24-25 is 4.83% as against 5.29% for the FY 23-24.

6. Sales and Revenue:

The Company sold **10,554 million (PY 9916 million) units of electricity to its own consumers in FY 2024-25. Also, the Tata Power Company Limited (TPC) consumers connected to the network of the Company consumed 1,456 million (PY 1,463 million) units of electricity in FY 2024-25. Open access consumers connected to the network of the Company consumed 355 million (PY 298 million) units of electricity in FY 2024-25. The sales revenue of the Company from Distribution Operation for FY 2024-25 was ₹ 12,010 Crore (PY ₹ 10,139 crore) including wheeling revenue of ₹ 418 Crore (PY 345 crore) based on the tariff determined by the Hon’ble Maharashtra Electricity Regulatory Commission (MERC) for FY 2024-25 vide Multi Year Tariff Order dated March 30, 2023.

** Distribution loss%, Collection Efficiency % and sales units are including AEML SEEPZ Limited

Transmission Business

AEML holds transmission license, granted under Section 14 of the Electricity Act, and is valid for a period of 25 years starting from August 16, 2011. AEML transmission system comprises of nine 220 KV/33 KV EHV stations (with installed transformation capacity of 3,500 MVA) and around 593.53 circuit kilometers of 220 KV lines, including both overhead and underground cable systems. The power received at various EHV stations is supplied mainly through underground cables to AEML distribution

receiving stations for onward distribution to consumers. There are interconnecting 220 KV lines between all EHV stations in AEML licensed area in Mumbai. The transmission system is also connected to the transmission systems of Maharashtra State Electricity Transmission Company Limited and Tata Power Limited at different interconnection points, which helps bringing additional power into Mumbai via the State Grid and strengthens the Mumbai power system. The Company always strives to adopt best practices, along with efforts to keep the high standards of maintaining network system availability. For fiscal year ended 31st March, 2025, the Company registered 99.78% system availability, which is above the norms set by the regulator, thereby company is operating with 100% additional ROE.

During Financial Year of 2025, AEML-T has commissioned 220/33 kV EHV Substation at BKC with installed capacity of 250 MVA, providing reliable and quality power supply in BKC area.

Following DPRs of AEML-T were approved by Regulator in FY 24-FY 25, e.g.

- 220 kV Reactor at Chembur EHV Substation
- 220/ 33 kV AEML Kandivali EHV Scheme
- 220/ 33 kV AEML Dahisar EHV Scheme
- 220 kV AEML BKC –Aarey Connectivity Scheme

AEML-T has submitted DPR to STU for 220 kV EHV Substation at Tilaknagar. AEML-T is currently executing 03 Schemes of 220/33 kV EHV Substations at Chandivali, Kandivali & Dahisar, in Mumbai City, as well as 220 kV cable connectivity at Aarey – BKC EHV Substation , 220 kV Reactor at Chembur EHV Substation 1000 MW HVDC (VSC Based) Aarey-Kudus connectivity Scheme under execution by Adani Electricity Mumbai Infra Limited (AEMIL).

At AEML-Transmission, new technologies are continuously explored and deployed for improvement in operation and maintenance practices.

In FY25 AEML has deployed 1st digital sub-station based on IEC-61850 process bus technology using Sampled Values (SV) for communicating CTs/PTs analog values to protection relays/IEDs and GOOSE message for exchange of Trip signal (I/O’s) between protection relays in control panel to MUs/SCUs in LCC Panel through fiber-based process bus network switches at BKC sub-station.

In FY25 AEML has deployed MPLS-TP technology-based communication of differential protection scheme between Relays across sub-stations and carrier aided tele-protection scheme,

In FY25 AEML is deploying Online sheath monitoring system on 220kV AEML Aarey-Borivali circuits on pilot basis

In FY 25 we continue to use, Auto reclose Scheme for Hybrid lines (EHV Line + Cable) using Line Differential Protection is implemented for 4 Nos. of 220kV lines emanating from Aarey EHV Sub Station, thereby improving System Availability & Reliability.

A. Regulatory updates for AEML:

During the year under review, Maharashtra Electricity Regulatory Commission (MERC) has issued MYT Order (Case no. 184 of 2024) for ARR requirement of Control Period FY2025-26 to FY2029-30.

B. Sustainable Performance Targets & Renewable Purchase Obligation:

Adani Electricity Mumbai Limited (AEML) is committed to achieving excellence in environment performance and promotion, to maintain a clean and healthy environment.

- AEML has increased procurement of renewable energy share in bulk power purchase from 3% (baseline FY19) to 35.20% in FY25 against the target of 30% by FY23 (Target is achieved), 60% by FY27.
- Reduction in GHG Emissions Intensity (Scope 1 and 2) from 2254 (baseline FY18-19) to 683 (i.e. reduction by 69.71%) against the target of 40% by FY2025, 50% by FY 2027 and 60% by FY2029.

AEML is also bound by the RPO Regulations of MERC. AEML always pursues to exceed the target set by Regulator and as a step towards this AEML has signed long term PPA for purchase of 700 MW Hybrid wind solar power to meet its cumulative RPO. The Company has fulfilled and significantly exceeded the standalone Renewable Purchase Obligation target of 29.91% (MERC RPO Target) for FY 2024-25.

C. Safety & Health

The Company always view employee’s health and safety as a priority in the Organization. It always ensures that a rigorous health and safety policy is in place to protect the employees against possible occupational risks and reduces the likelihood of accidents in the workplace.

i. Safety

AEML proudly received prestigious award at the OSH India 2024 competition for ‘Excellence in

Occupational and Health Safety Management System- Technology and Solution’.

Safety remains the cornerstone of our operations, with our unwavering goal of ‘ZERO Harm’. We actively strive to achieve this by integrating advanced technologies and upgrading our facilities to ensure safety, enhance efficiency, and promote sustainability.

This year, a special focus has been placed on aligning workmen’s safety skills with their respective trade skills, as this plays a key role in determining overall safety performance.

To strengthen our safety culture, we implemented ‘SAKSHAM,’ a mandatory safety induction module for all workforce members, and monitored its effectiveness through digital assessments. Additionally, various skill development initiatives were undertaken to align employees with evolving organizational needs. These efforts resulted in 78476 hours of training being delivered through numerous programs.

Under our training and capacity-building initiatives, we developed 142 trainers to uphold 16 safety standards.

We also carried out targeted safety campaigns, including:

- Energy Isolation
- Road Safety

Moreover, we introduced the ‘UDGAM’ Safety Learning Management System as part of our commitment to building a “Culture of Care” and ensuring the safety of our workforce.

Our safety governance structure is spearheaded by functional managers and fosters participation from workers at all levels. Safety directives issued by governance committees and group guidelines are cascaded effectively through six task forces.

Encouraging openness in safety interactions, we strengthened our ‘Safety Interaction (SI)’ module, with management conducting 10103 interactions to enhance the safety culture. As a proactive measure, 4490 near misses were reported and rectified, along with 3412 Hazard Spotting potential scenarios. To further advance towards zero harm, safety inspections 29505 were conducted.

Emergency preparedness remained a priority, with 36 mock drills covering various scenarios carried out to evaluate readiness.

Special efforts were undertaken for vendor engagement and development under Contractor Safety Management. A 100% vendor pre-qualification assessment was completed using an online portal. Ten vendor development sessions were conducted, along with monthly Safety Risk Field Audits (SRFA). A total of 4589 SRFAs were logged, and the contractors’ Severity Index was calculated accordingly.

To foster a strong safety culture within the community, we conducted over 30 awareness sessions in schools, slums, societies, and for consumers. Additionally, four webinars were organized to reach a wider audience.

For premium customers, five safety audits and fire mock drills were conducted to educate teams on emergency responses.

Learnings from group incidents were meticulously documented as Critical Vulnerability Factors (CVF) and shared across the group for horizontal deployment.

Our commitment to a zero-tolerance policy against violations, Life Saving Safety Rules, and established procedures remains steadfast. Numerous awareness and promotional activities were observed, including National Safety Week, Road Safety Month, Fire Safety Week, Electrical Safety Week, and National Lineman Diwas. Workers were recognized and rewarded for their leadership and contributions toward fostering a culture of environmental health and safety. Industry experts were invited to share valuable insights during these celebrations.

ii. Health

Adani Electricity Mumbai Limited provides health facilities to its employees, which are in-line with the best companies engaged in similar business.

In accordance with the provisions of the Electricity Act (CEA Regulation 2011) & IMS, the company not only ensures adherence to the standards and regulatory norms, but it goes well beyond the requirements thereby providing a safe & healthy working environment.

Health of the employees is ensured by the following provisions:

1. Divisional Medical Centers.
2. Tie ups with Hospitals
3. Medi-claim policy for employees & family
4. Comprehensive annual Health check for on-roll employees.
5. Onsite annual medical examination for contract employees.
6. Evaluation of Medical fitness:
 - a. pre-employment
 - b. resuming duty after Sick leave &
 - c. Extension of Service (for non-executive employees).
7. Health Promotional Activities:
 - a. Health talks
 - b. Onsite camps
 - c. Mailers on health days.
8. First Aid trainings.
9. Monsoon preparedness:
 - a. Provision of first aid boxes to team members & at static locations
 - b. Provision of doxycycline for leptospirosis prophylaxis
 - c. awareness sessions on monsoon related ailments & injuries.
10. Occupational role:
 - a. Safety meetings
 - b. Employee rehab post injury/illness (fitness with r/r)
11. Miscellaneous (with admin team)
 - a. Canteen audit/committee.
 - b. Gym
 - c. Water sampling

For FY24-25:

Health awareness

The following awareness sessions (onsite sessions & webinars) were conducted across AEML:

- Fatty Liver
- Today for tomorrow - an initiative for a healthier future
- Tiny Habits - Epic changes
- The PCOD truth

- Hypertension & its link with Stress
- Staying Healthy during Monsoon
- Bone Mineral Density Screening Camp
- The Pursuit of Happiness
- What to expect when your parents are aging
- Secrets to a Sustained Weight loss
- Stretching in Fun
- Cholesterol & Heart disease.
- BreaktheStigma-UnderstandingMentalHealth.
- Breast Cancer Awareness.
- Sugar alternatives for Festive Season.
- Blood donation drive was also conducted across GTD on 21st & 24th June 2024 to celebrate Chairman’s birthday & 700+ units were collected.

Employees across AEML actively participated in these sessions & appreciated our efforts towards increasing awareness about various health conditions.

Capacity & Capability building for employees in terms of providing onsite First aid.

- Medical team conducts regular First aid training sessions for identified First aiders in various divisions.
- Participants are imparted knowledge on assessing and managing general & workplace injuries & emergency medical situations in this half a day session. Hands-on-cpr training is also provided to the participants.
- 2450 employees participated in First aid training sessions this year.

Comprehensive Annual medical examination for on-roll employees.

- We had onboarded “Quantum Corp Health” as our partner for FY2024-25 for AHC for on-roll employees. 3390 (92% of employees underwent the health check through their Network.
- The medical team has started reaching out to employees with uncontrolled parameters for NCD risk reduction.

Onsite annual medical examination for contract employees

- Onsite annual medical examination for contract employees was conducted thru “Healthspring”.

89% contract employees underwent the onsite medical examination.

- Employees are counseled on a one-on-one basis about out-of-range parameters & suggested curative measures.

Planning & implementation of medical initiatives as a part of Monsoon preparedness:

- As a part of Monsoon preparedness, a total of 280+ First-Aid Boxes were replenished.
- Doxycycline was distributed to 4,000+ outdoor employees (including Contract employees) for prophylaxis of Leptospirosis.
- Awareness sessions on First Aid and Monsoon illnesses were conducted at 20+ BU/depots and were attended by 2,000+ employees.
- Debriefing done to all reporting managers/employees regarding emergency response services.

D. Learning and development

Learning and development are about creating excellence in building a culture of continuous learning and upskilling for individuals and organization to learn and grow. The Company has a world-class infrastructure at two locations in its supply area - Adani Electricity Management Institute (AEMI) and Versova Technical Training Center (VTTC), which are well equipped with Hi-Tech infrastructural facilities for Blended learning by conducting different courses on technical as well as management subjects covering the needs of Indian Power and allied Energy sectors. For easy access of learning initiatives, two additional training spokes are created in Magathane & Tilak Nagar division. Adani Electricity Management Institute (AEMI) is certified as A-Grade (Excellent, Category-I) by Central Electricity Authority(CEA) Got. of India.

Throughout the year under review, the company has conducted various initiatives along with the other programs during the planned learning calendar for its employees. The programs were conducted by internal as well as external faculties. The initiatives included programs like A Marvels - for Leadership development, Understanding Financial Aspects of the Utility Sector, Technical programs like Roof Top Solar System, MERC Regulations, SCADA & ADMS, Open Access and its related regulations & many more.

AE-Varsity: To constantly meet the evolving needs of its employees, AEML has launched a knowledge management portal - AE-Varsity, to cater to all the

learning needs of the employees. 200+ videos of conducted sessions have been uploaded on the portal with additional features like the HR HUB-Monthly HR Newsletter and Podcast, Gyaan Sagar- a knowledge-sharing platform, Learning Calendar, Highlights, Awards & Accolades, Upcoming Programs, Photo gallery etc. 8 Video Modules on Smart Meter replacement were also uploaded on the portal.

eVidyalaya Percipio: To develop a culture of continuous learning, employees are encouraged to self-learn through eVidyalaya Percipio platform. The average learning hours per user is 133. Our executives have attended various bootcamps, live events, and Leader camps.

Analytical Orientation – To ensure our senior and middle management is equipped with key analytical skills, we organized extensive workshops on analytics using customer data.

Learning & Development Initiatives:

Takshashila – Adani Executive Leadership Programme (AELP)

1 participant had completed this leadership Programme, it is a comprehensive leadership development programme being done in collaboration with the Indian School of Business (ISB). Delivered face-to-face at ISB campus in Hyderabad, it is exclusively designed for ‘Function Managers’ in Adani Group.

NorthStar 4.0

9 participants of AEML had completed Post Graduate Diploma in Business Management by Emeritus in collaboration with Columbia Business School and Tuck Executive Education.

Adani Marvels

Adani Marvels is a one-year duration leadership transformation program that was launched in AEML in the year 2022. 39 participants had completed Adani Marvels program this year. This program has been launched in collaboration with Indian Institute of Technology (IIT), Bombay. The focus of the program is majorly on the following components:

- Understanding Self
- ABCF Competencies – Strategic Orientation; Entrepreneurial Mindset; Outcome Orientation & Transformational Mindset.

The program architecture includes Assessments such as Predictive Index & Pre & Post-Program Multi Ratter feedback (360-degree survey) for creating

Individual Development Plan. The participants attend a 4-day Personal Discovery workshop followed by the monthly Connect sessions for discussing the status on personal/professional goals in respective batches. 10-day IIT Module is also included in the program that covers topics like Finance for Non-Finance; Adoption of Digital Transformation; Business Analytics & Strategic & Market Leadership. In addition, Percipio courses, Job Shadowing, Coach Connect, Interaction with Seniors, Book Reading, Journal Writing, Involvement in CSR, Visit to Mundra, Khawda & sites of other Adani businesses forms an important part of the program. Live Business Projects with respect to current business need/issues in the organisation are assigned to cross functional teams & these projects are continuously monitored by the senior leadership team. The program is initiated with an Initiation ceremony & concludes with the Valedictory ceremony.

Young Manager Program

This exciting new initiative at Adani Group is designed specifically for employees who are taking on a people management role for the first time.

The YMP program focuses on providing the first-time managers with the essential skills and knowledge they need to be a successful people manager. It includes a wide range of topics related to people management, including:

- Building strong relationships with their team members
- Providing effective coaching and feedback
- Setting goals and managing performance
- Creating a positive and productive work environment

Transitioning to a people management role can be challenging. The YMP aims to equip them with the tools and competencies they need to excel in their new role.

With the goal of reaching approximately 1,000 first-time people managers across all Adani locations, the YMP has the potential to significantly enhance our Group's overall management capabilities.

The YMP is an "integrated learning intervention," including classroom sessions, online modules, and Book review. We'll also be utilizing eLearning modules from Skillsoft Percipio to support the learning journey.

Additional Facility in Simulation Lab at Adani Electricity Management Institute (AEMI)

Simulation Lab at AEMI having working models with simulation facility on Power Distribution at various voltage levels, smart meter working, protection relays, industrial controls, motor starters, Fault Passage Indicators, Meter Board Wiring, CT operated meter working & Transmission network. Various models of Power Transformer, Gas Insulated Substation, Cable samples of voltage levels 220KV, 33KV, 11KV & 440V, Cable accessories for Medium and Low Voltage are available in this simulation room for training purposes.

This facility helps to train internal and external participants to understand various aspects of power distribution.

In this year we have added a simulation facility for training on working of Distance Relay which is used in Transmission Systems

Certification Course for Load Dispatchers

A structured training program consisting of CEA prescribed syllabus for theoretical sessions followed by hands on training at NOC. Summative assessment was conducted at the end of Phase -1. Candidates will undergo OJT, as well as Phase II of the course.

Candidates visited Western Region Load Dispatch Centre as a part of this course, where the experts at these centres explained the working of respective grids.

OEM Technical Trainings for Employees

Latest technical trends and technologies on field as well as update / upskill them, classroom sessions / webinars (14 Nos) were arranged in coordination with OEMs. This helps engineers to stay updated with the latest technological changes in India as well as abroad as well as apply the technology in AEML.

Sessions like AR / VR by M/S Plutomen and Green switchgears, Digital Asset Management & Power Quality by M/S Siemens India Ltd are some of them.

Instruconnect-2024 Exhibition Cum Conference for Electrical Engineers.

2nd Edition of Instruconnect-2024 Exhibition Cum Conference was organised at AEMI in coordination with Diagnostic Cell/ OEMs with exhibition for 2 days from 5th June to 6th June 2024. 40 Leading brands (International/national) were exhibited by 15 partners. 400 Nos participants made the event splendid and memorable thus meeting the event objectives.

Grid Connected Roof Top Solar System in collaboration with NPTI

Two Day session on Grid Connected Roof top solar system was conducted by NPTI team on 10th and 11th February 2025.

This session was attended by 40 participants from AEML, and certificate was issued by NPTI to the participants.

Adani Digital Dexterity Program

The curriculum on Digital Dexterity is curated as per the organization requirements to embrace the future and make employees as Future Ready. Overall, 100% employees are covered under the Digital Dexterity Program.

i. ISO Journey :

The Quality journey of AEML began in 1997, when the company achieved its first certification for ISO 9001 (Quality Management System). Several milestones have since been achieved along this ISO journey. The businesses are certified as below:

SN	System	Objective	AEML-G	AEML-T	AEML-D
Management Standards			Certificaton Since		
1	ISO 9001:2015	QMS: Ensure Quality in processes for desired output and reliable customer services	1998	1997	1998
2	ISO 14001:2015	EMS: Address impact of operation on environment, Climate change, ensuring Environment compliances	1999	2010	2014
3	ISO 45001:2018	OHSMS: Promoting Occupational Health & Safety practices / compliances	2008	2010	2020
4	ISO 50001:2018	EnMS: Address Climate change and Energy Management compliance	2011	2021	2020
5	ISO 55001:2014	AMS: Asset Lifecycle management	2016	2016	2014
Risk Protection Standards			Certificaton Since		
6	ISO 27001:2013	ISMS: Ensuring data security	2008	2018	2012
7	ISO 27031:2011	IRBC: Information & communication technology readiness for business continuity	2019	2021	2021
8	ISO 22301:2019	BCMS: To safeguard against disruptive events and ensure business continuity	2019	2022	2021
Business Excellence Standards/Guideline			Certificaton Since		
9	ISO 26000:2010	SR: Social Responsibility Assessment & compliance	2019	2022	2022
10	SA8000:2014	SA: Promotion of work culture fostering employee stisfaction, ethical business practices & Social Accountability Compliance	2007	In- process	In- process
11	ISO 20000-1	ITSM: IT Service Management	2021	2021	2021
12	ISO / IEC 17025	Accreditation for testing laboratory by National Accreditation Board of Laboratory (NABL)	2013	-	2009
13	Certificate	Single Use Plastic Assessment Certificate	2021	2023	2023
14	Certificate	Zero Waste to Landfill Certificate	2021	2023	2023

E. Business Excellence: Business Excellence Journey at AEML

Aligned with our vision to be a world-class leader and our aspiration to institutionalize a culture of Business Excellence, the Generation, Transmission & Distribution businesses of AEML have made rapid progress in achieving these goals. The company has adopted a world-class approach, to improve the maturity and capability of its processes, leading to improved business results. These approaches will help in meeting our Strategic and Operational objectives, besides meeting the expectations of our Stakeholders.

The foundation of our Business Excellence journey at AEML, is based on the following pillars:

SN	System	Objective	AEML-G	AEML-T	AEML-D
15	Certificate	Water Efficiency Management System	2021	-	-
16	Certificate	Biodiversity assessment study for all 3 seasons. Rainy, summer, winter season completed.	2022	-	-
17	5S Certificate	Better look of workplace, Develop a greater safety awareness, Quick retrieval of items, Reduce wastage, Neat, clean and Hygienic workplace	"2020 Platinum"	"2014 JUSE"	"2022 AWMA"

ii. Structured Problem-Solving Methodologies

AEML has adopted multiple approaches and tools, aimed at engaging its employees across the organizational hierarchy viz. a) Lean Six-Sigma, b) Quality Circle c) Adani Workplace Management System (AWMS). In this process, the Company have created a bank of over 290 Lean Six-Sigma Green Belt executives, over 90 Six-Sigma Blackbelts, over 425 employees trained on Quality Circle tools and techniques, over 450 ISO internal auditors, 25 ABEM assessors and over 105 AWMS internal Assessors. Multiple improvement projects have been undertaken by the respective teams under each of these approaches, leading to greater maturity of our processes and creating a culture of structured problem solving by engagement of our employees. The movement has enabled the company to gain top recognitions at Regional, National & International competitions.

iii. ABEM Journey at AEML

Ever since the launch of "Adani Business Excellence Model" (ABEM), a series of improvement initiatives were identified and completed, based on Self-assessment exercise conducted for the ABEM categories. These initiatives are led and mentored by senior leaders and well supported by various support function teams. The employee base of over 1600 executives has been formally sensitized to the need for Business Excellence and the salient features of ABEM. Multiple rounds of assessments have been done leading to continual improvements.

C. Rewards & Recognitions

- AEML was honored with the "Corporate Patronage Excellence Award" by QCFI Mumbai Chapter in recognition of ongoing commitment to fostering a culture of Quality and Business Excellence, by practicing the various quality initiatives with a strong belief in the QC methodology for people

development and enhancing operational and business performance.

- 6 "Par-Excellence" and 2 "Excellent" awards in 10th National Conclave on 5S.
- 21 "Gold" awards in Chapter Convention on Quality Concept (CCQC) 2024. Also, won 6 "Gold" awards for 5S at Home in CCQC.
- 3 "Par Excellence" and 5 "Excellent" awards in National Convention on Quality Concept (NCQC) 2024.
- OSH India Award - "Excellence in Occupational Health & Safety Management System" award in the Technology and Service category.
- Arogya World's Healthy Workplace Award - Silver level Certification
- Recognition on Global Platform, winning the Gold Award at the prestigious Brandon Hall HR Excellence Awards 2024 in Florida, USA
- Large Scale Enterprises by ET HRWorld from The Economic Times award – "Gold" award for Best Learning Culture in an organization

F. Corporate Social Responsibility

Adani Electricity Mumbai Limited (AEML), along with Adani Foundation, is committed to fostering inclusive and sustainable development by integrating social, economic, and environmental goals into its core CSR strategy. The Company undertakes initiatives focused on education, healthcare, women empowerment, community infrastructure, and skill development, transforming lives and empowering communities, especially in areas surrounding its operations.

AEML's CSR initiatives demonstrate a strong commitment to sustainable and inclusive community development. Through structured and impactful programs in education, healthcare, infrastructure, women empowerment, and youth skilling, AEML is helping to create healthier,

more educated, self-reliant, and empowered communities across Mumbai.

1. Education – Project Utthan (Mumbai)

AEML's Utthan initiative, launched in September 2021, addresses foundational literacy and numeracy (FLN) challenges among students in BMC schools. The project aligns with the National Education Policy (NEP) 2020 and supports holistic child development through interactive and joyful learning experiences.

- Impacted over 25,000 students across 82 BMC schools in Mumbai.
- Offering foundational literacy and numeracy classes in language and math through curricular and extracurricular activities to the students.
- During existing year, introduced the BaLA (Building as Learning Aid) initiative in 10 BMC schools and overall, covered 56 schools to transforming school walls and classrooms into engaging educational tools.
- Distributed 19,000+ scholarship books to support learning in close to 450 BMC school.
- Organized vision check-up programs, including eyescreenings for 15,145 students, with 1,000+ spectacles distributed.
- Distributed libraries along with the books in 76 BMC schools.

2. Health Care Initiatives

Adani Electricity and Adani Foundation, in collaboration with Vision Spring and HelpAge India, conducted extensive health and eye care outreach programs.

- A month-long Eye Check-up Camp in Mumbai benefited nearly 20,000 people, including:
 - o 15,145 students screened under the Utthan project and distributed 1000+ spectacles.
 - o 2,474 underprivileged women under the Swabhimaan initiative; 2,013 received free spectacles.
 - o To enhance income growth of the Taxi drivers, under vision care initiative,

screened 618 Taxi driver beneficiaries from the Mumbai.

- General Health Camps in Bhayandar and Malad served over 500 community members, offering:
 - o General health check-ups
 - o Blood pressure and sugar testing
 - o Vision screening
 - o Free medicines and doctor referrals

These initiatives promoted preventive healthcare, especially for senior citizens and underserved groups.

3. Community Infrastructure Development

In response to a request from Ramkrishna Sikshan Mandal Trust, Mumbai Adani Electricity and Adani Foundation improved infrastructure at a school for physically handicapped students:

- Constructed a 4th floor to expand capacity.
- Upgraded sanitation facilities and installed safety features (ramps, handrails).
- Renovated classrooms to create a more inclusive and accessible learning environment.

This initiative significantly improved the school's infrastructure and supported better educational outcomes for especially abled students.

4. Women Empowerment – Project Swabhimaan

Launched in 2022, Swabhimaan is a flagship initiative to empower underprivileged women, particularly in Malad-Malwani and Mira Road.

- Engaged 4,500+ women, focusing on:
 - o Entrepreneurship Development Programs (EDP)
 - o EntrepreneurSelf-Help Groups (ESHGs)
 - o Financial literacy, resource mapping, business planning, and upskilling
- Achievements:
 - o ₹ 3.99 crore in loans facilitated for 149 SHGs with more than 1000 ESHG members
 - o Under EDP initiative trained close to 1000 ESHG members

- o More than 340 women launched their own businesses with the help of Swabhimaan project.
- o 29% average income growth, with household earnings rising to approx. ₹ 27,000/month.
- Health support includes regular camps for Swabhimaan members, benefitting over 3,000 women, with 2,000 receiving spectacles post-screening.
- Provided business opportunity and established Swateja Mart in Goregaon with 20 stalls and a cloud kitchen, offering a platform for women to sell the food products and handicrafts. And through the outreach model of Swateja mart ESHG members made close to 20L rupees, through the initiatives.

5. Youth Skilling and Livelihood Development

The Youth Skilling Program targets 4,500 youths across Mumbai, equipping them with industry-relevant skills for employment.

- Training focuses on AI, VR, technical skills, and soft skills over a 10-day intensive offline program.
- Locations include ASDC Churchgate, Bandra Govt Polytechnic, Dombivli, and others in partnership with NGOs and ITI (in MOU stage).
- Includes interview preparation, aptitude tests, and career mentoring.
- 3,000+ youths placed in various companies including Qess Corp and Amazon, earning an average monthly income of ₹ 25,000.

This initiative builds employability, enhances income potential, and supports long-term career growth.

Annual Return

The Annual Return of the Company as on 31st March 2025 is available on the Company's website and can be accessed at <https://www.adanielectricity.com/Investor-Relations>.

Reserves

The Company has not transferred any amount to the General Reserves during the year under review.

Subsidiary Companies

During the year under review, North Maharashtra Transco Limited, wholly owned subsidiary was incorporated on 2nd August 2024. The Company entered into entered into Business Transfer Agreement ("BTA") with North Maharashtra Power Limited ("NMPL") on 26th September 2024 for carving out Adani Dahanu Thermal Power Station (Generation business of the Company) by way of a slump sale on a going concern basis. Further, NMPL entered into Securities Subscriptions Agreement with Adani Properties Private Limited (APPL) and allotted 1,00,00,000 Equity shares of ₹ 10/- each aggregating to total value of ₹ 10 Crore upon conversion of Compulsorily Convertible Debentures held by APPL.

Accordingly, APPL became holding Company of NMPL by virtue of its 99.90% Equity Shares holding of NMPL and the Company ceases to be holding Company of the NMPL w.e.f. 28th September, 2024.

During the year under review, the Company entered into a Share Purchase Agreement dated 2nd May 2024 with Windson Projects LLP for acquisition of 100% equity of Pointleap Projects Private Limited (Pointleap). Hence, Pointleap became wholly owned subsidiary of the Company w.e.f. 3rd May 2024.

Also, the Company entered into Share Purchase Agreement dated 17th January 2025 with Adani Properties Private Limited for acquisition of 100% equity shares of Superheights Infraspac Private Limited. Superheights Infraspac Private Limited became wholly owned subsidiary of the Company w.e.f. 11th February 2025.

As on date, Adani Electricity Mumbai Infra Limited, AEML SEEPZ Limited, Superheights Infraspac Private Limited and Pointleap Projects Private Limited are subsidiaries of the Company.

A statement containing the salient features of the subsidiary is provided in AOC-1 as Annexure A.

SECRETARIAL AUDIT REPORT

FOR THE YEAR ENDED MARCH 31, 2025

[Pursuant to Section 204 (1) of the Companies Act, 2013 and Rule No. 09 of the Companies (Appointment and Remuneration Personnel) Rules, 2014]

To
The Members,
ADANI ELECTRICITY MUMBAI LIMITED
Adani Corporate House, Shantigram, Near Vaishno Devi Circle,
S. G. Highway, Khodiyar Ahmedabad 382421, Gujrat, India

We have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by Adani Electricity Mumbai Limited (hereinafter called "the company"). Secretarial Audit was conducted in a manner that provided us a reasonable basis for evaluating the corporate conducts/ statutory compliances and expressing our opinion thereon.

Based on our verification of Adani Electricity Mumbai Limited's books, papers, minute books, forms and returns filed and other records maintained by the company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, we hereby report that in our opinion, the company has, during the audit period covering the year ended March 31, 2025 complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

We have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the year ended March 31, 2025 according to the provisions of:

1. The Companies Act, 2013 (the Act) and the rules made thereunder; Company has complied with the provisions of the Act to the extent of its applicability;
2. The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the rules made thereunder- Not applicable; Not applicable
3. The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder; Company has complied

with the provisions of the Act to the extent of its applicability;

4. Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings; Company has complied with the provisions of the Act to the extent of its applicability;
5. The following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 ('SEBI Act')- Not applicable
 - (a) The Securities and Exchange Board of India (Substantial Acquisition of Shares a n d Takeovers) Regulations, 2011;
 - (b) The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 1992;
 - (c) The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009;
 - (d) The Securities and Exchange Board of India (Employee Stock Option Scheme and Employee Stock Purchase Scheme) Guidelines, 1999;
 - (e) The Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008;
 - (f) The Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993 regarding the Companies Act and dealing with the client;

- (g) The Securities and Exchange Board of India (Delisting of Equity Shares) Regulation, 2009; and
 - (h) The Securities and Exchange Board of India (Buyback of Securities) Regulations, 1998;
6. Other laws specifically applicable to the company:
- (a) The Electricity Act, 2003 and the rules & regulations made thereunder; Company has complied with the provisions of the Act to the extent of its applicability;

The adequate systems and processes are in place to monitor and ensure compliance with general laws like labour laws, environmental laws etc. to the extent of their applicability to the Company.

We have also examined compliance with the applicable clauses of the Secretarial Standards issued by the Institute of Company Secretaries of India.

During the period under review the Company has complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above except passing of certain resolutions by way of circulation instead of duly convened board meetings as per opinion obtained by the Company.

We further report that, the Board of Directors of the Company is duly constituted with proper balance of Non-Executive Directors, Executive Directors and Independent Directors. The changes in the composition

of the Board of Directors that took place during the period under review were carried out in compliance with the provision of the Act.

Adequate notice is given to all directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent at least seven days in advance, and system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting.

All decisions at Board Meetings are carried out unanimously as recorded in the minutes of the meetings of Board of Directors.

We further report that, there are adequate systems and processes in the company commensurate with the size and operations of the company to monitor and ensure compliances with applicable laws, rules, regulations and guidelines.

We further report that, during the audit period company has passed special resolution stating **"To consider carving out Adani Dahanu Thermal Power Station"** as on 12th August, 2024 and MGT-14 was filed on 21/08/2024 for the matter stated.

Annexure-D

Disclosure under Section 134(3)(m) of the Companies Act, 2013, read with Rule 8 of the Companies (Accounts) Rules, 2014 regarding Conservation of Energy and Technology Absorption

A. Conservation of Energy

Distribution Business

a. Energy Conservation measures undertaken:

At AEML, our core commitment lies in advancing energy efficiency as a strategic approach to tackle critical challenges such as affordability, enhancing supply security, and mitigating the impacts of climate change. Through our Energy Conservation (EC) and Energy Efficiency (EE) programs, we aim to cultivate public awareness around the importance of responsible energy use and conservation. These initiatives not only help reduce Greenhouse Gas (GHG) emissions but also promote environmental sustainability.

As a customer-centric organization, AEML continues to promote energy-efficient technologies to contribute to a sustainable future while enhancing the economic efficiency of our consumers. Throughout FY 2024-25, AEML executed a broad spectrum of initiatives across various sectors, reaffirming our commitment to energy efficiency.

As a power distribution utility, we firmly believe that our customers, particularly those in the industrial sector, possess the potential to both contribute to and reap the rewards of heightened energy efficiency. Embracing industry best practices stands to not only enhance energy efficiency within energy-intensive sectors but also to mitigate pollution levels. Continuing our commitment, the Company has persisted in providing complimentary walkthrough energy audit services to consumers, aiming not only to pinpoint energy-saving opportunities but also to bolster awareness surrounding energy efficiency. Through this initiative, we have served over 27 consumers, identifying potential savings of approximately 1.2 million units (MUs) for these consumers in FY 24-25.

i. Under large scale DSM program, AEML continued to offer its residential/schools/colleges/

hospital/trust type customers, with an approved quantity of 50,000 Nos super-efficient (Brush Less Direct Current) BLDC ceiling fans i.e. Bureau of Energy Efficiency (B.E.E.) certified 5 Star rated ceiling fan. In this financial year the Company has distributed 150+ new BLDC technology, 26-30 watts ceiling fans including brands like Bajaj, Orient and superfan, resulting in annual savings of 0.32 million units (MUs). Till date total replacements are 2,220+ fans resulting in savings of 1.22 million units (MUs).

- ii. Following a similar approach, AEML has implemented another significant initiative known as the "large-scale DSM program," aimed at replacing 20,000 inefficient refrigerators belonging to AEML residential consumers. Throughout the financial year 24-25, the company successfully replaced 260+ old inefficient refrigerators with 5-star-rated models, resulting in savings of 1.1 million Units (MUs). To date, a total of 3175+ refrigerators have been replaced, leading to cumulative savings of 5.2 million units (MUs). In FY24-25, B.E.E has revised star rating norms and AEML is following these norms for DSM programs.
- iii. Both DSM programs are actively promoted not only through digital platforms such as SMS, email, website, and online news media but also through print media, under the banner of "BEAT THE HEAT," to expand the outreach of energy efficiency and conservation efforts to AEML customers.
- iv. Additionally, through the "Urja Samvardhan Upakaram" program, the Company persistently conducts workshops across various academic institutions, commercial offices, banks, hospitals, industrial estates, housing societies, and slum areas. This year alone, the company reached out to 500+ individuals through on-site, online, digital, and telephonic

platforms, educating them on the importance of energy conservation and how to effectively conserve energy.

Impact of measures outlined at (a) above on Energy Consumption:

Energy savings estimated due to the above initiatives taken till this financial year are 1.42 million units amounting to approximately 1032.34 tons of CO₂ reduction.

The capital investment on energy conservation equipment:

In FY 2024-25, approx. ₹ 0.94 lakhs subsidy is granted by the Company for residential consumers under 5-star BLDC ceiling fan program and ₹ 11.7 lakhs subsidy for 5-star Refrigerator program.

Rooftop solar plant (BESS) at Borivali office:

Adani Electricity's pilot project with a 100kW rooftop solar plant coupled with battery storage system (BESS) at AEML's Borivali office, significantly reduces reliance on the grid by generating clean solar power during the day and utilizing stored energy at evening or peak demand hours, achieving in reduction of office electricity costs by 60% and promoting sustainable energy conservation. In the financial year 24-25 0.1 MU are generated through roof top solar. Additionally, the BESS provides a dependable backup source, ensuring uninterrupted operations even during grid disruptions. Adani Electricity plans to expand this technology across its offices and substations within two years, replacing polluting diesel generators with cleaner and more economical BESS solutions.

In addition to above, grid connected 245 kWp Rooftop PV Solar Plant installed at Aarey, Versova and Ghodbunder EHV substations to reduce use of conventional energy in offices and substations. 0.26 MUs are generated through roof top solar in FY24-25.

Rooftop Solar (RTS) under PM Surya Ghar Muft Bijli Yojana:

In the financial year 2024-25, AEML actively supported the implementation of the PM Surya Ghar Muft Bijli Yojana, a Government of India initiative aimed at promoting rooftop solar adoption for residential consumers. Under this scheme, 92 rooftop solar installations were

successfully completed within AEML's licensed area, with an installed capacity of 1605 kWp. These systems collectively generated approximately 0.13 million units (MUs) of clean energy during the year.

To ensure widespread adoption, AEML undertook focused initiatives at the DISCOM level to promote and publicize the scheme across its service area. These included awareness campaigns, customer support facilitation, and coordination with relevant stakeholders, thereby encouraging residential customers to participate in this sustainable energy initiative.

EV charging Infrastructure under DSM Scheme:

As part of its commitment to clean mobility and demand-side management, AEML expanded its Electric Vehicle (EV) charging infrastructure during FY 2024-25. Under the DSM (Demand Side Management) scheme, the company successfully installed 417 EV chargers across its network area and a total of 577 Nos. DSM charges installed in our network area till FY 24-25, catering to both 2-wheeler and 4-wheeler electric vehicles.

These chargers were primarily deployed in common areas of residential societies, encouraging EV adoption by ensuring convenient access to charging points. The installed infrastructure collectively accounted for an electricity consumption of approximately 0.33 MUs in the reporting year. This initiative not only supports the transition to electric mobility but also contributes to peak load management and energy efficiency within the distribution system.

In addition above, 754 customers have opted for LTEV individual connections with a load of 8.9 MW in this financial year and taking total count of LTEV connection to 2244 with approximate load of 30 MW till FY24-25.

B. Technology Absorption

Distribution Business

Adani Electricity Mumbai Limited envisions satisfied consumers with the highest quality of service and an uninterrupted power supply. We believe in the motto - The Power of Service. It is born of the will to make a difference and change things for the better, so that everyone can power their dreams and live a stress-free life. Adani Electricity continues the

quest of providing the best quality service to the customers entrusted with the brand motto of the Power of Service. The company is committed to creating new & innovative approaches in operations and services that contribute to the development of the customers.

The technologies AEML pursuing resulted in several benefits as described briefly hereunder:

- Green Switchgear Initiatives supporting ESG Goals:**
This refers to efforts to make electrical switchgear systems more eco-friendly by reducing their environmental impact. AEML has explored SF6-free technologies and proposed green switchgear using pure dry air/AirPlus in a sealed system as a pilot project. This avoids using 45 kg of SF6, equivalent to 1,057.5 metric tons of CO₂e over 100 years. With pilot success and regulatory support, AEML aims to further standardize green switchgears in line with its ESG goals.
- Ultra Compact Tower Type Secondary Substations:**
As an engineering solution to the growing competitive environment and trends of cutting down space allocation to Electrical Substation, tailor made (Customized) Ultra Compact Substations-Tower Type (Vertically oriented) designs are not only small in footprint, but also easy to install and yet are reliable and safe for commissioning in midst of public places. With 40 sq mtr space requirements for typical 11/0.4 kV Substation got compacted to 2 sq mtr with due compliance of standards, safety as well as reliability. Typical space saving potential is 95 % compared to conventional and other compact options considered. With this design, AEML gets upper hand in competitive scenario in acquiring premium customers indicating Utilities' agility with enhancing brand value. One such substation is commissioned in Vandre division and based on site specific requirements; this compact design shall be deployed horizontally.
- Power line carrier communication for last mile connectivity:**
Power Line Carrier Communication (PLCC) enables efficient data transmission using existing power lines. At Adani Electricity Mumbai Ltd. (AEML), a pilot was conducted on the underground network to map meter cabins

with their substations. PLCC eliminates the need for extra communication infrastructure, making it cost-effective and scalable. The pilot supports broader application across distribution networks, with potential for real-time monitoring, control, and fault detection, enhancing operational efficiency.

- Image Analytics:**
Thermal Imaging through Fuseman App – Technology evaluation and deployment of Mobile Thermal Camera for IR thermography of LV assets. 200 nos. of Mobile Thermal Cameras have been procured and deployed through a mobility platform for predictive analytics using OCR and workflow management. Main advantages are low cost, faster anomaly detection and rectification.
- Bus Risers schemes planning, designing and execution Support for Highrise LV Distribution to the Developers:**
End-to-end support has been provided to the Developer's team right from the planning stage till the commissioning of the schemes. Almost 40 plus projects are currently under progress. This value-added service plays a critical role not only for Customer Acquisition & retention but also helps with developing standard networks with better reliability, safety, and compliance with regulatory guidelines.
- New Theft Prevention Pillar Design:**
Introduction of a new compact theft proof feeder pillar design to facilitate easier reach and installation in the narrow lane streets to prevent unauthorized access & tapping of electricity.
- Street lighting innovation:**
Alternative to high mast lights: Introduction of new cross arm brackets design with smaller height poles up to 9 mts to cater illumination of smaller & congested junctions as an alternate for existing high mast installation practice. This design resulted in saving footprint by 60% & Operational cost by 40% with optimum lux levels and easier maintenance. These are currently deployed in Mira Bhyandar division.
- Drones for Transmission Line Inspection:**
PoC completed, Tender in progress. Autonomous drones equipped with high-resolution cameras and LiDAR sensors.

Faster and safer inspection of transmission towers, insulators, and conductor conditions. AI-driven analytics for crack detection, vegetation overgrowth, and clearance violations. Reduces risk to human inspectors and ensures consistent documentation and reporting.

- Technical study project with IIT Ropar:**
IIT Ropar was appointed to study the Re-validation of cable operation limits to reduce the HT faults and plan priority replacement. Study scope was Steady state & transient condition simulation of cable ampacity based on soil and weather parameters. ML Modelling to arrive at peak current for all 11 kV sections. With LST simulation, cable ampacity was derived through simulation and ML modelling. With high soil thermal resistivity condition, cable to be de-rated further. We have identified 45 Sections for derating during Summer peak in FY 26.
- Others:**
 - Design and deployment of special connectors for MCBs and Meters to curb the hot spot cases. For FY 2024-25, 20,000 connectors have been installed resulting in approx. saving of 0.98 MUs. Patents applications filed for 2 types of connectors.
 - Introduction of Battery-operated tools and tackles to save 50% of activity time, increased accuracy and enhance safety on site.
 - Compliance with Energized Work Rules and requirements of NFPA 70E to have effective measures 35 Nos Infrared Thermography Windows are deployed across all Dry type

Power transformers to reduced downtime by 25% and cost by 30%.

- System detects unplanned outages and auto-sends SMS notifications to affected consumers. This improves transparency and reduces the volume of incoming complaints.
- STLT Smart meters are used to automate streetlight ON/OFF operations based on preset schedules. This removes manual intervention and enhances energy efficiency.

Transmission Business

- a. Theeffortsmadetowardstechnologyabsorption:
- Digital Sub-Station: Fiber based protection and tele-protection system
 - Prefabricated steel structure instead of RCC building for GIS S/s.
- b. Benefits derived:
- Digital substations provide utilities with enhanced safety and reduction in control cable wiring. This helps in improving transmission performance indices like availability, reliability etc by eliminating the need of outages for periodic testing of the relays.
 - The cost Prefabricated construction is less than the cost of RCC buildings and the execution timeline is faster in case of Prefabricated construction compared to RCC structure construction, making it an attractive option for infrastructure projects that require minimal disruption to traffic and other infrastructure nearby.

In case of imported technology (imported during the last three years reckoned from the beginning of the financial year):

Sr. No.	Technology imported	Year of import	Status as on 31 st March 2025
1	220/33kV, Transformers, 33kV feeders Auto-restoration scheme for quick supply restoration extended all transformers at AEML system.	2022-23	Absorbed
2	Distributed Acoustic Sensing (DAS) system for cable system proposed for HVDC cable scheme between Aarey-Kudus.	2024-25	Process Initiated.
3	Online Sheath Monitoring System for Cable Sheath Current Monitoring for continuous monitoring of cable healthiness.	2024-25	Process Initiated. (Under Execution)
4	Digital Sub-Station: Fiber based protection and tele-protection system for reducing the huge quantities of control cables.	2023-24	
5	GIBD from Transformer HV Bushing to 220kV GIS for space saving in sub-station.	2023-24	Absorbed
6	Prefabricated steel structure instead of RCC building for GIS S/s.	2023-24	Absorbed
7	Energy Management System for LT system	2023-24	Absorbed
8	Building material complying to sustainability requirements like green building.	2023-24	Process Initiated. (Under Execution)

Expenditure incurred on R&D: NIL

C. Foreign Exchange Earnings and Outgo

Total foreign exchange earnings and outgo for the financial year are as follows:

- i. Total foreign exchange earnings : NIL
- ii. Total foreign exchange outgo : ₹ 11,51,05,480.09

Annexure-E

Annual Report on Corporate Social Responsibilities (CSR) Activities As Per Section 135 of the Companies Act, 2013

1. Brief outline on CSR Policy of the Company.

The Company has framed Corporate Social Responsibility (CSR) Policy which encompasses its philosophy and guides its sustained efforts for undertaking and supporting socially useful programs for the welfare & sustainable development of the society.

The CSR Policy has been uploaded on the website of the Company at <https://www.adanielectricity.com/Investor-Relations>.

2. The composition of the CSR Committee

Sr. No	Name of Director	Designation / Nature of Directorship	Number of meetings of CSR Committee held during the year	Number of meetings of CSR Committee attended during the year
1	Mr. Kandarp Patel	Chairman	2	2
2	Mr. K Jairaj	Member	2	2
3	Mr. Quinton Choi	Member	2	2
4	Mr. Sagar Adani	Member	2	1

3. Provide the web-link where Composition of CSR committee, CSR Policy and CSR projects approved by the board are disclosed on the website of the Company

<https://www.adanielectricity.com/Investor-Relations>

4. Provide the executive summary along with web-links of Impact assessment of CSR projects carried out in pursuance of Sub-rule (3) of Rule 8 of the Companies (Corporate Social responsibility Policy) Rules, 2014, if applicable.

Not Applicable

5. Average net profit of the company as per section 135(5): ₹ 492.73 Crore

6. (a) Two percent of average net profit of the company as per section 135(5): ₹ 9.85 Crore

(b) Surplus arising out of the CSR projects or programmes or activities of the previous financial years: NIL

(c) Amount required to be set off for the financial year, if any: ₹ 0.09 Crore

(d) Total CSR obligation for the financial year (6a+6b-6c): ₹ 9.76 Crore

(e) CSR amount spent or unspent for the financial year:

(₹ In crore)

Total Amount Spent for the Financial Year.	Amount Unspent				
	Total Amount transferred to Unspent CSR Account as per section 135(6).		Amount transferred to any fund specified under Schedule VII as per second proviso to section 135(5).		
	Amount.	Date of transfer	Name of the Fund	Amount.	Date of transfer
9.76	Nil	N.A.	N.A.	N.A.	N.A.

(f) Excess amount for set off, if any:

Sr. No	Particulars	Amount (₹ in Crore)
(i)	Two percentage of average net profit of the company as per section 135(5)	9.85
	Amount available for set-off for FY 2024-25	(0.09)
	CSR obligation for the FY 2024-25	9.76
(ii)	Total amount spent for the Financial Year	9.76
(iii)	Excess amount spent for the financial year [(ii)-(i)]	NIL
(iv)	Surplus arising out of the CSR projects or programmes or activities of the previous financial years, if any	Nil
(v)	Amount available for set off in succeeding financial years [(iii)-(iv)]	NIL

7. (a) Details of Unspent CSR amount for the preceding three financial years:

(₹ In crore)

Sr. No	Preceding Financial Year	Amount transferred to Unspent CSR Account under section 135 (6)	Amount spent in the reporting Financial Year	Amount transferred to any fund specified under Schedule VII as per section 135(6), if any.			Amount remaining to be spent in succeeding financial years. (in ₹)

Additional disclosure statement

The Ministry of Power, Government of India, has issued Electricity Distribution (Accounts and Additional Disclosure) Rules, 2024 ("the Rules") in pursuance to section 176(1) and 176(2)(z) of the Electricity Act, 2003 read with second proviso to section 129(1) of the Companies Act, 2013, which is applicable to the Company and is effective from the date of its notification in the Official Gazette i.e., 14th October, 2024.

Further, on 8th April 2025, Ministry of Power has released draft amendment in Rule 4 of the aforementioned rules and sought comments within a week.

Company has opted to include Additional Disclosures Statements, as required by these rules for the distribution business, in annual report and not as part of the financial statements for the current year being first year of the preparation of Additional Disclosure Statements.

I Supplementary disclosure to Financial Statements

1 Revenue from operations:

Particulars	For the year ended 31 March, 2025
(a) Revenue from sale of energy	10,523.14
Sale of power to own consumers (Low Tension (LT), High Tension (HT) and Extra High Tension (EHT))	9,346.44
Fuel Adjustment Charge (FAC)/ Fuel Cost Adjustment (FCA)/ Fuel and Power Purchase Cost Adjustment (FPPCA)/ Power Purchase Adjustment Charge (PPAC)	1,132.77
Sale to Distribution Franchisee	-
Sale of power to others (such as inter-State sale/ energy traded/Unscheduled Inter-change (UI)/Deviation Settlement Mechanism (DSM)/inter DISCOM sale, etc.)*	-
Other receipts from consumers (such as meter rents, service rentals, recoveries for theft of power and malpractices, etc.)	43.93
(i) Total	10,523.14
Less: rebate to consumers (if any, other than cash discount) (ii)	-
Revenue from sale of energy without tariff subsidy (i-ii)	10,523.14
Add: electricity duty/ other taxes billed to consumers	2,089.41
Less: electricity duty/ other taxes payable to Government	(2,089.41)
Sub-total of revenue from sale of energy	10,523.14
(b) Other operating income	631.10
Wheeling charges / Cross subsidy charges	457.30
Open access charges	-
Others	173.80
(c) Subsidy	-
Subsidy payable by State Government in accordance with the Electricity (Second Amendment) Rules, 2023 as per the number of units supplied to subsidized categories according to energy accounts multiplied by the per unit subsidy	-
Subsidy received	-
Total revenue from operations (a + b + c)	11,154.24

* Sale of Surplus Power is netted off in Power Purchase expenses in line with practice adopted for ARR petition and approved by State Regulator (MERC)

2 Details of revenue from Sale of Energy

Particulars	For the year ended 31 March, 2025					
	Energy sold-metered (MU)	Energy sold-un-metered (MU)	Gross energy sold (MU)	Revenue from Sale of energy w/o tariff subsidy (₹ Crores)	Tariff subsidy billed (₹ Crores)	Tariff subsidy received (₹ Crores)
Domestic	5,317.22	-	5,317.22	4,970.02	-	-
Commercial	3,416.24	-	3,416.24	3,760.86	-	-

Total	-	-	-	-	-

Note : Traiff subsidy is not available to the company for the ended 31 March 2025

7 Gross trade receivables:

Particulars	As at 31 st March 2025		
	Current	Non- current	Total
(1)			
For sale of power to own consumers (LT, HT and EHT)	365.94	-	365.94
For sale to distribution franchisee	-	-	-
For sale of power to others (such as inter-State sale/energy traded/UI/DSM/inter DISCOM sale, etc.)*	-	-	-
Electricity duty/ other taxes	98.72	-	98.72
Late payment surcharge	-	-	-
Others	-	-	-
Total **	464.65	-	464.65

* Debtors on account of Sale of Surplus Power is netted off in trade payables in line with practice adopted for ARR petition and approved by State Regulator (MERC)

** Unbilled revenue of ₹ 773.39 crores for the financial year ended 31 March 2025 is excluded in the above details

7.1 Gross trade receivables– consumer category wise for sale of energy:

Particulars	As at 31 st March, 2025			
	Opening balance	Revenue billed*	Revenue received**	Closing balance
Domestic	231.41	5,874.58	5,810.97	295.02
Commercial	129.06	4,677.67	4,658.75	147.99
Agricultural	0.01	0.38	0.38	0.01
Industrial	12.98	1,328.10	1,328.69	12.39
Others:	-	-	-	-
Public street lighting	(0.39)	168.32	168.84	(0.91)
Public water works	-	-	-	-
Railways	0.00	65.30	65.30	0.00
Bulk supply	-	-	-	-
Distribution franchisee	-	-	-	-
Inter-State/trading/UI/DSM***	-	-	-	-
Miscellaneous	12.35	665.19	667.38	10.16
(i) Total*	385.42	12,779.54	12,700.30	464.65
Out of (i) above, related to Government consumers				
State Government departments	19.00	27.35	30.30	16.06
Central Government departments	0.04	49.18	48.48	0.74
Total trade receivables related Government consumers				

* Revenue Billed includes electricity duty/ other taxes billed to consumers but excludes unbilled revenue of 773.39 crores
** Revenue received includes non cash adjustment
*** Debtors on account of Sale of Surplus Power is netted off in trade payables in line with practice adopted for ARR petition and approved by State Regulator (MERC)

8 Details of Borrowings:

Particulars	As at 31 st March, 2025

Tariff order analysis

Annual Revenue Requirement (ARR)	Petition	Approved	Reason for disallowance
ARR for FY 2025-26 to FY 2029-30	68104	55604	Mainly due to difference in sales and power purchase projections between AEML and MERC and estimated capex as per pre-approved DPRs. Actuals to be allowed through FAC and at the time of true-up

True up order analysis

Annual Revenue Requirement (ARR)	Petition	Approved	Reason for disallowance
ARR for FY 2022-23	8651	8509	Non-consideration of certain O&M expenses, being subject matter of appeal against previous tariff order and presently pending adjudication.
ARR for FY 2023-24	9424	9260	Non-consideration of certain O&M and FERV expenses, being subject matter of appeal against previous tariff order and presently pending adjudication
ARR for FY 2024-25	10823	10482	Mainly due to difference in provisionally considered projections of sales and power purchase, allowable at the time of true-up

*Year end provision for expenses made on accrual basis for books closing is not considered for calculating of No of days payables, since actual bill are yet to be received.

Independent Assurance Statement
Evaluating Sustainability Performance Metrics

Adani Electricity Mumbai Limited (hereafter 'AEML') engaged TUV India Private Limited (TUVI) to independently verify the performance against the specified Key Performance Indicators (KPI) and Sustainability Performance Targets (SPTs) under sustainability linked bond (SLB) framework for its integrated power utility business in Mumbai, India. Using AA1000 Assurance Standard, this includes reviewing AEML's GHG emissions (Scope 1 and scope 2) as reported in the FY 24-25 GHG report, as well as the Renewable Power Share report for the same period, covering from April 1, 2024 to March 31, 2025.

Key Performance Indicators (KPIs) and Sustainability Performance Targets (SPTs)

KPI 1: Increase the proportion of the renewable energy in the overall power procurement mix with the following target:

- SPT 1: Achieve a minimum of 60% renewable power procurement mix by the end of FY 2027.

KPI 2: Reduction in the GHG emission intensity (Scope 1 and scope 2) with the following target:

- SPT 2: Achieve a 60% reduction in the GHG emission intensity (Scope 1 and scope 2) by the end of FY 2029, relative to the FY 2019 baseline.

Management's Responsibility

AEML is responsible for collecting, analyzing, and aggregating the data and assumptions necessary for reporting performance against the aforementioned KPIs for the current reporting period, FY 2024-25. In conducting our external review, TUVI's role was to plan and execute the engagement, providing a reasonable level of verification and forming an independent conclusion on whether the disclosed performance levels of the KPIs are free from material misstatement and comply with the disclosure requirements. TUVI's obligation is to the company's management, in accordance with the terms agreed upon with the company. TUVI disclaims any liability or responsibility for any decisions made by individuals or entities based on this verification statement. The verification was performed from February to May 2025 by a team of qualified sustainability experts of TUVI.

Scope and Boundary

The agreed scope of work with the Company encompasses the following:

- a) **Verification of Scope 1 emissions**, including:
- Fossil fuels used in stationary and mobile equipment
 - Fossil fuels used for electricity generation
 - Releases of SF6 and refrigerant gases used in equipment
- b) **Verification of Scope 2 emissions**, including:
- Purchased electricity from the grid to meet the auxiliary power requirements in generation, transmission, and distribution assets owned by AEML, along with any associated losses.
- c) **Verification of GHG emission (CO2) intensity**, covering Scope 1 and Scope 2 emission intensity based on verified GHG emissions and the audited financial EBITDA figures of AEML for the reporting period FY 2024-25.
- d) **Verification of the renewable energy share** in the total energy procured by AEML during the current reporting period, assessing performance against KPI 1 compared to the base year.
- e) **Boundary of Verification:** Operational boundary for verification has been selected based on the “operational control” criteria and includes its integrated power utility business for power distribution (AEML) to consumers in Mumbai, Maharashtra.

Limitations

TUVI did not perform any assurance procedures on the prospective information disclosed in the Report, including targets, expectations, and ambitions. Consequently, TUVI draws no conclusion on the prospective information. TUVI didn't verified any ESG goals and claim through this assignment. During the assurance process, TUVI did not come across any limitation to the agreed scope of the assurance engagement. TUVI verified data on a sample basis; the responsibility for the authenticity of data entirely lies with AEML. Any dependence of a person or third party may place on the Sustainability Performance is entirely at its own risk. TUVI has taken reference to the financial figures from the audited financial reports.

Our Responsibility

TUVI's responsibility in relation to this engagement is to perform a reasonable level of Sustainability Key Performance Indicators assurance and to express a conclusion based on the work performed. Our engagement did not include an assessment of the adequacy or the effectiveness of AEML's strategy, management of ESG-related issues or the sufficiency of the Report against any Sustainability reporting principles, other than those mentioned in the scope of the assurance. TUVI's responsibility regarding this verification is in reference to the agreed scope of work, which includes reasonable assurance of Key Performance Indicators (KPIs) including GHG emissions (Scope 1 and Scope 2) disclosed by AEML. Reporting Organization is responsible for archiving the related data for a reasonable time period. This assurance engagement is based on the assumption that the data and information provided to TUVI by AEML are complete and true.

TUVNORDGROUP

TÜVINDIA

The intended users of this assurance statement are the management of ‘AEML’. The data is verified on a sample basis, the responsibility for the authenticity of data lies with the reporting organization. Reporting Organization is responsible for archiving the related data for a reasonable time period. TUVI expressly disclaims any liability or co-responsibility 1) for any decision a person or entity would make based on this assurance statement and 2) for any damages in case of erroneous data is reported. This assurance engagement is based on the assumption that the data and information provided to TUVI by AEML are complete and true.

Verification Methodology

During the assurance engagement, TUVI adopted a risk-based approach, focusing on verification efforts with respect to disclosures. TUVI has verified the disclosures and assessed the robustness of the underlying data management system, information flows, and controls. The assessment included an evaluation of AEML's data management system, data collection, aggregation, reporting, quality checks, and recording systems.

The reporting boundaries for the above attributes include AEML Mumbai Distribution Substations, EHV Substations, offices, and Thermal Generation Dahanu. An on-site verification was conducted at Mumbai Corporate office and Dahanu plant from the month of February 2025 to April 2025.

A sample-based review was conducted to evaluate the systems in place for data collection related to power procurement and GHG emissions, including the assessment of emission factors and calculation methodologies. Key managers and data owners were engaged in discussions to review the data consolidation systems of the company and sampled operational plants.

Additionally, performance against the SPT-1 and SPT-2, as agreed with the AEML team, was thoroughly reviewed. TUV has completed the assessment for FY 2024-25.

- a) TUVI examined and reviewed the documents, data, and other information made available by AEML for GHG Emissions (Scope 1 and scope 2)
- b) TUVI conducted interviews with key representatives, including data owners and decision-makers from different functions of AEML
- c) TUVI performed sample-based reviews of the mechanisms for implementing the sustainability-related policies and data management (qualitative and quantitative)

Conflict of Interest

In the context of providing assurance for KPIs related to GHG emissions (Scope 1 and Scope 2), addressing conflicts of interest is paramount to maintain the integrity and independence of our engagements. TUVI diligently identifies any potential relationships, affiliations, or financial interests that could compromise our impartiality. We proactively implement measures to mitigate or manage these conflicts, ensuring the integrity and independence of our assurance processes. Clear and transparent disclosures about any identified conflicts of interest are provided in our assurance statements. We recognize that failure to adequately address conflicts of interest could undermine the credibility of our assurance processes and the reliability of the reported information. Therefore, we take all necessary measures to avoid, disclose, or mitigate conflicts of interest effectively.

Our Conclusion

Renewable power mix purchased Electricity (KPI-1):

Description	Unit	FY 2018-2019 (Baseline)	FY 2024-2025
Renewable energy procured from eligible renewable sources	Million units	280.73	4001.78
Energy procured from sources" Other than Renewable"		9,032.91	7365.44
Total Energy Procured		9,313.64	11,367.22
% of electricity procured from renewable sources		3.01%	35.20%

Notes:

- Eligible Renewable Energy Sources of clean energy encompass Hydro, Solar, Biomass, biofuel cogeneration, bagasse, urban or municipal waste and other sources as recognized or approved by Ministry of Power (MoP) and Ministry of New and Renewable Energy (MNRE) with potential for future additions subject to MoP & MNRE approval.
- This included utilization of 3,268.16 Mus in FY-2018-19 and 1658.95 Mus in FY 2024-25 through embedded captive generation as per power purchase arrangement for the years ended on March 31, 2019 and March 31, 2025.
- The FY 2018-19 (Baseline year) numbers are referred from assured numbers reported by AEML.

GHG emissions (Scope 1 and Scope 2) Summary

Scope	Emission source	Total GHG emissions (FY 2024-25)
Scope 1	Fossil fuels (Coal, diesel, Petrol, LDO, LPG) used in stationery and mobile equipment, coal used in electricity generation process, SF6 & refrigerants used in operations & maintenance activities and CO2 emissions from fire extinguishers	13,39,208.26

www.tuv-nord.com/in

TÜV®

TÜVNORDGROUP

TÜVINDIA

Scope 2	Emissions arising from consumption of purchased electricity towards auxiliary power consumed in generation, transmission & distribution assets owned by AEML and Transmission & Distribution losses incurred	4,07,565.27
---------	--	-------------

GHG emission Intensity (KPI-2)

Parameter	Boundary of emission within the company	FY 2018-19 (Baseline)	FY 2024-2025
GHG tCO2e	AEML- Scope 1 and scope2 emissions	3,750,069	1,746,773.51
EBITDA in INR-in crore	AEML	1,663.67	2558.42
Emissions Intensity (t CO2e/ EBITDA in INR in crore)		2,254	682.75

Notes:

- The reported data on EBITDA of AEML within the report are based on audited financial statements of respective year.
- 1 Crore = INR 100,00,000
- The FY 2018-19 (baseline year) numbers are based on assured numbers reported by AEML

In our opinion, based on the scope of this assurance engagement, the disclosures on sustainability Key Performance Indicator performance provides a fair representation of the material topics, related strategies, and meets the general content and quality requirements of the report. Nevertheless, AEML may strengthen its internal reporting by opting an IT Enabled based data management system

Evaluation of the adherence to AA1000 Accountability Principles:

Inclusivity: Stakeholder identification and engagement is carried out by AEML on a periodic basis to bring out key stakeholder concerns as material topics of significant stakeholders. In our view, the Report meets the requirements.

Materiality: The materiality assessment process has been conducted based on the requirement of GRI standards, considering the topics that are internal and external to the AEML range of businesses The Report fairly brings out the aspects and topics and its respective boundaries of the diverse operations of AEML. In our view, the Report meets the requirements.

Responsiveness: TUVI believes that the responses to the material aspects are fairly articulated in the report, i.e. disclosures on AEML policies and management systems, including governance. In our view, the Report meets the requirements.

Impact: AEML through its parent company AESL communicates its ESG performance through regular, transparent internal and external reporting throughout the year, aligned with GRI as part of its policy framework that includes Environmental, ESG, Climate Change Mitigation, Corporate Social Responsibility Policy etc. AEML reports on ESG performance to the Board of Directors, who oversees and monitors the implementation and performance of objectives, as well as progress against goals and targets for addressing ESG-related issues. AEML completed establishing contemporary goals and targets against which performance will be monitored and disclosed periodically.

Our Assurance Team and Independence

TUVI is an independent, neutral third-party providing ESG Assurance services with qualified environmental and social specialists. TUVI states its independence and impartiality and confirms that there is "no conflict of interest" with regard to this assurance engagement. In the reporting year, TUVI did not work with AEML on any engagement that could compromise the independence or impartiality of our findings, conclusions, and observations. TUVI was not involved in the preparation of any content for this exercise, with the exception of this assurance statement. TUVI maintains complete impartiality towards any individuals interviewed during the assurance engagement.

Independent Auditor’s Report

To
the Members of
Adani Electricity Mumbai Limited

Report on the Audit of the Standalone Financial Statements

Opinion

1. We have audited the accompanying standalone financial statements of Adani Electricity Mumbai Limited ('the Company'), which comprise the Balance Sheet as at 31 March 2025, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flow and the Statement of Changes in Equity for the year then ended, and notes to the standalone financial statements, including material accounting policy information and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2025, and its loss (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.
5. We have determined the matters described below to be the key audit matters to be communicated in our report.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

4. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
Accrual of regulatory deferral income / expense and corresponding assets / liability	
Refer note 3.12 in accounting policy and note 44 in notes forming part of standalone financial statements.	Our audit procedures in relation to accrual of regulatory deferral income / expense and corresponding assets / liability included but were not limited to the following: a. Obtained an understanding of the management process and evaluated the design and tested the operating effectiveness of key internal financial controls over accrual of regulatory deferrals; b. Evaluated the Company's accounting policies with respect to accrual for regulatory deferrals and assessed its compliance with the requirements of Ind AS 114 'Regulatory Deferral Accounts';

Key audit matter	How our audit addressed the key audit matter
The Company recognises regulatory deferral income / expense and corresponding asset / liability basis its understanding and interpretation of regulatory provisions applicable to the distribution business of the Company as per the Electricity Act, 2003 and regulations framed thereunder by the Mumbai Electricity Regulatory Commission ('MERC') (the 'tariff regulations'), for the difference between entitled return as per tariff regulations (i.e., allowable cost plus return on equity) and revenue collected basis tariff rates approved by the regulator in provisional tariff orders, which are subject to true-ups in the future tariff orders.	c. Reviewed management's evaluation of recognition of regulatory deferral account balance including key assumptions and estimates used in such evaluation and corroborated them with the understanding obtained on prevailing tariff regulations, past tariff orders and underlying records and verified the arithmetical accuracy and reasonableness of such workings; and d. Evaluated the appropriateness and adequacy of the related disclosures in the standalone financial statements in accordance with the applicable Indian Accounting Standards.
Significant judgments and assumptions including interpretation of the tariff regulations, past tariff orders, judicial pronouncements etc., are involved in recognition and assessment of recoverability of such regulatory deferral balances.	
The Company has recognised net regulatory deferral assets of ₹ 3,087.61 crores as at 31 March 2025 (including expense of ₹ 1,300.78 crores for the year recognised in statement of profit and loss and income of ₹ 15.80 crores recognised in other comprehensive income).	
Considering the materiality of the amounts involved, complexity and significant judgement and assumptions involved as mentioned above, accrual of regulatory deferral income / expense and corresponding assets / liability has been considered as key audit matter for the current year audit.	

Impairment assessment of Transmission Cash Generating Unit (TCGU)

Refer note 3.5 in accounting policy and notes 5c and 32 in notes forming part of the standalone financial statements.	Our audit procedures in relation to impairment assessment of TCGU included but were not limited to the following:
The Company's TCGU includes a transmission license having an indefinite life with a carrying value of ₹ 981.62 crores as at 31 March 2025. In accordance with the requirements of Ind AS 36 'Impairment of Assets', the Company has performed an annual impairment test of aforesaid transmission license, by determining the recoverable value of the TCGU to which the transmission license pertains, using discounted cash flow method with the help of external valuation experts.	a. Obtained an understanding of the management's impairment assessment process and reviewed management's assessment of useful life of transmission license; b. Evaluated the design and tested the operating effectiveness of the key internal financial controls relating to the impairment assessment for TCGU; c. Assessed the professional competence and objectivity of the management's valuation expert and obtained their valuation report on determination of recoverable value of the TCGU;

Key audit matter	How our audit addressed the key audit matter
The determination of the recoverable value of TCGU requires management to make significant estimates and assumptions in forecasting the future cash flow projections including projected capital expenditure, which is subject to regulatory approvals, the estimated useful life of the transmission license and the discount rates. Considering the significance of the carrying amount of TCGU and auditing management judgements and estimates as mentioned above involves high degree of subjectivity and requires significant auditor judgement, impairment assessment of TCGU has been considered as a key audit matter for the current year audit.	d. Traced the cash flow projections provided by management to approved business plans and tested the arithmetical accuracy of such projections; e. Involved auditor's experts to assist in evaluating the appropriateness of the valuation methodology and reasonableness of the assumptions used by the management's expert to calculate the recoverable value of TCGU; f. Performed sensitivity analysis on the key assumptions to determine estimation uncertainty involved and ascertain the sufficiency of headroom available; and g. Evaluated the appropriateness and adequacy of the disclosure made in the standalone financial statements, in accordance with the applicable Indian Accounting Standards.
Valuation of derivative financial instruments and hedge accounting	
Refer notes 3.7 and 45.5 for accounting policy and explanatory note, respectively, in relation to derivative financial instruments and hedge accounting. In line with Company's risk management policy, the Company had purchased various derivative financial instruments to hedge its foreign currency risks in relation to the long-term foreign currency debt. The Management has designated these derivative financial instruments and the aforesaid debt at initial recognition as cash flow hedge relationship as per Ind AS 109, Financial Instruments. The valuation of hedging instrument is complex and necessitates a sophisticated system to record and track each contract and calculate the related valuations at each financial reporting date. Such valuation of hedging instruments and assessment of hedge effectiveness involves significant assumptions and judgements such as discount rates, forward exchange rates and future interbank rates. In view of material impact on the Company's standalone financial statements and significant assumptions, judgements and complexity involved as mentioned above, we have determined valuation of derivative financial instruments and hedge accounting as a key audit matter for the current year audit.	Our audit procedures in relation to valuation of derivative financial instruments and hedge accounting included, but were not limited to the following: a. Evaluated design and tested operating effectiveness of the key internal financial controls over the determination of a hedge, adequacy of hedge documentation, evaluation of the hedge effectiveness, valuation of derivative financial instruments and related hedge accounting; b. Obtained an understanding of management's process and the risk management policies of the Company in respect of derivative transactions; c. Engaged auditor's valuation experts to assist in evaluation of hedge effectiveness documentation and re-performing the year-end fair valuations of such derivative financial instruments; d. Verified the completeness of hedging contracts by tracing from independent confirmations obtained from respective banks; e. Considered the consistent application of accounting policy in respect to derivative financial instruments and hedge accounting and ensured the same is in accordance with the requirements of Ind AS 109; and f. Evaluated the appropriateness and adequacy of the related disclosures in the standalone financial statements in accordance with the applicable financial reporting framework.

Information other than the Standalone Financial Statements and Auditor's Report thereon

6. The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Director's Report, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

7. The accompanying standalone financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS specified under section 133 of the Act and other accounting principles generally accepted in

India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

8. In preparing the standalone financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

9. The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

10. Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and

are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

11. As part of an audit in accordance with Standards on Auditing, specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to

continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

12. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
13. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
14. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

15. As required by section 197(16) of the Act based on our audit, we report that the Company has paid remuneration to its directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act.
16. As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act we give in the Annexure I, a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
17. Further to our comments in Annexure I, as required by section 143(3) of the Act based on our audit, we report, to the extent applicable, that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying standalone financial statements;
 - (b) Except for the matter stated in paragraph 17(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
 - (c) The standalone financial statements dealt with by this report are in agreement with the books of account;
 - (d) In our opinion, the aforesaid standalone financial statements comply with Ind AS specified under section 133 of the Act;
 - (e) On the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2025 from being

appointed as a director in terms of section 164(2) of the Act;

- (f) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in paragraph 17(b) above on reporting under section 143(3)(b) of the Act and paragraph 17(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended);
- (g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company as on 31 March 2025 and the operating effectiveness of such controls, refer to our separate report in Annexure II wherein we have expressed an unmodified opinion; and
- (h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us:
 - (i) The Company, as detailed in note 34(A) to the standalone financial statements, has disclosed the impact of pending litigations on its financial position as at 31 March 2025;
 - (ii) The Company, as detailed in note 45(5) to the standalone financial statements, has made provision as at 31 March 2025, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts;
 - (iii) There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2025;
 - (iv) (a) The management has represented that, to the best of its knowledge and

- belief, as disclosed in note 49(ii) to the standalone financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Company to or in any person(s) or entity(ies), including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
- (b) The management has represented that, to the best of its knowledge and belief, as disclosed in note 49(iii) to the standalone financial statements, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- (c) Based on such audit procedures performed as considered reasonable and appropriate in the circumstances, nothing has come to our notice that
- has caused us to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.
- (v) The Company has not declared or paid any dividend during the year ended 31 March 2025.
- (vi) As stated in Note 48 to the financial statements and based on our examination which included test checks, the Company in respect of financial year commencing on 1 April 2024, has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software except that, the audit trail feature was enabled to log any direct data changes at the database from 17 March 2025.
- During the course of our audit, we did not come across any instance of audit trail feature being tampered with in respect of the accounting software where audit trail was enabled.
- The audit trail has been preserved by the Company as per the statutory requirements for record retention from the date the audit trail was enabled for the accounting software.

Annexure-I Independent Auditor's Report

Annexure I referred to in paragraph 16 of the Independent Auditor's Report of even date to the members of Adani Electricity Mumbai Limited on the standalone financial statements for the year ended 31 March 2025

- In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit, and to the best of our knowledge and belief, we report that:
- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment, capital work-in-progress and relevant details of right-of-use assets.
- (B) The Company has maintained proper records showing full particulars of intangible assets.
- (b) The Company has a regular programme of physical verification of its property, plant and equipment, capital work-in-progress and relevant details of right-of-use assets under which the assets are physically verified in a phased manner over a period of three years, which in our opinion, is reasonable having regard to the size of the Company and the
- nature of its assets, except for the underground distribution systems which cannot be physically verified. In accordance with this programme, certain property, plant and equipment, capital work-in-progress and relevant details of right-of-use assets were verified during the year and no material discrepancies were noticed on such verification. In respect of the underground distribution systems the management has adequate controls in place to safeguard the physical existence of the said distribution systems.
- (c) The title deeds of all the immovable properties held by the Company (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee), disclosed in Note 5 to the standalone financial statements, are held in the name of the Company, except for the following properties, for which the Company's management is in the process of getting the registration in the name of the Company:

Description of property	Gross carrying value (₹ in crores)	Held in name of	Whether promoter, director or their relative or employee	Period held	Reason for not being held in name of company
Land	1,170.41	Bombay Suburban Electric Supply Limited /Reliance Infrastructure Limited /Reliance Energy Limited	No	Since August 2018	The title deeds are in the name of erstwhile companies and the Company is in the process of updating the same.
Building	588.09		No		

For title deeds of immovable properties in the nature of land situated at Maharashtra with gross carrying values of ₹ 1,045.16 crores as at 31 March 2025, which have been mortgaged as security for loans or borrowings taken by the Company, confirmations with respect to title of the Company have been directly obtained by us from the respective lenders.

For properties where the Company is a lessee, the lease arrangements have been duly executed in favour of the Company except in following cases:

Description of property	Right- of- Use Asset Value (Gross Carrying Value) (₹ in crores)	Location	Details of Lessor	Period held	Reason for non-execution of lease agreement
Leasehold land	7.88	Various location	Bombay Suburban Electric Supply Limited /Reliance Infrastructure Limited /Reliance Energy Limited	Since August 2018	Lease agreements are not in the name of the Company. Company is in the process of updating the same.
Leasehold land	510.00	Maharashtra	Mumbai Metropolitan Region development Authority	Since September 2021	The Company has entered into memorandum of understanding and will enter into formal lease agreement on completion of construction of substation as per the applicable regulatory requirements.

- (d) The Company has adopted cost model for its Property, Plant and Equipment (including right-of-use assets) and intangible assets. Accordingly, reporting under clause 3(i)(d) of the Order is not applicable to the Company.

(e) No proceedings have been initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 (as amended) and rules made thereunder.
- (b) As disclosed in Note 24(iii) to the standalone financial statements, the Company has been sanctioned a working capital limit in excess of ₹ 5 crores by banks based on the security of current assets. The quarterly statements, in respect of the working capital limits have been filed by the Company with such banks and such statements are in agreement with the books of account of the Company for the respective periods, which were not subject to audit.

(iii) The Company has not provided any guarantee or security to companies, firms, limited liability partnerships during the year. The Company has also not made investment in and granted loans or advances in the nature of loans to firms and Limited Liability Partnerships. Further, the Company has made investments in and granted unsecured loans to companies or any other parties during the year, in respect of which:
- (ii) (a) The management has conducted physical verification of inventory at reasonable intervals during the year. In our opinion, the coverage and procedure of such verification by the management is appropriate and no discrepancies of 10% or more in the aggregate for each class of inventory were noticed as compared to book records.

- (a) The Company has provided loans to Subsidiaries and Others during the year as per details given below:

Particulars	Loans (₹ in crores)
Aggregate amount provided/ granted during the year:	
- Subsidiaries	0.04
- Others	4.32
Balance outstanding as at balance sheet date:	
- Subsidiaries	0.04
- Others	4.32

- (b) In our opinion, and according to the information and explanations given to us, the investments made and terms and conditions of the grant of all loans are, prima facie, not prejudicial to the interest of the Company.

(c) In respect of loans and advances in the nature of loans granted by the Company, the schedule of repayment of principal and payment of interest has been stipulated and the repayments/ receipts of principal and interest are regular.

(d) There is no overdue amount in respect of loans or advances in the nature of loans granted to such companies, firms, LLPs or other parties.

(e) The Company has granted loans which had fallen due during the year and were repaid on or before the due date. Further, no fresh loans were granted to any party to settle the overdue loans in nature of loan.

(f) The Company has not granted any loan or advance in the nature of loan, which is repayable on demand or without specifying any terms or period of repayment.
- (iv) The Company has not entered into any transaction covered under section 185 of the Act. As the

Company is engaged in providing infrastructural facilities as specified in Schedule VI of the Act, provisions of section 186 except sub-section (1) of the Act are not applicable to the Company. In our opinion, and according to the information and explanations given to us, the Company has complied with the provisions of sub-section (1) of section 186 of the Act in respect of investments, as applicable.

- (v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits or there are no amounts which have been deemed to be deposits within the meaning of sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, reporting under clause 3(v) of the Order is not applicable to the Company.

(vi) The Central Government has specified maintenance of cost records under sub-section (1) of section 148 of the Act in respect of the products of the Company. We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records and are of the opinion that, prima facie, the prescribed accounts and records have been made and maintained. However, we have not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

(vii) (a) In our opinion and according to the information and explanations given to us, the Company is regular in depositing undisputed statutory dues including goods and services tax, provident fund, employees' state insurance, income-tax, sales-tax, duty of customs, duty of excise, value added tax, cess and other material statutory dues, as applicable, with the appropriate authorities. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, we report that there are no statutory dues referred in sub-clause (a) which have not been deposited with the appropriate authorities on account of any dispute except for the following:

Name of the statute	Nature of dues	Gross Amount (₹ in crores)	Amount paid under Protest (₹ in crores)	Period to which the amount relates	Forum where dispute is pending
Finance Act, 1994	Service Tax	46.21	20.60	October 2011 to December 2016	Central, Excise and Service Tax Appellate Tribunal, Mumbai
Finance Act, 1994	Service Tax	307.34	-	June 2012 to June 2017	Bombay High Court

(viii) According to the information and explanations given to us, we report that no transactions were surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961) which have not been previously recorded in the books of accounts.

(ix) (a) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of its loans or borrowings or in the payment of interest thereon to any lender.

(b) According to the information and explanations given to us including representation received from the management of the Company, and on the basis of our audit procedures, we report that the Company has not been declared a willful defaulter by any bank or financial institution or government or any government authority.

(c) In our opinion and according to the information and explanations given to us, the Company has not raised any money by way of term loans during the year and there has been no utilisation during the current year of the term loans obtained by the Company during any previous years. Accordingly, reporting under clause 3(ix)(c) of the Order is not applicable to the Company.

(d) In our opinion and according to the information and explanations given to us, and on an overall examination of the financial statements of the Company, funds raised by the Company on short term basis have, prima facie, not been utilised for long term purposes.

(e) In our opinion and according to the information and explanations given to us and on an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries.

(f) In our opinion and according to the information and explanations given to us, the Company has not raised any loans during the year on the pledge of securities held in its subsidiaries.

(x) (a) The Company has not raised any money by way of initial public offer or further public offer (including debt instruments), during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or (fully, partially or optionally) convertible debentures during the year. Accordingly, reporting under clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company or no fraud on the Company has been noticed or reported during the period covered by our audit.

(b) According to the information and explanations given to us including the representation made to us by the management of the Company, no report under sub-section 12 of section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014, with the Central Government for the period covered by our audit.

(c) According to the information and explanations given to us, the Company has received whistle blower complaints during the year, which have been considered by us while determining the nature, timing and extent of audit procedures.

(xii) The Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, reporting under clause 3(xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us, all transactions entered into by the Company with the related parties are in compliance with sections 177 and 188 of the Act, where applicable. Further, the details of such related party transactions have been disclosed in the standalone financial statements, as required under Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified in Companies (Indian Accounting Standards) Rules 2015 as prescribed under section 133 of the Act.

(xiv) (a) In our opinion and according to the information and explanations given to us, the Company has an internal audit system which is commensurate with the size and nature of its business as required under the provisions of section 138 of the Act.

(b) We have considered the reports issued by the Internal Auditors of the Company till date for the period under audit.

(xv) According to the information and explanation given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and accordingly, reporting under clause 3(xv) of the Order with respect to compliance with the provisions of section 192 of the Act are not applicable to the Company.

(xvi) (a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, reporting under clauses 3(xvi)(a), (b) and (c) of the Order are not applicable to the Company.

(d) Based on the information and explanations given to us and as represented by the management of the Company, the Group (as defined in Core Investment Companies (Reserve Bank) Directions, 2016) does not have any CIC.

(xvii) The Company has not incurred any cash losses in the current financial year as well as the immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year. Accordingly, reporting under clause 3(xviii) of the Order is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information in the standalone financial statements, our knowledge of the plans of the Board of Directors and management and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

(xx) According to the information and explanations given to us, the Company does not have any unspent amounts towards Corporate Social Responsibility in respect of any ongoing or other than ongoing project as at the end of the financial year. Accordingly, reporting under clause 3(xx) of the Order is not applicable to the Company.

(xxi) The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of standalone financial statements of the Company. Accordingly, no comment has been included in respect of said clause under this report.

Annexure-II Independent Auditor’s Report

Annexure II to the Independent Auditor’s Report of even date to the members of Adani Electricity Mumbai Limited on the standalone financial statements for the year ended 31 March 2025

Independent Auditor’s Report on the internal financial controls with reference to the standalone financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (‘the Act’)

1. In conjunction with our audit of the standalone financial statements of Adani Electricity Mumbai Limited (‘the Company’) as at and for the year ended 31 March 2025, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

2. The Company’s Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company’s business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the Company’s internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India (‘ICAI’) prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the

Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (‘the Guidance Note’) issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company’s internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance

with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2025, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the ICAI.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

1 Corporate information

Adani Electricity Mumbai Limited ("AEML") ("The Company") is a public limited company incorporated and domiciled in India having its registered office at Adani Corporate House, Shantigram, Near Vaishno Devi Circle, S. G. Highway, Khodiyar, Ahmedabad 382421, Gujarat, India, and its principal office at Devidas Lane, Off SVP Road, Near Devidas Telephone Exchange, Borivali(W), Mumbai 400105, Maharashtra, India

It is subsidiary of Adani Energy Solutions Limited (AESL) formerly known as Adani Transmission Limited ("the Holding Company") and ultimate holding entity is S. B. Adani Family Trust (SBFT).

The integrated Mumbai Generation, Transmission and Distribution (GTD) Business, under a license, transmits and distributes electricity to consumers in and around suburbs of Mumbai inclusive of areas covered under the Mira Bhayander Municipal Corporation, making it the country's largest private sector integrated power utility. The Tariff to be charged to the consumers is regulated by Maharashtra Electricity Regulatory Commission ("MERC").

The Company has USD bonds which are listed at Singapore Stock Exchange.

These financial statements of the Company for the year ended 31 March 2025 were authorised for issue by the board of directors on 22 April 2025.

2 Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (IndAS) as notified under the Companies (Indian Accounting Standards) Rules, 2015 read with section 133 of the Companies Act, 2013 ("the Act") (as amended from time to time).

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

The financial statements have been prepared in "Indian Rupees" which is also the Company's functional currency and all amounts, are rounded to the nearest Crore with two decimals, (Transactions below ₹ 50,000.00 denoted as ₹ 0.00), unless otherwise stated.

3 Material accounting policies

3.1 Current versus Non-Current Classification

Material details of Operating Cycle: Based on the time involved between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has identified twelve months as its operating cycle for determining current and non-current classification of assets and liabilities in the balance sheet.

3.2 Property, plant and equipment ("PPE")

All items of property, plant and equipment, including freehold land, are initially recorded at cost. Subsequent to initial recognition, property, plant and equipment other than freehold land are measured at cost less accumulated depreciation and any accumulated impairment losses. Freehold land has an unlimited useful life and therefore is not depreciated.

In respect of property, plant and equipment ("assets") pertaining to Mumbai generation, transmission and distribution business acquired from Reliance Infrastructure Limited (RIL) under a Court sanctioned scheme of arrangement with an appointed date of 01 April, 2018, in line with the requirements of the Court Scheme, the Company has accounted for such Assets at their respective fair values as at 01 April, 2018 based on valuation done by a Government registered valuer. Subsequent additions to the assets on or after 01 April, 2018 are accounted for at cost.

Capital work-in-progress is stated at cost, net of accumulated impairment loss, if any. Other indirect expenses incurred relating to project, net of income earned during the project development stage prior to its intended use, are considered as pre-operative expenses and disclosed under capital work-in-progress.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss.

Depreciation

Depreciation commences when an asset is ready for its intended use. Depreciation is recognised based on the cost of assets (other than freehold land) less their residual values over their useful lives. Freehold land is not depreciated.

Regulated Assets: Subject to the below, depreciation on property, plant and equipment in respect of Mumbai generation, transmission and distribution business of the Company covered under Part B of Schedule II of the Companies Act, 2013, has been provided on the straight-line method at the rates using the methodology as notified by the regulator.

For certain types of assets in respect of which useful life is not specified in MERC Multi Year Tariff Regulations ("MYT regulations"), useful life as prescribed under Schedule-II of Companies Act, 2013 is considered.

In respect of assets (other than Dahanu Thermal Power Station-DTPS) which have been accounted at fair value, considering life as specified in MYT regulations, depreciation is provided on Straight Line Method (considering a salvage value of 5%) over their balance useful life. In respect of DTPS based on technical evaluation, the balance useful life has been determined as 15 years as on 01 April 2018.

Salvage value in respect of assets which have not been accounted at fair value has been considered at 10% except in respect of furniture & fixture, vehicles, office equipment and electrical installations which has been considered at 5% and computers & software at nil (Consequent to amendment in tariff regulations, the Company has changed the salvage value of computers from 5 % to nil w.e.f. 01 April 2020).

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, and the effect of any changes in estimate is accounted for on a prospective basis.

Estimated useful lives of assets other than assets at DTPS are as follows:

Type of Asset	Useful lives
Building	30-60 Years
Plant and equipment (except meters & batteries) *	25-35 Years
Plant and equipment - meters*	10 Years
Plant and equipment - batteries*	10 Years
Distribution line / transmission cable	35 Years
Streetlight	25 Years
Furniture and fixtures	15 Years
Office equipment	5 Years
Computers, servers & related network	3 Years
Vehicles	15 Years

*Consequent to amendment in tariff regulations, w.e.f. 12 July 2022 the Company has changed the useful life (years) in respect of batteries (from 5 to 10), computers (from 6 to 6/3), furniture and fixtures (from 10 to 15), vehicles (from 8-10 to 15) and roads bridges (from 15 to 30).

Notes forming part of the Financial Statements
for the year ended March 31, 2025

3.3 Intangible assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives.

In respect of intangible asset (“assets”) pertaining to Mumbai generation, transmission and distribution business acquired from Reliance Infrastructure Limited (RIL) under a Court sanctioned scheme of arrangement with an appointed date of 01 April 2018, in line with the requirements of the Court Scheme, the Company has accounted for such Assets at their respective fair values as at 01 April, 2018 based on valuation done by professional valuation firm.

Subsequent additions to the assets on or after 01 April, 2018 are accounted for at cost.

Derecognition of Intangible assets.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognised in Statement of Profit and Loss when the asset is derecognised.

Useful life

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit and Loss under the head Depreciation and amortisation expenses, unless such expenditure forms part of carrying value of another asset.

Intangible assets with indefinite lives are not amortised but are tested for impairment on annual basis. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Estimated useful lives of the intangible assets are as follows:

Type of Asset	Useful lives
Transmission license	Indefinite
Computer software	3 years

3.4 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use. This condition is regarded as met only when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset and its sale is highly probable. Also, such assets are classified as held for sale only if the management expects to complete the sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and the fair value less cost to sell, except for financial assets which are measured as per Ind AS 109 “Financial Instruments”. Non-current assets are not depreciated or amortised

Notes forming part of the Financial Statements
for the year ended March 31, 2025

3.5 Impairment of PPE and intangible assets

PPE (including CWIP) and intangible assets with definite lives, are reviewed for impairment, whenever events or changes in circumstances indicate that their carrying values may not be recoverable. Intangible assets having indefinite useful lives are tested for impairment, at-least annually and whenever circumstances indicate that it may be impaired.

For the purpose of impairment testing, the recoverable amount (that is, higher of the fair value less costs to sell and the value-in-use) is determined on an individual asset basis, unless the asset does not generate cash flows that are largely independent of those from other assets, in which case the recoverable amount is determined at the cash generating unit (“CGU”) level to which the said asset belongs. If such individual assets or CGU are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured by the amount by which the carrying value of the asset / CGU exceeds their estimated recoverable amount and allocated on pro-rata basis.

Impairment losses are reversed in the statement of profit and loss and the carrying value is increased to its revised recoverable amount provided that this amount does not exceed the carrying value that would have been determined had no impairment loss been recognised for the said asset / CGU in previous years.

3.6 Financial instruments

Financial assets (except for trade receivables which are measured at transaction cost) and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities measured at fair value through profit or loss are recognised immediately in the Statement of Profit and Loss.

(A) Financial assets

Initial recognition and measurement:

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement:

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

i) Classification and measurement of financial assets

a) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost using the effective interest rate method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if both of the following criteria are met-

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Notes forming part of the Financial Statements
for the year ended March 31, 2025

- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c) **Financial assets at fair value through profit & loss (FVTPL)**

All financial assets that do not meet the criteria for amortised cost or FVTOCI are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset.

ii) **Impairment of financial assets**

The Company assesses at each date of balance sheet whether a financial asset. IndAS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and/or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

iii) **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- the right to receive cash flows from the asset have expired, or
- the Company has transferred its right to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the Statement of Profit and Loss if such gain or loss would have otherwise been recognised in the Statement of Profit and Loss on disposal of that financial asset.

(B) Financial liabilities and equity instruments

i) **Classification as debt or equity**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

ii) **financial liabilities**

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost (loans and borrowings)

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the Statement of Profit and Loss when the liabilities are derecognised as well as through the effective interest rate (EIR) amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

Trade and other payables are recognised at the transaction cost, which is its fair value, and subsequently measured at amortised cost. Similarly, interest bearing loans (loans to related parties), trade credits and borrowings (including bonds) are subsequently measured at amortised cost using effective interest rate method. Trade credits include buyer's credit, foreign letter of credit and inland letter of credit.

Financial liabilities measured at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Financial liabilities are classified as held for trading if these are incurred for the purpose of repurchasing in the near term. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in the Statement of Profit and Loss.

iii) **Derecognition of Financial Liability**

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Statement of Profit and Loss.

3.7 Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement:

The Company uses derivative financial instruments, such as forward currency contracts and interest rate swaps to hedge its foreign currency risks and interest rate risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to the Statement of Profit and Loss, except for the effective portion of cash flow hedges, which is recognised in Other Comprehensive Income (OCI) and later reclassified to the Statement of Profit and Loss when the hedge item affects profit or loss.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

Cash flow hedges.

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Statement of Profit and Loss.

Amounts recognised in OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

3.8 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on weighted average basis. Cost of inventory includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Unserviceable / damaged stores and spares are identified and written down based on technical evaluation.

3.9 Foreign currencies

The functional currency of the Company is Indian Rupee ₹.

In preparing the financial statements of the Company, transactions in currencies other than the entity's functional currency are recognised at the rate of exchange prevailing on the date of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences on monetary items are recognised in the Statement of Profit and Loss in the period in which they arise except for:

- (i) exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings; and
- (ii) exchange differences on transactions entered into in order to hedge certain foreign currency risks.

3.10 Fair value measurement

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- (i) Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- (ii) Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- (iii) Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

3.11 Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

1. Transmission of power

Revenue from transmission of power is recognised net of cash discount over time for transmission of electricity. The Company as per the prevalent tariff regulations is required to recover its Annual Revenue Requirement ('ARR') comprising of expenditure on account of operations and maintenance expenses, financing costs, taxes and assured return on regulator approved equity with additional incentive for operational efficiencies.

Input method is used to recognize revenue based on the Company's efforts or inputs to the satisfaction of a performance obligation to deliver power.

As per tariff regulations, the Company determines ARR and any surplus/shortfall in recovery of the same is accounted as revenue.

2. Sale of power - Distribution

Revenue from sale of power is recognised net of cash discount over time based on output method i.e. for each unit of electricity delivered at the pre-determined rate. Sales of power under Deviation settlement mechanism is recognised at variable cost.

3. Rendering of services

Revenue from a contract to provide services is recognized over time based on output method where direct measurements of value to the customer based on surveys of performance completed to date. Revenue is recognised net of cash discount at a point in time at the contracted rate.

4. Interest on Overdue Receivables / Delay Payment Charges

Consumers are billed on a monthly basis and are given average credit period of 15 to 30 days for payment. No delayed payment charges ('DPC') / interest on arrears ('IOA') is charged for the initial 15-30 days from the date of invoice to customers. Thereafter, DPC / IOA is charged at the rate prescribed in the tariff order on the outstanding amount.

Revenue in respect of delayed payment charges and interest on delayed payments leviable as per the relevant contracts are recognised on actual realisation or accrued based on an assessment of certainty of

Notes forming part of the Financial Statements
for the year ended March 31, 2025

realization supported by either an acknowledgement from customers or on receipt of favourable order from regulator / authorities.

5. Sale of traded goods

Revenue from sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the amount of revenue can be measured reliably; and
- it is probable that the economic benefits associated with the transaction will flow to The Company.

There is no significant judgement involved while evaluating the timing as to when customers obtain control of promised goods and services.

6. Amortisation of Service line contribution

Contributions by consumers towards items of property, plant and equipment, which require an obligation to provide electricity connectivity to the consumers, are recognised as a credit to deferred revenue. Such revenue is recognised over the useful life of the property, plant and equipment.

7. Interest income:

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

8. Rental income:

Rental income from guest house and others are recognised as revenue in the period in which they are earned.

3.12 Regulatory deferral account

The Company determines revenue gaps (i.e. surplus/shortfall in actual returns over returns entitled) in respect of its regulated operations in accordance with the provisions of Ind AS 114 "Regulatory Deferral Accounts" read with the guidance note on Rate Regulated Activities issued by The Institute of Chartered Accountants of India (ICAI) and based on the principles laid down under the relevant Tariff Regulations/Tariff Orders notified by the Electricity Regulator and the actual or expected actions of the regulator under the applicable regulatory framework. Appropriate adjustments in respect of such revenue gaps are made in the regulatory deferral account of the respective year for the amounts which are reasonably determinable, and no significant uncertainty exists in such determination. These adjustments/accruals representing revenue gaps are carried forward as Regulatory deferral accounts debit/credit balances (Regulatory Assets/Regulatory Liabilities) as the case may be in the financial statements, which would be recovered/refunded through future billing based on future tariff determination by the regulator in accordance with the electricity regulations.

The Company presents separate line items in the balance sheet for:

- the total of all regulatory deferral account debit balances; and
- the total of all regulatory deferral account credit balances.

A separate line item is presented in the Statement of Profit and Loss for the net movement in regulatory deferral account. Regulatory assets/ liabilities on deferred tax expense/income is presented separately in the tax expense line item.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

3.13 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. Substantial time is defined as time required for commissioning of the assets considering industry benchmarks/ Maharashtra Electricity Regulatory Commission (MERC) tariff regulations.

3.14 Employee benefits

(i) Defined contribution plan:

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

(ii) Defined benefit plans:

The Company has an obligation towards gratuity, a defined benefit retirement plan which is a combination of funded plan / unfunded plan.

Defined benefit costs in the nature of current and past service cost and net interest expense or income are recognized in the Statement of Profit and Loss in the period in which they occur. Actuarial gains and losses on remeasurement is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur and is reflected immediately in retained earnings and not reclassified to profit or loss.

(iii) Compensated absences:

Provision for compensated absences and its classifications between current and non-current liabilities are based on independent actuarial valuation. The actuarial valuation is done as per the projected unit credit method as at the reporting date.

(iv) Short-term and other long-term employee benefits:

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

3.15 Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the lease payments associated with these leases as an expense on a straight-line basis over the lease term

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Right-of-use assets

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

Lease Liabilities

The lease liability is initially measured at the present value of the lease payments to be paid over the lease term at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate. Subsequently, the lease liability is measured at amortised cost using the effective interest method.

3.16 Taxation

Tax on Income comprises current tax and deferred tax. These are recognised in Statement of Profit and Loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

i) Current Tax

Tax on income for the current period is determined on the basis on estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit and loss (either in Other Comprehensive Income or in Equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations for which applicable tax regulations are subject to interpretation and revises the provisions where appropriate.

ii) Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Regulators tariff norms in respect of certain subsidiaries which operate under cost plus tariff regime, provide the recovery of Income Tax from the beneficiaries by way of grossing up the return on equity based on effective tax rate for the financial year shall be based on the actual tax paid during the year on the transmission income from certain subsidiaries. Accordingly, deferred tax liability provided during the

Notes forming part of the Financial Statements
for the year ended March 31, 2025

year which is fully recoverable from beneficiaries and known as "deferred assets recoverable / adjustable". The same will be recovered when the related deferred tax liability forms a part of current tax.

3.17Provisions, and Contingent Liabilities

i) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

Present obligations arising under onerous contracts are recognised and measured as provisions with charge to statement of profit and loss. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract

ii) Contingent Liabilities

A possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise are disclosed as contingent liability and not provided for. Such liability is not disclosed if the possibility of outflow of resources is remote.

4 Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

The Company applied following amendments for the first-time during the current year which are effective from 1 April 2024:

Amendments to Ind AS 116 -Lease liability in a sale and leaseback

The amendments require an entity to recognise lease liability including variable lease payments which are not linked to index or a rate in a way it does not result into gain on Right of use asset it retains.

Introduction of Ind AS 117

MCA notified Ind AS 117, a comprehensive standard that prescribe, recognition, measurement and disclosure requirements, to avoid diversities in practice for accounting insurance contracts and it applies to all companies i.e., to all "insurance contracts" regardless of the issuer. However, Ind AS 117 is not applicable to the entities which are insurance companies registered with IRDAI.

The Company has reviewed the new pronouncements and based on its evaluation has determined that these amendments do not have a significant impact on the Company's Financial Statements.

Notes forming part of the Financial Statements

Notes:

- (i) The above intangible assets are other than internally generated intangible assets.
- (ii) Transmission license was acquired as part of the business acquisition. The License is valid for 25 years from 16 August, 2011 to 15 August, 2036. The license is expected to be further extended at minimal cost, considering similar extensions have happened in the past. Based on an analysis of all of the relevant factors, the license is considered by the Company as having an indefinite useful life, as there is no foreseeable limit to the period over which the transmission business related assets are expected to generate net cash inflows for the Company. (refer note 32 for impairment testing)
- (iii) Transmission License is pledged as security with the Lenders against borrowings. {refer note 17 (iii)}

12 Trade receivables

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024
Considered good, secured	147.76	133.74
Considered good, unsecured	352.41	299.13
Having significant increase in credit risk	50.22	36.28
Credit impaired	1.39	1.39
	551.78	470.54
Less : Loss allowance	(1.39)	(1.39)
	550.39	469.15
Unbilled Receivables	773.39	655.04
Total	1,323.78	1,124.19

Note :

- (i) The Company holds security deposit from its customers (refer note 20) in respect of trade receivables to the extent covered by such deposits are presented as secured.
- (ii) Above trade receivables are pledged as security with the Lenders against borrowings {refer note 17 (iii)}.
- (iii) The average credit period for the Company's receivables from its transmission and distribution (including street light maintenance) business is in the range of 15 to 30 days. No interest or delayed payment is charged on trade receivables till the due date. Thereafter, one time delayed payment charges at the rate of 1.25% & interest after 30 / 60 days from bill date is charged in the range of 12% to 15% per annum.
- (iv) In case of transmission business, regulator approved tariff is receivable from long-term transmission customers (LTTCs) and Discoms that are highly rated companies or government parties. Counterparty credit risk with respect to these receivables is very minimal.
- (v) Trade receivable balance mainly comprises of outstanding from consumers wherein the credit period provided to such consumers is less than 30 days. The outstanding amount beyond credit period remains insignificant. The risk of recovery in this business is reduced to the extent of security deposits already collected and held as collateral. Considering the nature of the business, the historical loss trend, the loss allowance with respect to balance dues beyond credit period are not material and in line with expected credit losses in accordance with Ind AS 109.

16 Other equity

a. Capital reserve

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024
Opening balance	230.78	230.78
Add : Additions during the year	-	-
Closing balance	230.78	230.78

Capital reserve represents the gain arising on accounting of business combination, wherein on the acquisition date the net amounts of the identifiable assets acquired and the liabilities assumed exceeded the consideration amount paid.

b. Restructuring reserve

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024
Opening balance	10.79	-
Add : Adjustment on account of capital reorganisation (refer note 36)	-	10.79
Closing balance	10.79	10.79

During the previous year, Company had entered into a Business Transfer agreement dated 1 November 2023 for transfer of Company's distribution network infrastructure (including movable and immoveable assets) in Seepz SEZ area as a going concern to AEML Seepz Liimied, on a slump sale for a total consideration of ₹ 36.96 crores. Considering this is a business restructuring, the excess of consideration over net assets transferred aggregating ₹ 10.79 crores was recognised under 'Other Equity' as restructuring reserve.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

c. Cashflow hedge reserve

Particulars	As at	As at
	March 31, 2025	March 31, 2024
Opening balance	(357.75)	(215.54)
Add : Other comprehensive income / (loss) during the year	87.05	(142.21)
Closing balance	(270.70)	(357.75)

The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of designated portion of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on changes in fair value of the designated portion of the hedging instruments that are recognised and accumulated under the heading of cash flow hedging reserve will be reclassified to profit or loss only when the hedged transaction affects the profit or loss, or included as a basis adjustment to the non-financial hedged item.

d. Contingency reserve fund

Sale of traded goods	0.72	0.02
Miscellaneous revenue	19.42	16.36
Total revenue from contract with customers	11,616.29	9,747.80
Add: Cash discount / rebates etc.	68.64	51.87
Add: Income from transmission charges to be adjusted in future tariff determination (net)	(29.33)	38.00
Total revenue as per contracted price	11,655.60	9,837.67

B Timing of Revenue recognition

Particulars	(₹ In crore)	
	For the year ended 31 March, 2025	For the year ended 31 March, 2024
Goods and services are transferred at a point in time	38.87	98.76
Goods and services transferred over the time	11,577.42	9,649.04
	11,616.29	9,747.80

C Transaction Price - allocated to the remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Company expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognised corresponds directly with the value to the customer of the entity's performance completed to date.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

There are no aggregate value of performance obligations that are completely or partially unsatisfied as of 31 March, 2025, other than those meeting the exclusion criteria mentioned above.

	1,242.12	1,048.07

Contract assets

Contract asset is the right to consideration in exchange for goods or services transferred to the customer when that right is conditioned on something other than passage of time. Contract Assets are transferred to receivables when the rights become unconditional.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer, If the customer pays contribution before the Company transfers goods or services to the customers, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the performance of obligation is satisfied.

32 The Transmission licence granted to AEML is an asset specific license which includes list of existing and proposed transmission lines as well as transmission bays in a specified area.

In accordance with the requirements of Ind AS 36 "Impairment of Assets", Transmission Cash Generating Unit ("TCGU") which includes carrying value of Transmission License having indefinite useful life being Transmission License (₹ 981.62 crores), has been tested for impairment as at 31 March, 2025 wherein, recoverable amount of the TCGU has been determined applying value in use approach. The value in use of the TCGU has been determined using Discounted Cash Flow Method (DCF)."

In deriving the recoverable amount of the TCGU a discount rate (post tax) of 9.60% (31 March 2024: 9.50%) per annum has been used. In arriving at the recoverable amount of the TCGU , financial projections have been developed for 7 years (31 March 2024: 6 years) and thereafter in perpetuity considering a terminal growth rate of 2% (31 March 2024: 2%) per annum.

Based on the results of the TCGU impairment test, the estimated value in use of the TCGU was higher than its carrying amount, hence no impairment loss is recorded (31 March 2024 - ₹ Nil). Management believes that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the fair value of the Transmission License.

The key assumptions used in determining the recoverable amount of TCGU are as follows :

- (i) Discount Rate: 9.60 % (31 March 2024: 9.50 %) Post-Tax Discount rate has been derived based on current cost of borrowing and equity rate of return in line with the current market expectations.
- (ii) Capital expenditure / Capitalisation: Capital expenditure and capitalisation for 7 years (31 March 2024: 6 years) is estimated based on management projections subject to regulatory approval and thereafter ₹ 550 crores per annum (31 March 2024: ₹ 675 crores per annum).
- (iii) Terminal growth : 2% (31 March 2024 : 2%).

	1,767.97	2,294.30

@@ Amount not determinable

Notes:

- 1Amounts in respect of employee related claims/disputes, consumer related litigation, regulatory matters is not ascertainable.
- 2Future cash flows in respect of above matters are determinable only on receipt of judgements/decisions pending at various forums/authorities.
- 3In terms of the Share Purchase Agreement entered into by the Company, AESL with RINFRA, in the event the above matters are decided against the Company and are not recoverable from the consumers, the same would be recovered from RINFRA.
- 4In previous financial year 2023-24, an Appeal has been filed by the Company at APTEL under Section 111 of the Electricity Act, 2003, challenging the Order dated 31 March 2023 passed by the Maharashtra Electricity Regulatory Commission MERC) directing levy of Standby charges by Maharashtra State Electricity Distribution Company Limited.

In the current financial year 2024-25, in accordance with the directions of the Hon'ble APTEL, MERC has not considered any cost related to Standby charges in the Annual Revenue Requirement (ARR) in its Order dated 28 March 2025.However, the cost of Standby charges are subject to final decision of the Hon'ble Commission after due regulatory proceedings, which is yet to be received.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Hence at this stage the company is not able to make a reasonable estimate towards cost of standby charges. If any liability occurs in future, the same is recoverable from the consumers.

- 5
- The Company had terminated long term Power purchase agreement (PPA) due to non-performance of obligations under the PPA by VIPL, such termination has been upheld by MERC / Appellate Tribunal of Electricity ("ATE"). VIPL has filed an appeal before the Hon'ble Supreme Court against the said order issued by the ATE. In the current financial year the appellant has withdrawn the said appeal.
- 6
- Pursuant to the order dated 14 October 2024 passed by Hon'ble Revenue Minister, in revision petition no 2624 of 2024, it has been held that unearned income is not leviable in cases where land is transferred pursuant to a scheme of demerger sanctioned by the Hon'ble High court.

The Company, in respect of the above mentioned Contingent Liabilities has assessed that it is only possible but not probable that outflow of economic resources will be required.

- For procurement of Hybrid (Solar/Wind) power on long term basis, AEML has entered into a long term 25 years PPA of 700 MW per annum with a group entity (Adani Hybrid Energy Jaisalmer Four Limited) to purchase 700 MW per annum of Hybrid Renewable Power at ₹ 3.24 per unit.
- b)
- For procurement of Thermal power on long term basis, AEML has entered into a long term 5 years PPA of 2 x 250 MW per annum with a group entity (Adani Power Limited) to purchase 500 MW per annum of Thermal Power at rates as will be laid by Maharashtra Electricity Regulatory Commission.

35 On 21 August 2022, R-Infra filed a Consolidated statement of arbitration claims under the Share Purchase Agreement. During the current financial year, the parties have amicably resolved their disputes, and a settlement has reached between the parties. In light of this settlement, RInfra has withdrawn all claims filed, in connection with the share purchase agreement.

36 Maharashtra Electricity Regulatory Commission ('MERC') vide its order dated 26 December 2022 granted an in-principal approval for the transfer of Company's distribution network infrastructure in Seepz SEZ area to AEML Seepz Limited ('ASL'), a wholly owned subsidiary of the Company. Based on the principles laid down by MERC, ASL filed requisite petitions for approval of tariff, power procurement plan and switchover/ changeover protocol (i.e. shifting of consumers from other Distribution Licensees to ASL and vice versa in SEEPZ area) which have been approved by MERC on 09 October 2023.

Subsequently in previous financial year, the Company and ASL have entered into a Business Transfer agreement dated 1 November 2023 for transfer of Company's distribution network infrastructure (including movable and immoveable assets) in Seepz SEZ area as a going concern to ASL, on a slump sale for a total consideration of ₹ 36.96 crore. Considering this is a business restructuring, the excess of consideration over net assets transferred aggregating ₹ 10.79 crore is recognised in Balance Sheet under 'Other Equity'.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

		(₹ In crore)
Sr. No	Details related to transaction	Amount
a	Consideration	36.96

39 During the financial year 2022-23, a short seller report ("SSR") was published alleging certain issues against Adani group entities including the Company and its Holding Company. On 3rd January 2024, the Hon'ble Supreme Court ("SC") disposed off all matters of appeal in various petitions including separate independent investigations relating to the allegation in SSR and stated that the Securities and Exchange Board of India ("SEBI") should complete the investigation on balance two pending matters and take investigations to their logical conclusion in accordance with law. During the current year, the management of the Company and its Holding Company believes that balance two investigations have been concluded based on available information. The Holding Company received a Show Cause Notice (SCN) from the SEBI during the quarter ended March 2024 relating to validity of Peer Review Certificate (PRC) of one of the former statutory auditor in respect of an earlier period which was duly responded by the management of the Holding Company. During the current year, a SCN has been received by the Holding Company, alleging wrongful categorisation of shareholding pertaining to period FY 2012-2020 of certain entities as public shareholding and consequences therefrom. However, it does not have any bearing with the current free float and shareholding which fully complies with applicable laws and regulations.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Pursuant to the SC order, various legal and regulatory proceedings by the SEBI, legal opinions obtained, independent legal & accounting review undertaken by the Adani group and the fact that there is no pending regulatory or adjudicatory proceeding as of date except relating to SCNs as mentioned above, the management of the Company concluded that there are no material consequences of the SSR and the Company and its Holding Company continues to hold good its position as regards the compliance of applicable laws and regulations.

40 In November 2024, the Company became aware of an indictment filed by United States Department of Justice (US DOJ) and a civil complaint by Securities and Exchange Commission (US SEC) in the United States District Court for the Eastern District of New York against a non-executive director of the Company. The director is indicted by US DOJ for alleged securities & wire fraud conspiracy and securities fraud for misleading statements and civil complaint by US SEC in respect of alleged omission of disclosure of material facts in certain statements. The Company is not named in these matters.

Having regard to the status of the above-mentioned matters, and the fact that the matters stated above do not pertain to the Company, there is no impact on these financial statements.

41 Adani Energy Solutions Limited (AESL), formerly know as Adani Transmission Limited (ATL) has acquired the control of the Company w.e.f. 29 August, 2018, through its purchase from Reliance Infrastructure Limited ("Rlnfra"), of the equity shares of the Company.

As per the Share Purchase Agreement (SPA), Rlnfra had retained positive and negative rights through an overriding title in favour of Rlnfra in respect of Regulatory Assets under Approval (RAUA) Matters, which were not transferred to the Holding Company, and consequently, Rlnfra retained the RAUA Matters. Rlnfra novated these at a commercially agreed consideration of ₹ 2,802 crores to the Holding Company pursuant to the security novation agreement dated 17 September 2024. Consequently, considering the certainty of the outcome of these matters, the Company has recognised regulatory assets of ₹ 2,802 crores with corresponding liability payable to the Holding Company.

42 Related Party Disclosure

- 3
- Key Managerial Personnel are entitled to post-employment benefits and other long term employee benefits recognised as per Ind AS 19 - 'Employee Benefits' in the financial statements. As these employee benefits are lump sum amounts provided on the basis of actuarial valuation, the same is not included above.
- 4
- Refer note 34 (C) for commitments with related parties.
- 5
- Amounts disclosed are contractual undiscounted cash flows.

43 Disclosure under Ind AS 19 "Employee benefits" :

1 Defined contribution plan

- (i)
- Provident fund
- (ii)
- Superannuation fund
- (iii)
- State defined contribution plans
-
- Employer's contribution to Employees' state insurance
-
- Employers' Contribution to Employees' Pension Scheme 1995

The provident fund and the state defined contribution plan are operated by the Regional Provident Fund Commissioner and the superannuation fund is administered by the trustees of the AEML Superannuation Scheme. Under the schemes, the Company is required to contribute a specified percentage of payroll cost to the retirement benefit schemes to fund the benefits. The Company has no obligation other than the contribution to the fund.

The Company has recognised the following amounts as expense in the statement of profit and loss for the year:

Particulars	For the year ended 31 March, 2025	For the year ended 31 March, 2024
Contribution to Provident fund	39.73	41.84
Contribution to Employees Superannuation fund	5.17	6.06
Contribution to Employees State Insurance Corporation	-	0.01
Contribution to Employees Pension scheme	5.19	5.83

2 Defined benefit plan

Gratuity

The Company operates a funded gratuity plan in the form of a Trust, governed by Trustees appointed by the Company and administered by Life Insurance corporation. Every employee is entitled to a benefit equivalent to fifteen days salary last drawn for each completed year of service in line with the Payment of Gratuity Act, 1972 or Company scheme whichever is beneficial. The same is payable at the time of separation from the Company or retirement, whichever is earlier. The benefits vest after five years of continuous service.

Impact on defined benefit obligation –in ₹ crores	12.45	11.64

- 2.(i) The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting year) has been applied as when calculating the defined benefit liability recognised in the balance sheet.
- 2.(ii) The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

- 3 Risk exposure:
Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed below:
- 3.(i) Asset volatility:
The plan liabilities are calculated using a discount rate set with reference to government bond yield. If plan assets underperform this yield, it will result in deficit. These are subject to interest rate risk. To offset the risk, the plan assets have been deployed in high grade insurer managed funds.
- 3.(ii) Inflation rate risk:
Inflation higher than expected increase in salary could increase the defined benefit obligation.
- 3.(iii) Demographic risk:
The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

44 Regulatory deferral account assets

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024
Regulatory deferral account assets (net)	3,087.61	1,571.36
Total	3,087.61	1,571.36

Rate regulated activities

- As per the Ind AS-114 'Regulatory Deferral Accounts', the business of electricity distribution is a Rate Regulated activity wherein Maharashtra Electricity Regulatory Commission (MERC), the regulator determines Tariff to be charged from consumers based on prevailing regulations in place.
- MERC Multi Year Tariff Regulations, 2019 (MYT Regulations), is applicable for the period beginning from 1 April, 2020 to 31 March, 2025. These regulations require MERC to determine tariff in a manner wherein the Company can recover its fixed and variable costs including assured rate of return on approved equity base, from its consumers. The Company determines the Revenue, Regulatory Assets and Liabilities as per the terms and conditions specified in MYT Regulations.
- MERC vide its Multi Year Tariff (MYT) order dated 28 March 2025, has approved the Truing-up of FY 2022-23 and FY 2023-24, Provisional Truing-up for FY 2024-25, and ARR and Tariff for 5th Control Period from FY 2025-26 to FY 2029-30 in accordance with MYT Regulations, 2024, for Transmission and Distribution Business of the Company. Consequent to the above order, the Company has recognised net income of ₹ 134.33 crores during the year ended 31 March 2025.
- Pursuant to the Mid Term Review (MTR) order issued by Maharashtra Electricity Regulatory (MERC) on 31 March 2023, the Company has recovered from customers Regulatory Asset Charge (RAC) for past years. The impact thereof on the Revenue from Operations and Net Regulatory Income/(Expense) for the reporting periods is as stated below:

Notes forming part of the Financial Statements
for the year ended March 31, 2025

A. Revenue from operations

Particulars	For the year ended 31 March, 2025	For the year ended 31 March, 2024
a Revenue from operations for the year	10,731.51	9,090.47
b Recovery of RAC for past years	884.91	657.48
c Revenue from operations (including past year recovery) (a-b)	11,616.42	9,747.95

B. Net Movement in Regulatory Deferral Account Balances – Income / (Expenses)

Particulars	For the year ended 31 March, 2025	For the year ended 31 March, 2024
a Regulatory gap / (surplus) for current year	(400.81)	267.08
b Movement in regulatory deferral balance other comprehensive income - Distribution	(15.06)	(13.60)
c Recovery of RAC for past years	(884.91)	(657.48)
d Regulatory (expense) / income(net) (a-b-c)	(1,300.78)	(404.00)

5 Reconciliation of Regulatory deferral account balances (net) of distribution business as per Rate Regulated Activities is as follows:

Particulars	As at 31 March, 2025	As at 31 March, 2024
1 Opening Regulatory deferral account balances (net)	1,571.36	1961.73
2 Movements		
2.1 Add:		
Payable towards regulatory asset under approval (refer note 41)	2,802.00	-
2.2 Less:		
Revenue gap for current year	(400.81)	267.08
Recovery of RAC for past years	(884.91)	(657.48)
Others	(0.03)	0.03
2.3 Net movement during the year	1,516.25	(390.37)
3 Closing regulatory deferral account balances (net)	3,087.61	1,571.36

Note :

- (i) Risk associated with future recovery/ reversal of regulatory deferral account balances
- (a) regulatory risk on account of changes in regulations.
- (b) other risks including currency or other market risks, if any.
- Any change in the Tariff regulations beyond the current tariff period ending on 31 March 2025 may have an impact on the recovery of Regulatory deferral account balances.
- (ii) The Company will recover regulatory gap of ₹ 861.03 crores in FY 2025-26, out of ₹ 3,087.61 crores while balance will be recovered over the life of the projects as per existing MERC regulations.

Derivative instruments designated in hedge accounting relationship	86.41	86.41	62.80	62.80
Other financial liabilities	4,028.48	4,028.48	1,041.37	1,041.37
Total	18,581.47	17,042.90	15,672.87	14,213.12

Above excludes carrying value of investment in subsidiary accounted at cost in accordance with Ind AS 27.

The management assessed that the fair value of cash and cash equivalents, other balances with bank, trade receivables, loans, trade payables, other financial assets and liabilities approximate their carrying amounts largely due to the short term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties. The following methods and assumptions were used to estimate the fair values.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Fair value of the Government securities, mutual funds are based on the price quotations near the reporting date. The fair value of loans given to employees, bearing interest, approximate their carrying value.

The borrowings including Senior Secured notes and Sustainability linked notes are listed on the Singapore Stock Exchange. The fair value of these borrowings have been determined based on the prevailing market rate on the said stock exchange as on the reporting date.

The fair value of loans from banks and other financial liabilities, as well as other non-current financial liabilities is estimated by discounting future cash flow using rates currently available for debt on similar terms, credit risk and remaining maturities.

The cost of certain unquoted investments approximate their fair value because there is a wide range of possible fair value measurements and the cost represents the best estimate of fair value within that range.

The Company enters into derivative financial instruments with various counterparties, principally banks and financial institutions with investment grade credit ratings. The most frequently applied valuation techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies, interest rate curves and forward rate curves of the underlying currency. All derivative contracts are fully collateralized, thereby, eliminating both counterparty and the company's own non-performance risk.

- 2 The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels

Level 1 :

Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 :

Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 :

Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Particulars	Fair Value Hierarchy as at 31 March, 2025			
	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total

3 Capital Management & Gearing Ratio

The Company manages its capital structure in a manner to ensure that it will be able to continue as a going concern while optimising the return to stakeholders through the appropriate debt and equity balance. The Company's capital structure is represented by equity (comprising issued capital, retained earnings and other reserves) and debt. The Company's management reviews the capital structure of the Company on an annual basis. As part of this review, the management considers the cost of capital and the risks associated with each class of capital. The Company's objective is to ensure that the gearing ratio (debt equity ratio) is around 70 : 30

Gearing ratio

The gearing ratio at the end of the reporting period was as follows :

Particulars	As at 31 March, 2025	As at 31 March, 2024
Debt	12,514.03	13,266.54
Less : Cash & bank balance	1,875.31	1,480.26
Net debt	10,638.72	11,786.28
Total Capital	4,120.18	4,588.51
Capital & net debt	14,758.90	16,374.79
Gearing ratio^	72%	72%

^ Gearing ratio excluding fair valuation of foreign loan amounting to ₹ 1,917.55 crores (31 March, 2024 ₹ 1,714.33 crores) is 68% (31 March, 2024 69%)

- (i) Debt includes Non-current borrowings at amortised cost (including current maturities), current borrowings and interest accrued on borrowings

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no significant breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

4 Financial risk management objectives and policies

The Company's principal financial liabilities, other than derivatives, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations/projects. The Company's principal financial assets include loans, investment including mutual funds, trade and other receivables, and cash and cash equivalents which is derived from its operations.

In the ordinary course of business, the Company is mainly exposed to risks resulting from exchange rate fluctuation (currency risk), interest rate movements (interest rate risk) collectively referred as Market Risk. The Company's senior management oversees the management of these risks. It manages its exposure to these risks through the use of derivative financial instruments for hedging transactions. It uses derivative instruments such as cross currency swaps, full currency swaps, principal only swaps, coupon only swaps to manage these risks. These derivative instruments reduce the impact of both favourable and unfavourable fluctuations.

The Company's risk management activities are subject to the management, direction and control of Central Treasury team of the Company under the framework of Risk Management Policy for currency and interest rate risk, as approved by the Board of Directors of the Company. The Company's Central Treasury team ensures appropriate financial risk governance framework for the Company through appropriate policies & procedures and financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. It is the Company's policy that no trading in derivatives for speculative purposes is undertaken.

The decision of whether and when to execute derivative financial instruments along with its tenure can vary from period to period depending on market conditions and the relative costs of the instruments. The tenure is linked to the timing of the underlying exposure, with the connection between the two being regularly monitored. All derivative contracts are executed with counterparties that are creditworthy. The outstanding derivatives are reviewed periodically to ensure that there is no inappropriate concentration of outstanding to any particular counterparty.

A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk. The sensitivity analysis in interest rate and foreign currency risk sections relate to the position as at 31 March, 2024 and 31 March, 2025.

The sensitivity analysis have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant as at 31 March, 2024 and 31 March, 2025.

I. Foreign currency risk

The Company is exposed to foreign currency risks arising from its exposure to the USD and EURO. Foreign currency risks arise from future commercial transactions and recognized assets and liabilities, when they are denominated in a currency other than Indian Rupee. Exposures on foreign currency loans are managed through the Company wide hedging policy, which is reviewed periodically to ensure that the results from fluctuating currency exchange rates are appropriately managed. The Company's exposure with regards to foreign currency risk is given below.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

The following table shows foreign currency exposures in USD / EURO on financial instruments at the end of the reporting period. (refer note 45 (5))

Particulars	As at 31 March, 2025		As at 31 March, 2024	
	Foreign currency (in millions)	Amount	Foreign currency (in millions)	Amount
In USD				
(i) Interest accrued but not due on borrowings	12.70	108.59	13.83	115.38

Total	0.06	0.64	-	-

(i) Foreign currency sensitivity analysis

The following tables demonstrate the sensitivity to a reasonably possible change in currency exchange rates, with all other variables held constant on the Company's profit before tax and pre-tax equity is as under:

Particulars	Effect on profit before tax and consequential impact on equity			
	As at 31 March, 2025		As at 31 March, 2024	
	Increase	Decrease	Increase	Decrease
Rupee increase / (decrease) by ₹ 1 against USD / EURO	0.10	(0.10)	0.24	(0.24)
Rupee increase / (decrease) by ₹ 2 against USD / EURO	0.19	(0.19)	0.48	(0.48)
Rupee increase / (decrease) by ₹ 3 against USD / EURO	0.28	(0.28)	0.72	(0.72)

Notes forming part of the Financial Statements
for the year ended March 31, 2025

II. Interest rate risk

The Company is exposed to interest rate risk on variable rate borrowings and on the refinancing of fixed rate debt. The Company’s policy is to borrow long term debt with fixed interest rate. The short term borrowings of the Company are mainly floating rate rupee denominated working capital borrowings.

The long-term borrowings of the Company includes borrowings by way of Senior Secured Notes (SSN) and Shareholder’s Affiliated Debts carries fixed rate of interest till maturity. During the year 2021-22, Company issued the Sustainability Linked Bond (SLB) of USD 300 million through 10-year notes under USD 2 billion Global Medium-Term Notes program (GMTN) which carry fixed rate of interest till maturity with certain Sustainability Performance Targets (SPTs), non-attainment of which will result in increase in fixed rate of interest by 0.15 % p.a, for SPT 1 in March 2027 and further 0.15 % p.a. for SPT 2 for March 2029.

(i) Interest rate sensitivity:

The sensitivity analysis below has been determined based on average outstanding exposure of borrowings during the year that have floating interest rates.

If the interest rates have changed by 50 basis points higher or lower and all the other variables were held constant, the effect on interest expense for the respective financial years and consequent effect on Company’s profit and equity in that financial year would have been as below:

	As at 31 March, 2025		As at 31 March, 2024	
	50 bps increase	50 bps decrease	50 bps increase	50 bps decrease
Interest expense on loan	3.31	(3.31)	2.31	(2.31)
Effect on profit before tax and equity	(3.31)	3.31	(2.31)	2.31

(ii) Price risk sensitivity

The Company invests its surplus funds in various mutual funds and fixed deposits. In order to manage its price risk arising from investments, the Company diversifies its portfolio in accordance with the limits set by the risk management policies. The Company has exposure across mutual fund and money market instruments.

Due to the very short tenure of money market instruments and the underlying portfolio in liquid schemes, these do not pose any significant price risk.

B. Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables and other financial assets) and from its investing activities, including loans given, deposits with banks, financial institutions & others and other financial assets.

Customer credit risk is managed by the Company’s established policy, procedures and control relating to customer credit risk defined in accordance with this assessment.

Credit risk on cash and bank balances is limited as the Company generally invests in deposits with banks with high credit ratings assigned by international and domestic credit rating agencies. Investments primarily include investment in government securities and considered as low risk investments. Counterparty credit limits are reviewed by the Company’s management on a regular basis. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty’s potential failure to make payments.

Notes forming part of the Financial Statements
for the year ended March 31, 2025

Particulars	As at 31 March, 2025	As at 31 March, 2024
Trade receivables	1,323.78	1,124.19
Loans	52.22	60.46
Other financial assets	1,004.09	1,145.71
Total	2,380.09	2,330.36

Refer note 12 for credit risk and other information in respect of trade receivables. Moreover, given the diverse nature of the consumer profile of the Company, trade receivables are spread over a number of customers with no significant concentration of credit risk. No single customer accounted for 10.00% or more of revenue basis in any of the years presented. The history of trade receivables shows a negligible provision for bad and doubtful debts compared to the volume/value of sales recorded. Other receivables as stated above are due from the parties under normal course of the business having sound credit worthiness and as such the Company believes exposure to credit risk to be minimal.

The Company has not acquired any credit impaired asset.

C. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments that are settled by delivering cash or another financial asset. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value The Company has an established liquidity risk management framework for managing its short term, medium term and long term funding and liquidity management requirements. The Company’s exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities The Company manages the liquidity risk by maintaining adequate funds in cash and cash equivalents The Company also has adequate credit facilities agreed with banks to ensure that there is sufficient cash to meet all its normal operating commitments in a timely and cost-effective manner.

Other financial liabilities	1,041.37	62.80	-	1,104.17
Total	3,992.46	2,207.86	13,029.03	19,229.35

** The table has been drawn up based on the undiscounted contractual maturities of the financial liabilities including interest that will be paid on those liabilities upto the maturity of the instruments, ignoring the call and refinancing options available with the Company.

*** Carrying value of lease liabilities is ₹ 486.20 crores (31 March, 2024 is ₹ 19.14 crores)

5 Derivative financial instrument

The Company uses derivatives instruments as part of its management of risks relating to exposure to fluctuation in foreign currency exchange rates. The Company does not acquire derivative financial instruments for trading or speculative purposes neither does it enter into complex derivative transactions to manage the above risks. The derivative transactions are normally in the form of cross currency swaps, principal only swaps, coupon only swaps to hedge its foreign currency risks and are subject to the Company's guidelines and policies.

The fair values of all derivatives are separately recorded in the balance sheet within current and non current assets and liabilities. Derivative that are designated as hedges are classified as current or non current depending on the maturity of the derivative.

The use of derivative can give rise to credit and market risk. The Company tries to control credit risk as far as possible by only entering into contracts with stipulated / reputed banks and financial institutions. The use of derivative instrument is subject to limits, authorities and regular monitoring by appropriate levels of management. The limits, authorities and monitoring systems are periodically reviewed by management and the Board. The market risk on derivative is mitigated by changes in the valuation of underlying assets, liabilities or transactions, as derivatives are used only for risk management purpose.

The Company has designated derivative contracts as cash flow hedges and recognise them at fair value. The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the statement of profit and loss. Amounts recognised in OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. These hedges have been effective for the year ended 31 March, 2025 and 31 March, 2024.

The fair value of the Company's derivative positions recorded under other financial assets and other financial liabilities as at 31 March, 2025 are as follows :-

(₹ In crore)				
Derivative Financials Instruments	As at 31 March, 2025		As at 31 March, 2024	
	Assets	Liabilities	Assets	Liabilities
Current				
Cashflow hedge*				
- Cross currency swaps	49.05	-	-	58.30
- Coupon only swaps	-	-	-	4.50
Total	49.05	-	-	62.80
Non Current				
Cashflow hedge*				
- Cross currency swaps	193.19	81.44	452.25	-
- Coupon only swaps	-	4.97	3.86	-
- Principal only swaps	169.59	-	103.58	-
Total	362.78	86.41	559.69	-

* Refer statement of profit and loss and statement of changes in equity for the changes in the fair value of cashflow hedge and reclassification from equity to profit or loss.

Derivative Contracts entered into by the Company and outstanding as at Balance Sheet date :

To hedge currency risks the company has entered into various derivative contracts. The category wise break-up of the amount outstanding as at Balance Sheet date is given below :-

Derivative Financials Instruments	As at 31 March, 2025			As at 31 March, 2024		
	Foreign Currency (In Millions)	Amount	Purpose	Foreign Currency (In Millions)	Amount	Purpose
In USD						
- Cross currency swaps*	1,300.00	11,111.75	Hedging of foreign currency borrowing - principal & interest liability	982.00	8,190.37	Hedging of foreign currency borrowing - principal & interest liability
- Coupon only swaps	300.00	2,564.25	Hedging of foreign currency borrowing - interest liability	480.00	4,003.44	Hedging of foreign currency borrowing interest liability,
- Principal only swaps	300.00	2,564.25	Hedging of foreign currency borrowing - principal liability	480.00	4,003.46	Hedging of foreign currency borrowing - principal liability
Total	1,900.00	16,240.25		1,942.00	16,197.27	

* During the year, the Company had executed 1 year cross currency swaps derivative contract of USD 186 million to hedge outstanding Shareholders Affiliated Debts of USD 234 million with effective from 10 November 2025 and accordingly, included in above figures as at 31 March 2025

47 The entire Generation, Transmission and Distribution business has been considered as a single segment in terms of IndAS-108 on Segment Reporting issued by the Institute of Chartered Accountants of India. There is no business outside India, the entire business has been considered as single geographic segment.

48 The Company uses an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the accounting software except the audit trail feature is enabled, for certain direct changes to SAP application and its underlying HANA database when using certain privileged / administrative access rights by authorised users where the process is started during the year and stabilized from March 17, 2025.

Further, there is no instance of audit trail feature being tampered with in respect of the accounting software where such feature is enabled. Additionally, the audit trail has been preserved by the Company as per the statutory requirements for record retention.

49 Statutory disclosures

- (i) The Indian Parliament has approved the Code on Social Security, 2020 which would impact the contributions by the company towards Provident Fund and Gratuity. The Ministry of Labour and Employment had released draft rules for the Code on Social Security, 2020 on November 13, 2020, and invited suggestions from stakeholders which are under consideration by the Ministry. The Company and its subsidiaries will assess

Notes forming part of the Financial Statements
for the year ended March 31, 2025

the impact and its evaluation once the subject rules are notified. The Company will give appropriate impact in its financial statements in the period in which, the Code becomes effective and the related rules to determine the financial impact are published.

- (ii) No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.
- (iii) No funds have been received by the Company from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.
- (iv) The Company does not have any benami property, where any proceeding has been initiated or pending against the Company for holding any benami property.
- (v) The Company does not have any such transactions which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act,1961 (such as, search or survey or any relevant provisions of Income Tax Act, 1961).
- (vi) The Company has not been declared as wilful defaulter by any bank or financial institution or other lenders.
- (vii) The Company has complied with the number of layers prescribed under clause (87) of section 2 of the Act read with the Companies (Restriction on number of Layers) Rules, 2017.
- (viii) The Company has not traded or invested in Crypto Currency or in Virtual Currency during the reporting period.
- (ix) The Company has not entered into any non-cash transactions with its directors or persons connected with them during the year.

50 In accordance with the requirement of Ind AS 1 'Presentation of Financial Statements' and Division II - Ind AS Schedule III to the Companies Act, 2013, the Company has made better presentation in the balance sheet as at 31 March 2024, for the below items which does not have any impact to the net profits or the financial position presented in the financial statements.

Particulars	Notes	Before Re-classification	Re-classification	After Re-classification	Liabilities

Notes forming part of the Financial Statements
for the year ended March 31, 2025

51 The Ministry of Power, Government of India, has issued Electricity Distribution (Accounts and Additional Disclosure) Rules, 2024 ("the Rules") in pursuance to section 176(1) and 176(2)(z) of the Electricity Act, 2003 read with second proviso to section 129(1) of the Companies Act, 2013, which is applicable to the Company and is effective from the date of its notification in the Official Gazette i.e., 14th October, 2024.

Further, on 8th April 2025, Ministry of Power has released draft amendment in Rule 4 of the aforementioned rules and is seeking comments within a week.

The Company believes the aforementioned rules will not have any significant impact on its accounting practices and thereby in the financial statements. The Company has opted to include Additional Disclosures Statements, as required by these rules for the distribution business, in annual report and not as part of the financial statements for the current year being first year of the preparation of Additional Disclosure Statements.

52 Significant events after the reporting period

There were no significant adjusting events that occurred subsequent to the period till the date of signing of financial statements the other than the events disclosed in the relevant notes.

The accompanying notes are an integral part of these financial statements.

Independent Auditor's Report

To
the Members of
Adani Electricity Mumbai Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

1. We have audited the accompanying consolidated financial statements of Adani Electricity Mumbai Limited ('the Holding Company') and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group'), as listed in Annexure 1, which comprise the Consolidated Balance Sheet as at 31 March 2025, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Cash Flow Statement and the Consolidated Statement of Changes in Equity for the year then ended, and notes to the consolidated financial statements, including a material accounting policy information and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors on separate financial statements and on the other financial information of the subsidiaries, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, and other accounting principles generally accepted in India of the consolidated state of affairs of the Group, as at 31 March 2025, and their consolidated loss (including other comprehensive income),

consolidated cash flows and the consolidated changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained together with the audit evidence obtained by the other auditors in terms of their reports referred to in paragraph 15 of the Other Matter section below, is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

4. Key audit matters are those matters that, in our professional judgment and based on the consideration of the reports of the other auditors on separate financial statements of the subsidiaries, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

5. We have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter
Accrual of regulatory deferral income / expense and corresponding assets / liability	
Refer note 3.13 in accounting policy and note 45 in notes forming part of consolidated financial statements. The Group recognizes regulatory deferral income / expense and corresponding asset / liability basis its understanding and interpretation of regulatory provisions applicable to the distribution business of the Group as per the Electricity Act, 2003 and regulations framed thereunder by the Mumbai Electricity Regulatory Commission ('MERC') (the 'tariff regulations'), for the difference between entitled return as per tariff regulations (i.e., allowable cost plus return on equity) and revenue collected basis tariff rates approved by the regulator in provisional tariff orders, which are subject to true-ups in the future tariff orders. Significant judgments and assumptions including interpretation of the tariff regulations, past tariff orders, judicial pronouncements etc., are involved in recognition and assessment of recoverability of such regulatory deferral balances. The Group has recognised net regulatory deferral assets of ₹ 3,087.61 crores as at 31 March 2025 and net regulatory deferral liabilities of ₹ 17.15 crores (including expense of ₹ 1,317.55 crores for the year recognised in statement of profit and loss and income of ₹ 15.80 crores recognised in other comprehensive income). Considering the materiality of the amounts involved, complexity and significant judgement and assumptions involved as mentioned above, accrual of regulatory deferral income / expense and corresponding assets / liability has been considered as key audit matter for the current year audit	Our audit procedures in relation to accrual of regulatory deferral income / expense and corresponding assets / liability included but were not limited to the following: a. Obtained an understanding of the management process and evaluated the design and tested the operating effectiveness of key internal financial controls over accrual of regulatory deferrals; b. Evaluated the Group's accounting policies with respect to accrual for regulatory deferrals and assessed its compliance with the requirements of Ind AS 114 'Regulatory Deferral Accounts'; c. Reviewed management's evaluation of recognition of regulatory deferral account balance including key assumptions and estimates used in such evaluation and corroborated them with the understanding obtained on prevailing tariff regulations, past tariff orders and underlying records and verified the arithmetical accuracy and reasonableness of such workings; and d. Evaluated the appropriateness and adequacy of the related disclosures in the consolidated financial statements in accordance with the applicable Indian Accounting Standards.
Impairment assessment of Transmission Cash Generating Unit (TCGU)	
Refer note 3.5 in accounting policy and notes 5c and 33 in notes forming part of the consolidated financial statements. The Group's TCGU includes a transmission license having an indefinite life with a carrying value of ₹ 981.62 crores as at 31 March 2025. In accordance with the requirements of Ind AS 36 'Impairment of Assets', the Group has performed an annual impairment test of aforesaid transmission license, by determining the recoverable value of the TCGU to which the transmission license pertains, using discounted cash flow method with the help of external valuation experts.	Our audit procedures in relation to impairment assessment of TCGU included but were not limited to the following: a. Obtained an understanding of the management's impairment assessment process and reviewed management's assessment of useful life of transmission license; b. Evaluated the design and tested the operating effectiveness of the key internal financial controls relating to the impairment assessment for TCGU;

Key audit matter	How our audit addressed the key audit matter
The determination of the recoverable value of TCGU requires management to make significant estimates and assumptions in forecasting the future cash flow projections including projected capital expenditure, which is subject to regulatory approvals, the estimated useful life of the transmission license and the discount rates. Considering the significance of the carrying amount of TCGU and auditing management judgements and estimates as mentioned above involves high degree of subjectivity and requires significant auditor judgement, impairment assessment of TCGU has been considered as a key audit matter for the current year audit.	c. Assessed the professional competence and objectivity of the management's valuation expert and obtained their valuation report on determination of recoverable value of the TCGU; d. Traced the cash flow projections provided by management to approved business plans and tested the arithmetical accuracy of such projections; e. Involved auditor's experts to assist in evaluating the appropriateness of the valuation methodology and reasonableness of the assumptions used by the management's expert to calculate the recoverable value of TCGU; f. Performed sensitivity analysis on the key assumptions to determine estimation uncertainty involved and ascertain the sufficiency of headroom available; and g. Evaluated the appropriateness and adequacy of the disclosure made in the consolidated financial statements, in accordance with the applicable Indian Accounting Standards.
Valuation of derivative financial instruments and hedge accounting	
Refer note 3.7 and 46.5 for accounting policy and explanatory note, respectively, in relation to derivative financial instruments and hedge accounting. In line with Group's risk management policy, the Group had purchased various derivative financial instruments to hedge its foreign currency risks in relation to the long-term foreign currency debt. The Management has designated these derivative financial instruments and the aforesaid debt at initial recognition as cash flow hedge relationship as per Ind AS 109, Financial Instruments. The valuation of hedging instrument is complex and necessitates a sophisticated system to record and track each contract and calculate the related valuations at each financial reporting date. Such valuation of hedging instruments and assessment of hedge effectiveness involves significant assumptions and judgements such as discount rates, forward exchange rates and future interbank rates.	Our audit procedures in relation to valuation of derivative financial instruments and hedge accounting included, but were not limited to the following: a. Evaluated design and tested operating effectiveness of the key internal financial controls over the determination of a hedge, adequacy of hedge documentation, evaluation of the hedge effectiveness, valuation of derivative financial instruments and related hedge accounting; b. Obtained an understanding of management's process and the risk management policies of the Group in respect of derivative transactions; c. Engaged auditor's valuation experts to assist in evaluation of hedge effectiveness documentation and re-performing the year-end fair valuations of such derivative financial instruments; d. Verified the completeness of hedging contracts by tracing from independent confirmations obtained from respective banks;

Key audit matter	How our audit addressed the key audit matter
In view of material impact on the Group's consolidated financial statements and significant assumptions, judgements and complexity involved as mentioned above, we have determined valuation of derivative financial instruments and hedge accounting as a key audit matter for the current year audit.	e. Considered the consistent application of accounting policy in respect to derivative financial instruments and hedge accounting and ensured the same is in accordance with the requirements of Ind AS 109; and f. Evaluated the appropriateness and adequacy of the related disclosures in the consolidated financial statements in accordance with the applicable financial reporting framework.

Information other than the Consolidated Financial Statements and Auditor's Report thereon

6. The Holding Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Director's Report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

7. The accompanying consolidated financial statements have been approved by the Holding Company's Board of Directors. The Holding Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other

comprehensive income, consolidated changes in equity and consolidated cash flows of the Group in accordance with the Ind AS specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Board of Directors of the Holding Company, as aforesaid.

8. In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.
9. Those respective Board of Directors are also responsible for overseeing the financial reporting process of the companies included in the Group.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

10. Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

11. As part of an audit in accordance with Standards on Auditing specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to consolidated financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation; and
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group, to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of financial statements of such entities included in the consolidated financial statements, of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

12. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
13. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
14. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matter

15. We did not audit the financial statements of three subsidiaries, whose financial statements reflect total assets of ₹ 4,495.73 crores as at 31 March 2025, total revenues of ₹ 0.25 crores and net cash outflows amounting to ₹ 87.30 crores for the year ended on that date, as considered in the consolidated financial statements. These financial statements have been audited by other auditors whose reports have been furnished to us by the management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and our report in terms of sub-section (3) of section 143 of the Act in so far as it relates to the aforesaid subsidiaries are based solely on the reports of the other auditors.
- Our opinion above on the consolidated financial statements, and our report on other legal and regulatory requirements below, are not modified in respect of the above matters with respect to our reliance on the work done by and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

16. As required by section 197(16) of the Act based on our audit and on the consideration of the reports of the other auditors, referred to in paragraph 15, on separate financial statements of the subsidiaries, we report that the Holding Company has paid remuneration to their directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act. Further, we report that four (4) subsidiaries incorporated in India whose financial statements have been audited under the Act have not paid or provided for any managerial remuneration during the year. Accordingly, reporting under section 197(16) of the Act is not applicable in respect of such subsidiaries.
17. As required by clause (xxi) of paragraph 3 of Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act based on the consideration of the Order reports issued by us and by the respective other auditors as mentioned in paragraph 15 above, of companies included in the consolidated financial statements and covered under the Act we report that there are no qualifications or adverse remarks reported in the respective Order reports of such companies.
18. As required by section 143(3) of the Act, based on our audit and on the consideration of the reports of the other auditors on separate financial statements and other financial information of the subsidiaries, incorporated in India whose financial statements have been audited under the Act, we report, to the extent applicable, that:
- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated financial statements;
- b) Except for the matters stated in paragraph 18(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as

- it appears from our examination of those books and reports of the other auditors.
- c) The consolidated financial statements dealt with by this report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements;
- d) In our opinion, the aforesaid consolidated financial statements comply with Ind AS specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015;
- e) On the basis of the written representations received from the directors of the Holding Company and its subsidiary and taken on record by the Board of Directors of the Holding Company and its subsidiaries, respectively, and the reports of the statutory auditors of its subsidiaries, covered under the Act, none of the directors of the Holding Company and its subsidiaries, are disqualified as on 31 March 2025 from being appointed as a director in terms of section 164(2) of the Act.
- f) The qualification relating to the maintenance of accounts and other matters connected therewith with respect to the consolidated financial statements are as stated in paragraph 18(b) above on reporting under section 143(3) (b) of the Act and paragraph 18(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended);
- g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Holding Company, and its subsidiaries covered under the Act, and the operating effectiveness of such controls, refer to our separate report in 'Annexure A' wherein we have expressed an unmodified opinion; and
- h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements and other financial information of the subsidiaries, incorporated in India whose financial statements have been audited under the Act:
- i. The consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group as detailed in Note 35(A) to the consolidated financial statements;
- ii. Provision has been made in these consolidated financial statements, as required under the applicable law or Ind AS, for material foreseeable losses, on long-term contracts including derivative contracts, as detailed in note 8 to the consolidated financial statements;
- iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company, and its subsidiaries covered under the Act, during the year ended 31 March 2025;
- iv.
- a. The respective managements of the Holding Company and its subsidiaries incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of their knowledge and belief as disclosed in note 49(ii) to the consolidated financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Holding Company or its subsidiaries to or in any person(s) or entity(ies), including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Holding Company, or any such subsidiaries ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
- b. The respective managements of the Holding Company and its subsidiaries

incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of their knowledge and belief, as disclosed in the note 49(iii) to the accompanying consolidated financial statements, no funds have been received by the Holding Company or its subsidiaries from any person(s) or entity(ies), including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Holding Company, or any such subsidiaries shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures performed by us and that performed by the auditors of the subsidiaries, as considered reasonable and appropriate in the circumstances, nothing has come to our or other auditors' notice that has caused us or the other auditors to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.
- v. The Holding Company and its subsidiaries have not declared or paid any dividend during the year ended 31 March 2025.
- vi. As stated in Note 48 to the consolidated financial statements and based on our

examination which included test checks, and that performed by the respective auditors of the subsidiaries of the Holding Company which are companies incorporated in India and audited under the Act, in respect of financial year commencing on 1 April 2024, has used an accounting software for maintaining their books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software except that, the audit trail feature was enabled to log any direct data changes at the database from 17 March 2025.

During the course of our audit, we and respective auditors of the above referred subsidiaries did not come across any instance of audit trail feature being tampered with in respect of the accounting software where audit trail was enabled.

The audit trail has been preserved by the Holding Company and its subsidiaries as per the statutory requirements for record retention from the date the audit trail was enabled for the accounting software.

List of subsidiaries included in the Consolidated Financial Statements

1. AEML SEEPZ Limited
2. Adani Electricity Mumbai Infra Limited
3. Pointleap Projects Private Limited
4. Superheights Infraspaces Private Limited

Annexure B Independent Auditor’s Report

Report of even date to the members of the Adani Electricity Mumbai Limited on the consolidated financial statements for the year ended 31 March 2025

Independent Auditor’s Report on the internal financial controls with reference to consolidated financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (‘the Act’)

1. In conjunction with our audit of the consolidated financial statements of Adani Electricity Mumbai Limited (‘the Holding Company’) and its subsidiaries (the Holding Company and its subsidiaries together referred to as ‘the Group’), as at and for the year ended 31 March 2025, we have audited the internal financial controls with reference to financial statements of the Holding Company and its subsidiary companies, which are companies covered under the Act, as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

2. The respective Board of Directors of the Holding Company and its subsidiary companies, which are companies covered under the Act, are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company’s business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the internal financial controls with reference to financial statements of the Holding Company and its subsidiary companies, as aforesaid, based on

our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India (‘ICAI’) prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (‘the Guidance Note’) issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matter paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to financial statements of the Holding Company and its subsidiary companies as aforesaid.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company’s internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding

the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion and based on the consideration of the reports of the other auditors on internal financial controls with reference to financial statements of the subsidiary companies, the Holding Company and its subsidiary companies, which are companies covered under the Act, have in all material respects, adequate internal financial controls with reference

to financial statements and such controls were operating effectively as at 31 March 2025, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matter

9. We did not audit the internal financial controls with reference to financial statements insofar as it relates to three subsidiary companies, which are companies covered under the Act, whose financial statements reflect total assets of ₹4,495.73 crores and net assets of ₹ 1,508.89 crores as at 31 March 2025, total revenues of ₹ 0.25 crores and net cash outflows amounting to ₹ 87.30 crores for the year ended on that date, as considered in the consolidated financial statements. The internal financial controls with reference to financial statements in so far as it relates to such subsidiary companies have been audited by other auditors whose reports have been furnished to us by the management and our report on the adequacy and operating effectiveness of the internal financial controls with reference to financial statements for the Holding Company and its subsidiary companies, as aforesaid, under Section 143(3)(i) of the Act in so far as it relates to such subsidiary companies is based solely on the reports of the auditors of such companies. Our opinion is not modified in respect of this matter with respect to our reliance on the work done by and on the reports of the other auditors.

Consolidated Statement of cash flows

for the year ended March 31, 2025

Note

- 1
- The statement of cash flows has been prepared under the indirect method as set out in Ind AS 7 "Statement of Cash Flows"
- 2
- Finance cost paid is net of ₹ 600.48 crores (31 March 2024 - Nil), amount received on mature of derivative / hedge instruments
- 3
- Disclosure under Para 44A as set out in Ind AS 7 on Statement of Cash Flows under Companies (Indian Accounting Standards) Rules, 2017 (as amended) is given below:

Particulars	As at 01 April, 2024	Cash flows (net)	Non-cash transaction	As at 31 March, 2025
Non-current borrowings	13,323.60	1,464.19	(341.05)	14,446.74
Current borrowings	1,050.00	(650.00)	-	400.00
Lease Liabilities	19.14	(7.99)	-	11.15
Interest accrued but not due on borrowings	118.34	(806.18)	796.82	108.98
Total	14,511.08	0.02	455.77	14,966.87

Particulars	As at 01 April, 2023	Cash flows (net)	Non-cash transaction	As at 01 April, 2024
Non-current borrowings	13,120.57	316.84	(113.81)	13,323.60
Current borrowings	500.00	550.00	-	1,050.00
Lease Liabilities	30.74	(11.60)	Nil	19.14
Interest accrued but not due on borrowings	123.25	(1211.46)	1206.55	118.34
Total	13,774.56	(356.22)	1092.74	14,511.08

Note : Non-cash transactions represents movement in revaluation of foreign currency borrowings and amortised cost of borrowings.

Consolidated Notes forming part of the Financial Statements

for the year ended March 31, 2025

1 Corporate information

Adani Electricity Mumbai Limited ("AEML") ("The Company") is a public limited company incorporated and domiciled in India having its registered office at Adani Corporate House, Shantigram, Near Vaishno Devi Circle, S. G. Highway, Khodiyar, Ahmedabad 382421, Gujarat, India. It is subsidiary of Adani Energy Solutions Limited (AESL) formerly known as Adani Transmission Limited ("the Holding Company") and ultimate holding entity is S. B. Adani Family Trust (SBAFT).

The integrated Mumbai Generation, Transmission and Distribution (GTD) Business, under a license, transmits and distributes electricity to consumers in and around suburbs of Mumbai inclusive of areas covered under the Mira Bhayander Municipal Corporation, making it the country's largest private sector integrated power utility. The Tariff to be charged to the consumers is regulated by Maharashtra Electricity Regulatory Commission ("MERC").

The Company has USD bonds which are listed at Singapore Stock Exchange.

The Company has incorporated wholly owned subsidiary AEML SEEPZ Limited ("ASL") for the purpose of distribution of electricity to Santacruz Electronic Export Processing Zone ("SEEPZ") and Adani Electricity Mumbai Infra Limited (AEMIL) for the purpose of carrying out works like infrastructure development, transmission line development along with the commissioning of HVDC.

During the current year the Company has acquired following real estate companies:

- 1)
- Pointleap Projects Private Limited (PPPL)
- 2)
- Superheight Infraspce Private Limited (SIPL)

The Company, AEMIL, ASL, PPPL and SIPL is together referred to as "the Group" in these Consolidated Financial Statements.

These financial statements of the Company for the year ended 31 March 2025 were authorised for issue by the board of directors on 22 April, 2025.

2 Basis of preparation and presentation

The financial statements of the Group have been prepared in accordance with Indian Accounting Standards (IndAS) as notified under the Companies (Indian Accounting Standards) Rules, 2015 read with section 133 of the Companies Act, 2013 ("the Act") (as amended from time to time).

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

The financial statements have been prepared in "Indian Rupees" which is also the Group's functional currency and all amounts, are rounded to the nearest Crore with two decimals, (Transactions below ₹ 50,000.00 denoted as ₹ 0.00), unless otherwise stated.

3 Material accounting policies

3.1 Current versus Non-Current Classification

Material details of Operating Cycle: Based on the time involved between acquisition of assets for processing and their realisation in cash and cash equivalents, the Group has identified twelve months as its operating cycle for determining current and non-current classification of assets and liabilities in the consolidated balance sheet.

3.2 Property, plant and equipment ("PPE")

All items of property, plant and equipment, including freehold land, are initially recorded at cost. Subsequent to initial recognition, property, plant and equipment other than freehold land are measured at cost less accumulated depreciation and any accumulated impairment losses. Freehold land has an unlimited useful life and therefore is not depreciated.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

In respect of property, plant and equipment (“assets”) pertaining to Mumbai generation, transmission and distribution business acquired from Reliance Infrastructure Limited (RIL) under a Court sanctioned scheme of arrangement with an appointed date of 01 April, 2018, in line with the requirements of the Court Scheme, the Group has accounted for such Assets at their respective fair values as at 01 April, 2018 based on valuation done by a Government registered valuer. Subsequent additions to the assets on or after 01 April, 2018 are accounted for at cost.

Capital work-in-progress is stated at cost, net of accumulated impairment loss, if any. Other indirect expenses incurred relating to project, net of income earned during the project development stage prior to its intended use, are considered as pre-operative expenses and disclosed under capital work-in-progress.

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Consolidated statement of profit and loss.

Depreciation

Depreciation commences when an asset is ready for its intended use. Depreciation is recognised based on the cost of assets (other than freehold land) less their residual values over their useful lives. Freehold land is not depreciated.

Regulated Assets: Subject to the below, depreciation on property, plant and equipment in respect of Mumbai generation, transmission and distribution business of the Group covered under Part B of Schedule II of the Companies Act, 2013, has been provided on the straight-line method at the rates using the methodology as notified by the regulator.

For certain types of assets in respect of which useful life is not specified in MERC Multi Year Tariff Regulations (“MYT regulations”), useful life as prescribed under Schedule-II of Companies Act, 2013 is considered.

In respect of assets (other than Dahanu Thermal Power Station-DTPS) which have been accounted at fair value, considering life as specified in MYT regulations, depreciation is provided on Straight Line Method (considering a salvage value of 5%) over their balance useful life. In respect of DTPS based on technical evaluation, the balance useful life has been determined as 15 years as on 01 April, 2018.

Salvage value in respect of assets which have not been accounted at fair value has been considered at 10% except in respect of furniture & fixture, vehicles, office equipment and electrical installations which has been considered at 5% and computers & software at nil (Consequent to amendment in tariff regulations, the Group has changed the salvage value of computers from 5 % to nil w.e.f. 01 April 2020).

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, and the effect of any changes in estimate is accounted for on a prospective basis.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

Estimated useful lives of assets other than assets at DTPS are as follows:

Type of Asset	Useful lives
Building	30-60 Years
Plant and equipment (except meters & batteries) *	25-35 Years
Plant and equipment - meters*	10 Years
Plant and equipment - batteries*	10 Years
Distribution line / transmission cable	35 Years
Street light	25 Years
Furniture and fixtures	15 Years
Office equipment	5 Years
Computers, servers & related network	3 Years
Vehicles	15 Years

*Consequent to amendment in tariff regulations, w.e.f. 12 July 2022 the Group has changed the useful life (years) in respect of batteries (from 5 to 10), computers (from 6 to 6/3), furniture and fixtures (from 10 to 15), vehicles (from 8-10 to 15) and roads bridges (from 15 to 30).

3.3 Intangible assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives.

In respect of intangible asset (“assets”) pertaining to Mumbai generation, transmission and distribution business acquired from Reliance Infrastructure Limited (RIL) under a Court sanctioned scheme of arrangement with an appointed date of 01 April 2018, in line with the requirements of the Court Scheme, the Group has accounted for such Assets at their respective fair values as at 01 April, 2018 based on valuation done by professional valuation firm.

Subsequent additions to the assets on or after 01 April, 2018 are accounted for at cost.

Derecognition of Intangible assets.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognised in Consolidated statement of profit and loss when the asset is derecognised.

Useful life

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Consolidated statement of profit and loss - under the head Depreciation and amortisation expenses, unless such expenditure forms part of carrying value of another asset.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

Intangible assets with indefinite lives are not amortised but are tested for impairment on annual basis. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Estimated useful lives of the intangible assets are as follows:

Type of Asset	Useful lives
Transmission license	Indefinite
Computer software	3 years

3.4 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use. This condition is regarded as met only when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset and its sale is highly probable. Also, such assets are classified as held for sale only if the management expects to complete the sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and the fair value less cost to sell, except for financial assets which are measured as per Ind AS 109 "Financial Instruments". Non-current assets are not depreciated or amortised

3.5 Impairment of PPE and intangible assets

PPE (including CWIP) and intangible assets with definite lives, are reviewed for impairment, whenever events or changes in circumstances indicate that their carrying values may not be recoverable. Intangible assets having indefinite useful lives are tested for impairment, at-least annually and whenever circumstances indicate that it may be impaired.

For the purpose of impairment testing, the recoverable amount (that is, higher of the fair value less costs to sell and the value-in-use) is determined on an individual asset basis, unless the asset does not generate cash flows that are largely independent of those from other assets, in which case the recoverable amount is determined at the cash generating unit ("CGU") level to which the said asset belongs. If such individual assets or CGU are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured by the amount by which the carrying value of the asset / CGU exceeds their estimated recoverable amount and allocated on pro-rata basis.

Impairment losses are reversed in the statement of profit and loss and the carrying value is increased to its revised recoverable amount provided that this amount does not exceed the carrying value that would have been determined had no impairment loss been recognised for the said asset / CGU in previous years.

3.6 Financial instruments

Financial assets (except for trade receivables which are measured at transaction cost) and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities measured at fair value through profit or loss are recognised immediately in the Consolidated statement of profit and loss.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

(A) Financial assets

Initial recognition and measurement:

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement:

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

i) Classification and measurement of financial assets

a) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost using the effective interest rate method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if both of the following criteria are met-

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c) Financial assets at fair value through profit & loss (FVTPL)

All financial assets that do not meet the criteria for amortised cost or FVTOCI are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset.

ii) Impairment of financial assets

The Group assesses at each date of consolidated balance sheet whether a financial asset. IndAS 109 requires expected credit losses to be measured through a loss allowance. The Group recognises lifetime expected losses for all contract assets and/or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

iii) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Group's consolidated balance sheet) when:

- the right to receive cash flows from the asset have expired, or
- the Group has transferred its right to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the Consolidated statement of profit and loss if such gain or loss would have otherwise been recognised in the Consolidated statement of profit and loss on disposal of that financial asset.

(B) Financial liabilities and equity instruments

i) Classification as debt or equity

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

ii) financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost (loans and borrowings)

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the Consolidated statement of profit and loss when the liabilities are derecognised as well as through the effective interest rate (EIR) amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Consolidated statement of profit and loss.

Trade and other payables are recognised at the transaction cost, which is its fair value, and subsequently measured at amortised cost. Similarly, interest bearing loans (loans to related parties), trade credits and borrowings (including bonds) are subsequently measured at amortised cost using effective interest rate method. Trade credits include buyer's credit, foreign letter of credit and inland letter of credit.

Financial liabilities measured at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Financial liabilities are classified as held for trading if these

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

are incurred for the purpose of repurchasing in the near term. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in the Consolidated statement of profit and loss.

iii) Derecognition of Financial Liability

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. An exchange with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Consolidated statement of profit and loss.

3.7 Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement:

The Group uses derivative financial instruments, such as forward currency contracts and interest rate swaps to hedge its foreign currency risks and interest rate risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to the Consolidated statement of profit and loss, except for the effective portion of cash flow hedges, which is recognised in Other Comprehensive Income (OCI) and later reclassified to the Consolidated statement of profit and loss when the hedge item affects profit or loss. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

Cash flow hedges.

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Consolidated statement of profit and loss.

Amounts recognised in OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

3.8 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on weighted average basis. Cost of inventory includes cost of purchase and other costs incurred in bringing the

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

inventories to their present location and condition. Unserviceable / damaged stores and spares are identified and written down based on technical evaluation.

3.9 Business Combinations

Business combinations are accounted for under the acquisition method. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under Ind AS 103 'Business Combinations' are recognised at their fair value at the acquisition date, except certain assets and liabilities required to be measured as per applicable standards

If the initial accounting for a business combination is incomplete as at the reporting date in which the combination occurs, the identifiable assets and liabilities acquired in a business combination are measured at their provisional fair values at the date of acquisition. Subsequently adjustments to the provisional values are made within the measurement period, if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date; otherwise, the adjustments are recorded in the period in which they occur.

Purchase consideration paid more than the fair value of net assets acquired is recognised as goodwill. Where the fair value of identifiable assets and liabilities exceed the cost of acquisition, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognised as capital reserve.

Acquisition expenses are charged to the consolidated statement of profit and loss in the periods in which the costs are incurred, and the services are received except costs to issue debt or equity securities which shall be recognised in accordance with Ind AS 32 and Ind AS 109.

3.10 Foreign currencies

The functional currency of the Group is Indian Rupee ₹.

In preparing the financial statements of the Group, transactions in currencies other than the entity's functional currency are recognised at the rate of exchange prevailing on the date of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences on monetary items are recognised in the Consolidated statement of profit and loss in the period in which they arise except for:

- (i) exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings; and
- (ii) exchange differences on transactions entered into in order to hedge certain foreign currency risks.

3.11 Fair value measurement

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

- (i) Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- (ii) (ii) Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- (iii) (iii) Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Group's accounting policies. For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

3.12 Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

1. Transmission of power

Revenue from transmission of power is recognised net of cash discount over time for transmission of electricity. The Group as per the prevalent tariff regulations is required to recover its Annual Revenue Requirement ('ARR') comprising of expenditure on account of operations and maintenance expenses, financing costs, taxes and assured return on regulator approved equity with additional incentive for operational efficiencies.

Input method is used to recognize revenue based on the Group's efforts or inputs to the satisfaction of a performance obligation to deliver power. As per tariff regulations, the Group determines ARR and any surplus/shortfall in recovery of the same is accounted as revenue.

2. Sale of power - Distribution

Revenue from sale of power is recognised net of cash discount over time based on output method i.e. for each unit of electricity delivered at the pre-determined rate. Sales of power under Deviation settlement mechanism is recognised at variable cost.

3. Rendering of services

Revenue from a contract to provide services is recognized over time based on output method where direct measurements of value to the customer based on surveys of performance completed to date. Revenue is recognised net of cash discount at a point in time at the contracted rate.

4. Interest on Overdue Receivables / Delay Payment Charges

Consumers are billed on a monthly basis and are given average credit period of 15 to 30 days for payment. No delayed payment charges ('DPC') / interest on arrears ('IOA') is charged for the initial 15-30 days from the date of invoice to customers. Thereafter, DPC / IOA is charged at the rate prescribed in the tariff order on the outstanding amount.

Revenue in respect of delayed payment charges and interest on delayed payments leviable as per the relevant contracts are recognised on actual realisation or accrued based on an assessment of certainty of realization supported by either an acknowledgement from customers or on receipt of favourable order from regulator / authorities

5. Sale of traded goods

Revenue from sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the amount of revenue can be measured reliably; and
- it is probable that the economic benefits associated with the transaction will flow to The Group.

There is no significant judgement involved while evaluating the timing as to when customers obtain control of promised goods and services.

6. Amortisation of Service line contribution

Contributions by consumers towards items of property, plant and equipment, which require an obligation to provide electricity connectivity to the consumers, are recognised as a credit to deferred revenue. Such revenue is recognised over the useful life of the property, plant and equipment.

7. Interest income:

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

8. Rental income:

Rental income from guest house and others are recognised as revenue in the period in which they are earned.

3.13 Regulatory deferral account

The Group determines revenue gaps (i.e. surplus/shortfall in actual returns over returns entitled) in respect of its regulated operations in accordance with the provisions of Ind AS 114 "Regulatory Deferral Accounts" read with the guidance note on Rate Regulated Activities issued by The Institute of Chartered Accountants of India (ICAI) and based on the principles laid down under the relevant Tariff Regulations/Tariff Orders notified by the Electricity Regulator and the actual or expected actions of the regulator under the applicable regulatory framework. Appropriate adjustments in respect of such revenue gaps are made in the regulatory deferral account of the respective year for the amounts which are reasonably determinable, and no significant uncertainty exists in such determination. These adjustments/accruals representing revenue gaps are carried forward as Regulatory deferral accounts debit/credit balances (Regulatory Assets/Regulatory Liabilities) as the case may be in the financial statements, which would be recovered/refunded through future billing based on future tariff determination by the regulator in accordance with the electricity regulations.

The Group presents separate line items in the consolidated balance sheet for:

- i. the total of all regulatory deferral account debit balances; and
- ii. the total of all regulatory deferral account credit balances.

A separate line item is presented in the Consolidated statement of profit and loss for the net movement in regulatory deferral account. Regulatory assets/ liabilities on deferred tax expense/income is presented separately in the tax expense line item.

3.14 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

borrowing costs. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Substantial time is defined as time required for commissioning of the assets considering industry benchmarks/ Maharashtra Electricity Regulatory Commission (MERC) tariff regulations.

3.15 Employee benefits

(i) Defined contribution plan:

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

(ii) Defined benefit plans:

The Group has an obligation towards gratuity, a defined benefit retirement plan which is a combination of funded plan / unfunded plan.

Defined benefit costs in the nature of current and past service cost and net interest expense or income are recognized in the Consolidated statement of profit and loss in the period in which they occur. Actuarial gains and losses on remeasurement is reflected immediately in the consolidated balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur and is reflected immediately in retained earnings and not reclassified to profit or loss.

(iii) Compensated absences:

Provision for compensated absences and its classifications between current and non-current liabilities are based on independent actuarial valuation. The actuarial valuation is done as per the projected unit credit method as at the reporting date.

(iv) Short-term and other long-term employee benefits:

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Group in respect of services provided by employees up to the reporting date.

3.16 Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Right-of-use assets

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

Lease Liabilities

The lease liability is initially measured at the present value of the lease payments to be paid over the lease term at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate. Subsequently, the lease liability is measured at amortised cost using the effective interest method.

3.17 Taxation

Tax on Income comprises current tax and deferred tax. These are recognised in Statement of Profit and Loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

i) Current Tax

Tax on income for the current period is determined on the basis on estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit and loss (either in Other Comprehensive Income or in Equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations for which applicable tax regulations are subject to interpretation and revises the provisions where appropriate.

ii) Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Regulators tariff norms in respect of certain subsidiaries which operate under cost plus tariff regime, provide the recovery of Income Tax from the beneficiaries by way of grossing up the return on equity based on effective tax rate for the financial year shall be based on the actual tax paid during the year on the transmission income from certain subsidiaries. Accordingly, deferred tax liability provided during the year which is fully recoverable from beneficiaries and known as "deferred assets recoverable / adjustable". The same will be recovered when the related deferred tax liability forms a part of current tax.

3.18 Provisions, and Contingent Liabilities

i) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

Present obligations arising under onerous contracts are recognised and measured as provisions with charge to statement of profit and loss. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract

ii) Contingent Liabilities

A possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise are disclosed as contingent liability and not provided for. Such liability is not disclosed if the possibility of outflow of resources is remote.

4 Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

The Group applied following amendments for the first-time during the current year which are effective from 1 April 2024:

Amendments to Ind AS 116 -Lease liability in a sale and leaseback

The amendments require an entity to recognise lease liability including variable lease payments which are not linked to index or a rate in a way it does not result into gain on Right of use asset it retains.

Introduction of Ind AS 117

MCA notified Ind AS 117, a comprehensive standard that prescribe, recognition, measurement and disclosure requirements, to avoid diversities in practice for accounting insurance contracts and it applies to all companies i.e., to all "insurance contracts" regardless of the issuer. However, Ind AS 117 is not applicable to the entities which are insurance companies registered with IRDAI.

The Group has reviewed the new pronouncements and based on its evaluation has determined that these amendments do not have a significant impact on the Group's Financial Statements.

- Notes:
- (i) The above intangible assets are other than internally generated intangible assets.
- (ii) Transmission license was acquired as part of the business acquisition. The License is valid for 25 years from 16 August, 2011 to 15 August, 2036. The license is expected to be further extended at minimal cost, considering similar extensions have happened in the past. Based on an analysis of all of the relevant factors, the license is considered by the Group as having an indefinite useful life, as there is no foreseeable limit to the period over which the transmission business related assets are expected to generate net cash inflows for the Group. (refer note 33 for impairment assessment).
- (iii) Transmission License is pledged as security with the Lenders against borrowings. {refer note 18 (i)}.

Total	1,331.83	1,132.33

Note :

(i) The Group holds security deposit from its customers (refer note 22) in respect of trade receivables to the extent covered by such deposits are presented as secured,

(ii) Above trade receivables are pledged as security with the Lenders against borrowings [refer note 19 (i)].

(iii) The average credit period for the Group's receivables from its transmission and distribution (including street light maintenance) business is in the range of 15 to 30 days. No interest or delayed payment is charged on trade receivables

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

till the due date. Thereafter, one time delayed payment charges at the rate of 1.25% & interest after 30 / 60 days from bill date is charged in the range of 12% to 15% per annum.

- (iv) In case of transmission business, regulator approved tariff is receivable from long-term transmission customers (LTTCs) and Discoms that are highly rated companies or government parties. Counterparty credit risk with respect to these receivables is very minimal.
- (v) Trade receivable balance mainly comprises of outstanding from consumers wherein the credit period provided to such consumers is less than 30 days. The outstanding amount beyond credit period remains insignificant. The risk of recovery in this business is reduced to the extent of security deposits already collected and held as collateral. Considering the nature of the business, the historical loss trend, the loss allowance with respect to balance dues beyond credit period are not material and in line with expected credit losses in accordance with Ind AS 109.

for the year ended March 31, 2025

Notes 18 (ii)

During the year ended 31 March 2024, pursuant to approval by Board of Directors held on 26 May 2023, and approval of management committee of the Board of Directors of the Company in their meeting held on 13 November 2023, the Company had completed partial re-purchase of US\$ 120 million of its outstanding 3.949% US\$ 1000 million senior secured notes due 2030, through cash Tender Offer for purchase price of US\$ 850 for early bid and US\$ 800 for post early bid per US\$ 1000 principal amount based on the terms and conditions mentioned in tender offer memorandum on 30 November 2023.

Post re-purchase, in previous year the Company had recognised one time income of ₹ 136.49 crores (net of expenses ₹ 13.57 crores) on derecognition of liability and the Company has cancelled the aforementioned 3.949% US\$ 120 million Senior Secured Notes.

Notes 18 (iii)

During the year the Company has complied with all the covenants as required under bond agreement.

Goods and services transferred over the time	11,670.90	9,683.16
	11,701.07	9,778.90

C Transaction Price - allocated to the remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Group expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognised corresponds directly with the value to the customer of the entity's performance completed to date.

There are no aggregate value of performance obligations that are completely or partially unsatisfied as of 31 March, 2025, other than those meeting the exclusion criteria mentioned above.

(Less): Allowance for doubtful debts	(1.39)	(1.39)
	1,249.87	1,055.40

Contract assets

Contract asset is the right to consideration in exchange for goods or services transferred to the customer when that right is conditioned on something other than passage of time. Contract Assets are transferred to receivables when the rights become unconditional.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer, If the customer pays contribution before the Company transfers goods or services to the customers, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the performance of obligation is satisfied.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

33 The Transmission license granted to AEML is an asset specific license which includes list of existing and proposed transmission lines as well as transmission bays in a specified area. In accordance with the requirements of Ind AS 36 "Impairment of Assets", Transmission Cash Generating Unit ("TCGU") which includes carrying value of Transmission License having indefinite useful life being Transmission License (₹ 981.62 crores), has been tested for impairment as at 31 March, 2025 wherein, recoverable amount of the TCGU has been determined applying value in use approach. The value in use of the TCGU has been determined using Discounted Cash Flow Method (DCF).

In deriving the recoverable amount of the TCGU a discount rate (post tax) of 9.60% (31 March 2024: 9.50%) per annum has been used. In arriving at the recoverable amount of the TCGU, financial projections have been developed for 7 years (31 March 2024: 6 years) and thereafter in perpetuity considering a terminal growth rate of 2% (31 March 2024: 2%) per annum.

Based on the results of the TCGU impairment test, the estimated value in use of the TCGU was higher than its carrying amount, hence no impairment loss is recorded (31 March 2024 - ₹ Nil). Management believes that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the fair value of the Transmission License.

The key assumptions used in determining the recoverable amount of TCGU are as follows :

- (i) Discount Rate: 9.60 % (31 March 2024: 9.50 %) Post-Tax Discount rate has been derived based on current cost of borrowing and equity rate of return in line with the current market expectations
- (ii) Capital expenditure / Capitalisation: Capital expenditure and capitalisation for 7 years (31 March 2024: 6 years) is estimated based on management projections subject to regulatory approval and thereafter ₹ 550 crores per annum (31 March 2024: ₹ 675 crores per annum)
- (iii) Terminal growth : 2% (31 March 2024 : 2%)

34 Leases

Disclosure under Ind AS 116 leases:

a) The following is the movement in lease liabilities during the year ended 31 March 2025

(₹ In crore)		
Particulars	As at March 31, 2025	As at March 31, 2024
Opening balance	19.14	30.74
Interest on Lease Liabilities	1.91	3.07
Lease Liabilities on account of Leases entered / terminated during the year	-	-
Payments of Lease Liabilities / Other Adjustments	(9.90)	(14.67)
Closing Balance (refer note 19)	11.15	19.14

b) Where the company is a lessee :

The Group has taken office premises, warehouse on lease. Generally leases are renewed on mutual consent and at a prevalent market price and sub lease is restricted. Further the lease agreements existing as at 31 March, 2025 does not contain any extension and termination option.

- i) Interest expenses on lease liabilities amounts to ₹ 1.91 crores (31 March 2024 ₹ 3.07 crores)
- ii) The expense relating to payments not included in the measurement of the lease liability and recognised as expenses in the statement of profit and loss during the year is as follows :

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

- Low Value leases - Immaterial
- Short-term leases - ₹ 21.56 crores (31 March 2024 ₹ 11.76 crores)
- iii) Total Cash outflow for leases amounts to ₹ 31.46 Crores (31 March, 2024 ₹ 26.43 crores) during the year including cash outflow short term and low value leases.
- iv) Incremental rate of borrowing considered during the year is 10% per annum (31 March, 2024 10% per annum).
- v) Refer note 5b for gross, addition, amortisation, depreciation and net carrying value of lease assets

35 Contingent liabilities and commitments

(A) Contingent liabilities :

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024

(iii) Way Leave fees claims disputed by the Group relating to rates charged - refer note 3 below	28.43	28.43
(iv) Property related disputes - refer note 3 below	2.59	2.59
(v) Other claims against the Group not acknowledged as debts.	2.12	2.12
(vi) Claims raised by Vidharbha Industries Power Limited (VIPL) in respect of increase in fuel cost for the financial year ended 31 March, 2019 - refer note 3 below	1,381.28	1,381.28
(vii) Demand disputed by the Group relating to Standby Charges payable - refer note 4 below	-	398.68
(viii) Liability in respect of termination of power purchase lease agreement - refer note 5 below	-	@@
	1,767.97	2,294.30

@@ Amount not determinable

Notes:

- 1 Amounts in respect of employee related claims/disputes, consumer related litigation, regulatory matters is not ascertainable.
- 2 Future cash flows in respect of above matters are determinable only on receipt of judgements/decisions pending at various forums/authorities.
- 3 In terms of the Share Purchase Agreement entered into by the Company, AESL with RINFRA, in the event the above matters are decided against the Group and are not recoverable from the consumers, the same would be recovered from RINFRA.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

- 4 In previous financial year 2023-24, an Appeal has been filed by the Company at APTEL under Section 111 of the Electricity Act, 2003, challenging the Order dated 31 March 2023 passed by the Maharashtra Electricity Regulatory Commission (MERC) directing levy of Standby charges by Maharashtra State Electricity Distribution Company Limited.
- In the current financial year 2024-25, in accordance with the directions of the Hon'ble APTEL, MERC has not considered any cost related to Standby charges in the Annual Revenue Requirement (ARR) in its Order dated 28 March 2025.However, the cost of Standby charges are subject to final decision of the Hon'ble Commission after due regulatory proceedings, which is yet to be received.
- Hence at this stage the company is not able to make a reasonable estimate towards cost of standby charges. If any liability occurs in future, the same is recoverable from the consumers."
- 5 The Company had terminated long term Power purchase agreement (PPA) due to non-performance of obligations under the PPA by VIPL, such termination has been upheld by MERC / Appellate Tribunal of Electricity ("ATE"). VIPL has filed an appeal before the Hon'ble Supreme Court against the said order issued by the ATE. In the current financial year the appellant has withdrawn the said appeal.
- 6 Pursuant to the order dated 14 October 2024 passed by Hon'ble Revenue Minister, in revision petition no. 2624 of 2024, it has been held that unearned income is not leviabale in cases where land is transferred pursuant to a scheme of demerger sanctioned by the Hon'ble High court.

The Group, in respect of the above mentioned Contingent Liabilities has assessed that it is only possible but not probable that outflow of economic resources will be required.

(B) Capital Commitments :

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024
Estimated amount of contracts remaining to be executed on capital account and not provided for (net of advance)	2,016.99	2,899.05
	2,016.99	2,899.05

(C) Other commitments :

- a) For procurement of Hybrid (Solar/Wind) power on long term basis, AEML has entered into a long term 25 years PPA of 700 MW per annum with a group entity (Adani Hybrid Energy Jaisalmer Four Limited) to purchase 700 MW per annum of Hybrid Renewable Power at ₹ 3.24 per unit.
- b) For procurement of Thermal power on long term basis, AEML has entered into a long term 5 years PPA of 2 x 250 MW per annum with a group entity (Adani Power Limited) to purchase 500 MW per annum of Thermal Power at rates as will be laid by Maharashtra Electricity Regulatory Commission.

36 On 21 August 2022, R-Infra filed a Consolidated statement of arbitration claims under the Share Purchase Agreement. During the current financial year, the parties have amicably resolved their disputes, and a settlement has reached between the parties. In light of this settlement, RInfra has withdrawn all claims filed, in connection with the share purchase agreement.

37 Maharashtra Electricity Regulatory Commission ('MERC') vide its order dated 26 December 2022 granted an in-principal approval for the transfer of Company's distribution network infrastructure in Seepz SEZ area to AEML Seepz Limited ('ASL'), a wholly owned subsidiary of the Company. Based on the principles laid down by MERC, ASL

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

filed requisite petitions for approval of tariff, power procurement plan and switchover/ changeover protocol (i.e. shifting of consumers from other Distribution Licensees to ASL and vice versa in SEEPZ area) which have been approved by MERC on 09 October 2023.

Subsequently in previous financial year, the Company and ASL have entered into a Business Transfer agreement dated 1 November 2023 for transfer of Company's distribution network infrastructure (including movable and immoveable assets) in Seepz SEZ area as a going concern to ASL, on a slump sale for a total consideration of ₹ 36.96 crore.

38 During the year, the Company has divested Dahanu Thermal Power Station to honour its ESG Commitment. The Company in its meeting of the Board of Directors dated 24 July, 2024 has approved the transaction for carving said power station to its wholly owned subsidiary, North Maharashtra Power Limited (NMPL) one of the related party at the transaction price of ₹ 815 crores against the carrying value in books of ₹ 2,321.02 crores and hence ₹ 1,506.02 crores has been charged in the statement of profit and loss and shown as exceptional item in accordance with Ind AS 105.

40 During the financial year 2022-23, a short seller report ("SSR") was published alleging certain issues against Adani group entities including the Company and its Holding Company. On 3rd January 2024, the Hon'ble Supreme Court ("SC") disposed off all matters of appeal in various petitions including separate independent investigations relating to the allegation in SSR and stated that the Securities and Exchange Board of India ("SEBI") should complete the investigation on balance two pending matters and take investigations to their logical conclusion in accordance with law. During the current year, the management of the Company and its Holding Company believes that balance two investigations have been concluded based on available information. The Holding Company received a Show Cause Notice (SCN) from the SEBI during the quarter ended March 2024 relating to validity of Peer Review Certificate (PRC) of one of the former statutory auditor in respect of an earlier period which was duly responded by the management of the Holding Company. During the current year, a SCN has been received by the Holding Company, alleging wrongful categorisation of shareholding pertaining to period FY 2012-2020 of certain entities as public shareholding and consequences therefrom. However, it does not have any bearing with the current free float and shareholding which fully complies with applicable laws and regulations.

Pursuant to the SC order, various legal and regulatory proceedings by the SEBI, legal opinions obtained, independent legal & accounting review undertaken by the Adani group and the fact that there is no pending

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

regulatory or adjudicatory proceeding as of date except relating to SCNs as mentioned above, the management of the Company concluded that there are no material consequences of the SSR and the Company and its Holding Company continues to hold good its position as regards the compliance of applicable laws and regulations.

41 In November 2024, the Company became aware of an indictment filed by United States Department of Justice (US DOJ) and a civil complaint by Securities and Exchange Commission (US SEC) in the United States District Court for the Eastern District of New York against a non-executive director of the Company. The director is indicted by US DOJ for alleged securities & wire fraud conspiracy and securities fraud for misleading statements and civil complaint by US SEC in respect of alleged omission of disclosure of material facts in certain statements. The Company is not named in these matters.

Having regard to the status of the above-mentioned matters, and the fact that the matters stated above do not pertain to the Company, there is no impact on these financial statements.

42 Adani Energy Solutions Limited (AESL), formerly know as Adani Transmission Limited (ATL) has acquired the control of the Company w.e.f. 29 August, 2018, through its purchase from Reliance Infrastructure Limited ("Rlnfra"), of the equity shares of the Company.

As per the Share Purchase Agreement (SPA), Rlnfra had retained positive and negative rights through an overriding title in favour of Rlnfra in respect of Regulatory Assets under Approval (RAUA) Matters, which were not transferred to the AESL, and consequently, Rlnfra retained the RAUA Matters. Rlnfra novated these at a commercially agreed consideration of ₹ 2,802 crores to the AESL pursuant to the security novation agreement dated 17 September 2024. Consequently, considering the certainty of the outcome of these matters, the Company has recognised regulatory assets of ₹ 2,802 crores with corresponding liability payable to the Holding Company.

Note:

1 The above disclosure does not include transaction with / as public utility services viz, electricity, telecommunications etc. in the normal course of business.

- 2 Transactions amongst related parties are made on terms equivalent to those that prevail in arm's length transactions and represent the substance over the legal form.
- Balance receivable and payable are unsecured, non-interest bearing and will be settled in cash. Refer note 7 and 18 for terms and condition with respect to loan receivable and borrowings respectively. Advance to supplier is unsecured and provided at an interest of 11% p.a. There have been no guarantees provided or received for any related party receivables or payables. For the year ended 31 March 2025, the Company has not recorded any impairment of receivables relating to amounts owed by related parties (31 March 2024: ₹ Nil). This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates."
- 3 Key Managerial Personnel are entitled to post-employment benefits and other long term employee benefits recognised as per Ind AS 19 - 'Employee Benefits' in the consolidated financial statements. As these employee benefits are lump sum amounts provided on the basis of actuarial valuation, the same is not included above.
- 4 Refer note 35 (C) for commitments with related parties.
- 5 Amounts disclosed are contractual undiscounted cash flows

44 Disclosure under Ind AS 19 "Employee benefits" :

1 Defined contribution plan

- (i) Provident fund
- (ii) Superannuation fund
- (iii) State defined contribution plans
- Employer's contribution to Employees' state insurance
 - Employers' Contribution to Employees' Pension Scheme 1995

The provident fund and the state defined contribution plan are operated by the Regional Provident Fund Commissioner and the superannuation fund is administered by the trustees of the AEML Superannuation Scheme. Under the schemes, the Group is required to contribute a specified percentage of payroll cost to the retirement benefit schemes to fund the benefits. The Group has no obligation other than the contribution to the fund.

The Group has recognised the following amounts as expense in the statement of profit and loss for the year:

Particulars	For the year ended 31 March, 2025	For the year ended 31 March, 2024
Contribution to Provident fund	41.62	42.70
Contribution to Employees Superannuation fund	5.36	6.16
Contribution to Employees State Insurance Corporation	-	0.01
Contribution to Employees Pension scheme	5.39	5.92

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

2 Defined benefit plan

Gratuity

The Group operates a funded gratuity plan in the form of a Trust, governed by Trustees appointed by the Group and administered by Life Insurance corporation. Every employee is entitled to a benefit equivalent to fifteen days salary last drawn for each completed year of service in line with the Payment of Gratuity Act, 1972 or Group scheme whichever is beneficial. The same is payable at the time of separation from the Group or retirement, whichever is earlier. The benefits vest after five years of continuous service.

Particulars	(₹ In crore)	
	As at March 31, 2025	As at March 31, 2024
Regulatory deferral account assets (net)	3,087.61	1,571.36
Regulatory deferral account liabilities (net)	(17.15)	(0.38)

Rate regulated activities

- 1
- As per the Ind AS-114 'Regulatory Deferral Accounts', the business of electricity distribution is a Rate Regulated activity wherein Maharashtra Electricity Regulatory Commission (MERC), the regulator determines Tariff to be charged from consumers based on prevailing regulations in place.
- 2
- MERC Multi Year Tariff Regulations, 2019 (MYT Regulations), is applicable for the period beginning from 1 April, 2020 to 31 March, 2025. These regulations require MERC to determine tariff in a manner wherein the Group can recover its fixed and variable costs including assured rate of return on approved equity base, from its consumers. The Group determines the Revenue, Regulatory Assets and Liabilities as per the terms and conditions specified in MYT Regulations.
- 3
- MERC vide its Multi Year Tariff (MYT) order dated 28 March 2025, has approved the Truing-up of FY 2022-23 and FY 2023-24, Provisional Truing-up for FY 2024-25, and ARR and Tariff for 5th Control Period from FY 2025-26 to FY 2029-30 in accordance with MYT Regulations, 2024, for Transmission and Distribution Business of the Group. Consequent to the above order, the Group has recognised net income of ₹ 133.11 crores during the year ended 31 March 2025.
- 4
- Pursuant to the Mid Term Review (MTR) order issued by Maharashtra Electricity Regulatory (MERC) on 31 March 2023, the Group has recovered from customers Regulatory Asset Charge (RAC) for past years. The impact thereof on the Revenue from Operations and Net Regulatory Income/(Expense) for the reporting periods is as stated below

A. Revenue from operations

Particulars	For the year ended 31 March, 2025	For the year ended 31 March, 2024
a Revenue from operations for the year	10,816.16	9,121.42
b Recovery of RAC for past years	884.91	657.48
c Revenue from operations (including past year recovery) (a-b)	11,701.07	9,778.90

B. Net Movement in Regulatory Deferral Account Balances – Income / (Expenses)

Particulars	For the year ended 31 March, 2025	For the year ended 31 March, 2024
a Regulatory (surplus) / gap for current year	(417.58)	266.70
b Movement in regulatory deferral balance other comprehensive income - Distribution	15.06	13.60
c Recovery of RAC for past years	884.91	657.48
d Regulatory expense (net) recognised in statement of profit and loss (a-b-c)	(1,317.55)	(404.38)

Particulars	31-Mar-25	31-Mar-24
Assumptions – Future Salary Increase		
Sensitivity Level	1.00%	1.00%
Impact on defined benefit obligation –in % increase	8.02%	10.10%
Impact on defined benefit obligation –in ` Crores	50.68	67.57
Impact on defined benefit obligation –in % decrease	(7.16%)	(8.88%)
Impact on defined benefit obligation –in ` Crores	(45.20)	(59.39)
Assumptions – Employee Turnover		
Sensitivity Level	1.00%	1.00%
Impact on defined benefit obligation –in % increase	(1.79%)	(3.71%)
Impact on defined benefit obligation –in ` Crores	(11.32)	(24.84)
Impact on defined benefit obligation –in % decrease	1.98%	3.90%
Impact on defined benefit obligation –in ` Crores	12.52	26.07

2.(i) The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting year) has been applied as when calculating the defined benefit liability recognised in the balance sheet.

2.(ii)The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

3 Risk exposure:

Through its defined benefit plans, the Group is exposed to a number of risks, the most significant of which are detailed below:

3.(i) Asset volatility:

The plan liabilities are calculated using a discount rate set with reference to government bond yield. If plan assets underperform this yield, it will result in deficit. These are subject to interest rate risk. To offset the risk, the plan assets have been deployed in high grade insurer managed funds.

3.(ii)Inflation rate risk:

Inflation higher than expected increase in salary could increase the defined benefit obligation.

3.(iii) Demographic risk:

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

5 Reconciliation of Regulatory Assets / Liabilities of distribution business as per Rate Regulated Activities is as follows:

Particulars	As at 31 March, 2025	As at 31 March, 2024
1 Opening Regulatory deferral account balances (net)	1,570.98	1961.73
a. Regulatory deferral account - assets - ₹ 1571.36 crores (01 April 2023 - ₹ 1961.73)		
b. Regulatory Deferral Account - Liabilities - ₹ (0.38) crores {01 April 2023 - Nil}		
2 Movements		
2.1 Add:		
Payable towards regulatory asset under approval (refer note 42)	2,802.00	-
2.2 Less:		
Revenue gap for current year	(417.58)	266.70
Recovery of RAC for past years	(884.91)	(657.48)
Others	(0.03)	0.03
2.3 Net movement during the year	1,499.48	(390.75)
3 Closing regulatory deferral account balances (net)	3,070.46	1,570.98
a. Regulatory deferral account - assets - ₹ 3087.61 crores {31 March 2024- ₹ 1571.36 crores}		
b. Regulatory Deferral Account - Liabilities - ₹ (17.15) crores {31 March 2025 - ₹ (0.38) crores}		

Note :

- (i) Risk associated with future recovery/ reversal of regulatory deferral account balances
- (a) regulatory risk on account of changes in regulations.
- (b) other risks including currency or other market risks, if any.
- Any change in the Tariff regulations beyond the current tariff period ending on 31 March 2025 may have an impact on the recovery of Regulatory deferral account balances.
- (ii) The Group will recover regulatory gap of ₹ 861.03 crores out of ₹ 3,087.61 crores regulatory deferral accounts assets and adjust surplus of ₹ 2.89 crores out of regulatory deferral account liabilities in FY 2025-26, while balances will be recovered / adjusted over the life of the projects as per existing MERC regulations.

Total	21,051.66	19,513.09	17,180.88	15,721.13

Above excludes carrying value of investment in subsidiary accounted at cost in accordance with Ind AS 27.

The management assessed that the fair value of cash and cash equivalents, other balances with bank, trade receivables, loans, trade payables, other financial assets and liabilities approximate their carrying amounts largely due to the short term maturities of these instruments.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties. The following methods and assumptions were used to estimate the fair values.

Fair value of the Government securities, mutual funds are based on the price quotations near the reporting date. The fair value of loans given to employees, bearing interest, approximate their carrying value.

The borrowings including Senior Secured notes and Sustainability linked notes are listed on the Singapore Stock Exchange. The fair value of these borrowings have been determined based on the prevailing market rate on the said stock exchange as on the reporting date.

The fair value of loans from banks and other financial liabilities, as well as other non-current financial liabilities is estimated by discounting future cash flow using rates currently available for debt on similar terms, credit risk and remaining maturities.

The cost of certain unquoted investments approximate their fair value because there is a wide range of possible fair value measurements and the cost represents the best estimate of fair value within that range.

The Company enters into derivative financial instruments with various counterparties, principally banks and financial institutions with investment grade credit ratings. The most frequently applied valuation techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies, interest rate curves and forward rate curves of the underlying currency. All derivative contracts are fully collateralized, thereby, eliminating both counterparty and the company's own non-performance risk.

- 2 The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels

Level 1 :
Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 :
Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 :
Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Total	-	62.80	-	62.80

3 Capital Management & Gearing Ratio

The Group manages its capital structure in a manner to ensure that it will be able to continue as a going concern while optimising the return to stakeholders through the appropriate debt and equity balance. The Group's capital structure is represented by equity (comprising issued capital, retained earnings and other reserves) and debt. The Group's management of the respective component reviews the capital structure on an annual basis. As part of this review, the management considers the cost of capital and the risks associated with each class of capital. The Group's objective is to ensure that the gearing ratio (debt equity ratio) is around 70 : 30.

Gearing ratio

The gearing ratio at the end of the reporting period was as follows :

Particulars	As at 31 March, 2025	As at 31 March, 2024
Debt	14,955.72	14,491.94
Less : Cash & bank balance	1,886.77	1,574.86
Net debt	13,068.95	12,917.08
Total Capital	5,531.70	5,001.44
Capital & net debt	18,600.65	17,918.52
Gearing ratio	70%	72%

- (i) Debt includes as Non-current borrowings at fair value (including current maturities), current borrowings and interest accrued on borrowings.
- (ii) Cash & Bank Balance includes as Non-current deposit with banks, cash and cash equivalents and current bank balances,

In order to achieve this overall objective, the Group's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no significant breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

4 Financial risk management objectives and policies

The Group's principal financial liabilities, other than derivatives, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Groups operations/projects The Group's principal financial assets include loans, investment including mutual funds, trade and other receivables, and cash and cash equivalents which is derived from its operations.

In the ordinary course of business, the Group is mainly exposed to risks resulting from exchange rate fluctuation (currency risk), interest rate movements (interest rate risk) collectively referred as Market Risk. The Group's senior management oversees the management of these risks. It manages its exposure to these risks through the use of derivative financial instruments for hedging transactions. It uses derivative instruments such as cross currency swaps, full currency swaps, principal only swaps, coupon only swaps to manage these risks. These derivative instruments reduce the impact of both favourable and unfavourable fluctuations.

The Group's risk management activities are subject to the management, direction and control of Central Treasury team of the Group under the framework of Risk Management Policy for currency and interest rate risk, as approved by the Board of Directors of the Company. The Company's Central Treasury team ensures appropriate financial risk governance framework for the Group through appropriate policies & procedures and financial risks are identified, measured and managed in accordance with the Group's policies and risk objectives. It is the Group's policy that no trading in derivatives for speculative purposes is undertaken.

The decision of whether and when to execute derivative financial instruments along with its tenure can vary from period to period depending on market conditions and the relative costs of the instruments. The tenure is linked to the timing of the underlying exposure, with the connection between the two being regularly monitored. All derivative contracts are executed with counterparties that are creditworthy. The outstanding derivatives are reviewed periodically to ensure that there is no inappropriate concentration of outstanding to any particular counterparty.

A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk. The sensitivity analysis in interest rate and foreign currency risk sections relate to the position as at 31 March, 2024 and 31 March, 2025.

The sensitivity analysis have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant as at 31 March, 2024 and 31 March, 2025.

I. Foreign currency risk

The Company is exposed to foreign currency risks arising from its exposure to the USD. Foreign currency risks arise from future commercial transactions and recognized assets and liabilities, when they are denominated in a currency other than Indian Rupee. Exposures on foreign currency loans are managed through the Company wide hedging policy, which is reviewed periodically to ensure that the results from fluctuating currency exchange rates are appropriately managed. The Company's exposure with regards to foreign currency risk is given below.

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

The following table shows foreign currency exposures in US \$ on financial instruments at the end of the reporting period (refer note 46 (5))

Particulars	As at 31 March, 2025		As at 31 March, 2024	
	Foreign currency (in millions)	Amount	Foreign currency (in millions)	Amount
In USD

Total	0.06	0.64	-	-

(i) Foreign currency sensitivity analysis

The following tables demonstrate the sensitivity to a reasonably possible change in currency exchange rates, with all other variables held constant on the Group's profit / (loss) before tax and pre-tax equity is as under:

Particulars	Effect on profit before tax and consequential impact on equity			
	As at 31 March, 2025		As at 31 March, 2024	
	Increase	Decrease	Increase	Decrease
Rupee increase / (decrease) by ₹ 1 against USD / EURO	0.10	(0.10)	0.24	(0.24)
Rupee increase / (decrease) by ₹ 2 against USD / EURO	0.19	(0.19)	0.48	(0.48)
Rupee increase / (decrease) by ₹ 3 against USD / EURO	0.28	(0.28)	0.72	(0.72)

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

II. Interest rate risk management

The Group is exposed to interest rate risk on variable rate borrowings and on the refinancing of fixed rate debt. The Group's policy is to borrow long term debt with fixed interest rate. The short term borrowings of the Company are mainly floating rate rupee denominated working capital borrowings.

The long-term borrowings of the Group carries fixed rate of interest till maturity. During the year 2021-22, Company issued the Sustainability Linked Bond (SLB) of USD 300 million through 10-year notes under USD 2 billion Global Medium-Term Notes program (GMTN) which carry fixed rate of interest till maturity with certain Sustainability Performance Targets (SPTs), non-attainment of which will result in increase in fixed rate of interest by 0.15 % p.a, for SPT 1 in March 2027 and further 0.15 % p.a. for SPT 2 for March 2029.

(i) Interest rate sensitivity:

The sensitivity analysis below has been determined based on average outstanding exposure of borrowings during the year that have floating interest rates.

If the interest rates had been 50 basis points higher or lower and all the other variables were held constant, the effect on interest expense for the respective financial years and consequent effect on Company's profit and equity in that financial year would have been as below:

(₹ In crore)

	As at 31 March, 2025		As at 31 March, 2024	
	50 bps increase	50 bps decrease	50 bps increase	50 bps decrease
Interest expense on loan	3.31	(3.31)	2.31	(2.31)
Effect on profit before tax and equity	(3.31)	3.31	(2.31)	2.31

(ii) Price risk sensitivity

The Group invests its surplus funds in various mutual funds and fixed deposits. In order to manage its price risk arising from investments, the Group diversifies its portfolio in accordance with the limits set by the risk management policies. The Group has exposure across mutual fund and money market instruments.

Due to the very short tenure of money market instruments and the underlying portfolio in liquid schemes, these do not pose any significant price risk.

B. Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables and other financial assets) and from its investing activities, including loans given, deposits with banks, financial institutions & others and other financial assets.

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk defined in accordance with this assessment.

Credit risk on cash and bank balances is limited as the Group generally invests in deposits with banks with high credit ratings assigned by international and domestic credit rating agencies. Investments primarily include investment in government securities and considered as low risk investments. Counterparty credit limits are

Consolidated Notes forming part of the Financial Statements
for the year ended March 31, 2025

reviewed by the Group's management on a regular basis. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

(₹ In crore)

Particulars	As at 31 March, 2025	As at 31 March, 2024
Trade receivables	1,331.83	1,132.33
Loans	21.29	29.59
Other financial assets	1,020.66	1,163.52
Total	2,373.78	2,325.44

Refer note 12 for credit risk and other information in respect of trade receivables. Moreover, given the diverse nature of the consumer profile of the Group, trade receivables are spread over a number of customers with no significant concentration of credit risk. No single customer accounted for 10.0% or more of revenue basis in any of the years presented. The history of trade receivables shows a negligible provision for bad and doubtful debts compared to the volume/value of sales recorded. Other receivables as stated above are due from the parties under normal course of the business having sound credit worthiness and as such the Group believes exposure to credit risk to be minimal.

The Group has not acquired any credit impaired asset.

C. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in raising funds to meet commitments associated with financial instruments that are settled by delivering cash or another financial asset. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value The Group has an established liquidity risk management framework for managing its short term, medium term and long term funding and liquidity management requirements. The Group's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities The Group manages the liquidity risk by maintaining adequate funds in cash and cash equivalents The Group also has adequate credit facilities agreed with banks to ensure that there is sufficient cash to meet all its normal operating commitments in a timely and cost-effective manner.

Contractual maturities of Financial liabilities

** The table has been drawn up based on the undiscounted contractual maturities of the financial liabilities including interest that will be paid on those liabilities upto the maturity of the instruments, ignoring the call and refinancing options available with the Company. The amounts included above for variable interest rate instruments for non-derivative liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

*** Carrying value of lease liabilities is ₹ 11.15 crores (31 March, 2024 is ₹ 19.14 crores)

5 Derivative financial instrument

The Company uses derivatives instruments as part of its management of risks relating to exposure to fluctuation in foreign currency exchange rates. The Company does not acquire derivative financial instruments for trading or speculative purposes neither does it enter into complex derivative transactions to manage the above risks. The derivative transactions are normally in the form of cross currency swaps, principal only swaps, coupon only swaps to hedge its foreign currency risks and are subject to the Company's guidelines and policies.

The fair values of all derivatives are separately recorded in the balance sheet within current and non current assets and liabilities. Derivative that are designated as hedges are classified as current or non current depending on the maturity of the derivative.

The use of derivative can give rise to credit and market risk. The Company tries to control credit risk as far as possible by only entering into contracts with stipulated / reputed banks and financial institutions. The use of derivative instrument is subject to limits, authorities and regular monitoring by appropriate levels of management. The limits, authorities and monitoring systems are periodically reviewed by management and the Board. The market risk on derivative is mitigated by changes in the valuation of underlying assets, liabilities or transactions, as derivatives are used only for risk management purpose.

The Company has designated derivative contracts as cash flow hedges and recognise them at fair value. The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the statement of profit and loss. Amounts recognised in OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. These hedges have been effective for the year ended 31 March, 2025 and 31 March, 2024.

The fair value of the Company's derivative positions recorded under other financial assets and other financial liabilities as at 31 March, 2025 are as follows :-

(₹ In crore)				
Derivative Financials Instruments	As at 31 March, 2025		As at 31 March, 2024	
	Assets	Liabilities	Assets	Liabilities
Current				
Cashflow hedge*				
- Cross currency swaps	49.05	-	-	58.30
- Coupon only swaps	-	-	-	4.50
Total	49.05	-	-	62.80
Non Current
